The Project consists of the following parts:

Part 1: Household survey design
Provide support to strengthen CBS’ capacity to prepare and implement the survey in a more cost-effective manner through a series of technical assistance engagement. The following areas of support have been identified:

Introduction of CAPI to significantly reduce the time lag between data collection and data analysis, improve data quality and reduce survey costs. The proposed support on CAPI consists of: (a) training and workshops; (b) working with the IT staff from CBS on setting up the survey system infrastructure (c) helping in the design and testing of the CAPI household survey instruments - including real-time consistency checks, supervisor and enumerator supervision, and new ways to deal with measures and standards; (d) supervision in conducting survey pilot; (e) purchase of tablets; and (f) training on Geographic Information System.

The pilot survey will include comprehensive testing of all questionnaires using CAPI on (i) household budget survey – multi-topic; (ii) community survey; and (iii) market price survey.
Part 2: Data analysis, reporting writing and dissemination

(iii) Assess the availability and quality of existing administrative data (for selected indicators), and develop a plan for improvement.

(iv) Document and disseminate administrative data. Selected administrative records will be improved through application of Data Documentation Initiative (DDI) standards for data documentation, geographic reference and merging with other administrative records when feasible.
