Arrangement of tourist information signs and picnic spots in Baghdati and Khoni municipalities

Environmental and Social Screening Report

November 2017
Sub-Project Description

The Sub-Project (SP) will be implemented in Khoni and Baghdati municipalities. There are several cultural and historic heritage sites in both areas and they attract large number of tourists. 15,000 tourists visit Khoni and 10,000 – Baghdati annually. There is no tourist navigation system in these municipalities that cause trouble to foreigners while moving around those unfamiliar places, that’s why it is decided to arrange tourist information signs, which include tourism traffic signs, information boards and tourist maps (so-called light boxes). It is envisaged to arrange picnic places at tourist routes as well.

Particularly following interventions is planned within the SP:

Baghdati:
- Arrange two picnic spots;
- Install two garbage receptacles;
- Install fourteen road signs;
- Install eight information boards;
- Install two tourist maps (light box).

Khoni:
- Install six road signs;
- Install one tourist information board / map.

The tourist information boards / maps will help to increase the flow of visitors, the appropriate environment will become more attractive. Several hours stay of visitor groups in the municipality means that they will spend money, use food facilities, buy souvenirs and might use hotels.
# Environmental Screening and Classification

## (A) Impact Identification

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Has sub-project a tangible impact on the environment?</td>
<td>The SP construction phase covers 3 months’ period. The SP will have a small-scale and short-term impact on the environment only in the construction phase.</td>
</tr>
<tr>
<td>What are the significant beneficial and adverse environmental effects of the sub-project?</td>
<td>The expected negative environmental and social impacts are likely to be short-term. As a result of arrangement of picnic spots with tables and chairs, installation of information banners, road signs and light boxes, the dust and emissions from the operation of construction machinery will be increased, background noise and vibration levels will rise insignificantly, various types of construction waste may generate. During the operation phase, presence of the tourist infrastructure may result in additional generation of household waste, and nuisance to the nearby residents in case of improper behavior of visitors (loud music, drinking, etc.).</td>
</tr>
<tr>
<td>Does the sub-project have any significant potential impact on the local communities?</td>
<td>The long-term social impact of the SP will be beneficial, which will cause significant improvement of the social conditions of local population and tourists. As a result of the SP implementation, approximately 15,000 tourists in Khoni and 10,000 tourists in Baghdati will be served each year. Installation of tourist information signs, boards and maps, arrangement of picnic spots will be beneficial for tourism development in Both municipalities. The navigation system will attract more tourists, which will in turn help: 1. To popularize the local cuisine. Especially, it will become attractive for vegetarians, because local people prepare a lot of vegetarian dishes on place. 2. To promote production and sale of handicrafts; 3. To promote agro-tourism development. There are many species of grapes, hazelnuts, maize and other vegetables in both municipalities. Increased flow of tourists will be beneficial for museums, wine tourism, guiding service providers, develop the agro-tourism, increase sales of agricultural products, handicrafts, etc. Installation of illumination for the tourist information boards will not require turning off of electricity, since there will be a separate line provided for these.</td>
</tr>
</tbody>
</table>
Significant social impact of SP, such as change of local demographic structure and influx of new settlers is not envisaged.

| What impact has the sub-project on the human health? | The dust, vibration and noise originated during the small-scale construction works will not have impact on the human health or safety. |

(B) **Impact Mitigation**

| What alternatives to the sub-project design have been considered and what mitigation measures are proposed? | During the SP design, a no-project alternative was considered and turned down as the implementation of the SP will help attract both, the local and foreign visitors that will have a positive impact on the social condition of the local population. 

Reduction of adverse environmental impact during the installation/construction works will be possible through protecting the following key conditions: fencing the construction site and fixing the relevant signs throughout its perimeter, proper management of waste and constant monitoring, ensuring the technical functionality of machinery used during the construction works, selecting less sensitive period for construction works. 

Planned works will not cause cutting of trees and preventive measures will be undertaken to avoid any damage to the nearby standing trees. Large tress on and in the vicinity of the construction activities shall be marked and cordoned off with fencing, their root system protected, and any damage to the trees avoided. 

In case of chance finds, works will be taken on hold and notification be sent to the Ministry of Culture and Monument Protection of Georgia. Works will resume only upon written consent of the Ministry. |

| Have concerned communities been involved and have their interests and knowledge been adequately taken into consideration in sub-project preparation? | During community mobilization, several priorities were identified, including rehabilitation of village roads and drinking water systems and arrangement of tourist information signs and picnic places in Baghdati and Khoni municipalities. The latter was prioritized. |
(C) CATEGORIZATION AND CONCLUSION

Conclusion of the environmental screening:

- ✓ Sub-project is declined
- ✓ Sub-project is accepted
- ✓ Sub-project is classified as environmental Category B and needs EMP
- ✓ Sub-project is classified as environmental Category C and does not need EMP
### Social Screening

<table>
<thead>
<tr>
<th>Social safeguards screening information</th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Is the information related to the affiliation, ownership and land use status of the sub-project site available and verifiable? (The screening cannot be completed until this is available)</td>
<td>✓</td>
<td></td>
</tr>
<tr>
<td>2 Will the sub-project reduce people’s access to their economic resources, such as land, pasture, water, public services, sites of common public use or other resources that they depend on?</td>
<td>✓</td>
<td></td>
</tr>
<tr>
<td>3 Will the sub-project result in resettlement of individuals or families or require the acquisition of land (public or private, temporarily or permanently) for its development?</td>
<td>✓</td>
<td></td>
</tr>
<tr>
<td>4 Will the sub-project result in the temporary or permanent loss of crops, fruit trees and household infrastructure (such as ancillary facilities, fence, canal, granaries, outside toilets and kitchens, etc.)?</td>
<td>✓</td>
<td></td>
</tr>
</tbody>
</table>

If answer to any above question (except question 1) is “Yes”, then **OP/BP 4.12 Involuntary Resettlement** is applicable and mitigation measures should follow this OP/BP 4.12 and the **Resettlement Policy Framework**

<table>
<thead>
<tr>
<th>Cultural resources safeguard screening information</th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>5 Will the sub-project be implemented in the vicinity of a cultural heritage site?</td>
<td>✓</td>
<td></td>
</tr>
<tr>
<td>6 Will the sub-project require excavation near any historical, archaeological or cultural heritage site?</td>
<td>✓</td>
<td></td>
</tr>
</tbody>
</table>

If answer to question 5 is “yes”, then **OP/BP 4.11 Physical Cultural Resources** is applicable. In this case, sub-project proponent must provide evidence that consultation was held with and an agreement on this sub-project was obtained from an authorized representative of culture and heritage protection authority.

If answer to question 6 is “Yes”, then **OP/BP 4.11 Physical Cultural Resources** is applicable and possible chance finds must be handled in accordance with OP/BP and relevant procedures provided in this EMF.
Environmental Management Plan

Arrangement of tourist information signs and picnic spots in Baghdati and Khoni municipalities

* Works contractor:* (tbd) |

## SITE DESCRIPTION

| **Who owns the building to be constructed/extended/reconstructed?** | Works are not relate to buildings |
| **Who owns the land allocated for sub-project?** | The SP area is the property of Baghdati municipality.  
SP sites are in Baghdati and Khoni municipalities. Land plots allocated for the two picnic places are the property of Baghdati municipality. The tourist road signs and one light box will be placed in Baghdati and Khoni municipalities on the roads under the Roads Department of Georgia, for which a written permission is obtained and enclosed to the present EMP. The second light box will be placed in the center of Baghdati municipality and all information boards on the property territory of Baghdati municipality, which is the adjacent area of the building included in cultural heritage list. The permission to allocate those above listed information boards were requested from the local government in Baghdati and they responded that there is no |
need to have a permit to allocate information boards around the territory of cultural monument.

### Description of physical and natural environment, and of the socio-economic context around the site

SP will be implemented in Baghdati and Khoni municipalities.

**Baghdati:** Both picnic places will be arranged in Baghdati on Baghdati-Sairme road, where tourists often move around. Both picnic venues will be the same sized roofed construction, where the table and benches will be placed, as well as the place for the barbeque. At least 10 people will be placed together with tables and benches in each picnic construction. The main building materials will be metal, concrete and wood.

There are many interesting places for tourist in Baghdati. Places for allocating the information boards are:

1. Tkhmeli fortress, Vani-Baghdati Diocese
2. Information stand at the bridge of Kakaskhidi village
3. St. George Church of Tsitelkhevi village
4. St. George's church of Obchi village, church of Dormition of Mother of God
5. The Transfiguration church of Savior in Rokiti
6. Entrance of the village Khani
7. Place for observation of migratory birds
8. Tourist route from Baghdati to "Sairme" linking road. About 10,000 tourists move on this section per year, as there is quite a long way to other tourist objects in "Sairme" and travelers rest on this road, it is decided to arrange a picnic spot at that very place.

Places for allocation of the light boxes are:

1. 1 light box – at culture center
2. 2nd light Box at Maiakovskiy museum

Places for allocation of the road signs are:

1. Ananov Palace Vartsikhe (1 direction arrow)
2. Upper Dimi St. George's Temple, Dimna castle; (2 direction arrow)
3. Village Kakaskhidi-Berieti Monastery; (1 direction arrow)
4. Javakhishvili street (Baghdati) - Nakashidze's Family Museum; (1 direction arrow)
5. The Salkhino Church of village Persati (1 direction arrow)
6. Road sign at Kakaskhidi bridge - Zekari gorge (1 direction arrow)
7. Church of Archangel Church of village Persati (1 direction arrow)
8. Dimi center (Church of Archangel of Dimi, St. George Church of Upper Dimi, Dimna castl.)
9. The Transfiguration church of Savior of Rokiti (1 direction arrow)
10. Tsitelkhevi Church of the Presentation of the Blessed Virgin Mary (1 direction arrow)
11. St. George Church of village Tsitelkhevi (1 direction arrow)
12. Obchi 1) St. George Church, 2) Church of Assumption of Mother of God (2 direction arrows)
13. Village Dimi - (Sign 1, Surveillance tower of Dimi)  
14. Village of Tskaltashua; Saint Anastasia Persateli Church (1 direction arrow)

**In Khoni municipality**, tourists mostly come from Kutaisi via Tskaltubo, to see Khoni tourism objects and then continue their way to Samegrelo direction, for which a new motorway is being built. This will be the main road for tourists and it is decided to allocate the tourist road signs and tourist map (light box) exactly on this road. Road signs will be allocated at the appropriate turning road of tourist object, while the tourist banner/map will be allocated at the Khoni entrance section road from Tskhaltubo so that tourist, entering Khoni could easily see the tourist map of Khoni on the tourist banner and on the other side of the banner there will be allocated photos of Khoni tourist places and a brief information about them will be in Georgian and English.

The locations of road signs allocation in Khoni are:

1. Polikarpe Kakabadze’s house-museum in the village/Kukhi (1 inscription) – at petrol station -1.450 km  
2. In the entrance of Khoni - historic museum - 200 m. Okatse Canyon - 20 km. Kinchkha waterfall - 27 km (2 inscriptions).  
3. St. Barbare Church - village Nakhakhulevi (1 inscription) - 100 m.  
4. St. Nino’s Monastery of Nuns - 100 m. St.Basili the Great Church - Village Matkhoji - 100 m - (2 inscriptions).  
5. Village Sukhchi bridge - Okatse Canyon - 9 km and Kinchkha waterfall - 15 km - (2 inscriptions)  

<table>

\(^1\) Land acquisitions includes displacement of people, change of livelihood encroachment on private property this is to land that is purchased/transferred and affects people who are living and/or squatters and/or operate a business (kiosks) on land that is being acquired.

\(^2\) Toxic / hazardous material includes but is not limited to asbestos, toxic paints, noxious solvents, removal of lead paint, etc.
PART C: MITIGATION MEASURES

<table>
<thead>
<tr>
<th>ACTIVITY</th>
<th>PARAMETER</th>
<th>MITIGATION MEASURES CHECKLIST</th>
</tr>
</thead>
</table>
| 0. General Conditions | Notification and Worker Safety | (a) The local construction and environment inspectorates and communities have been notified of upcoming activities  
(b) The public has been notified of the works through appropriate notification in the media and/or at publicly accessible sites (including the site of the works)  
(c) All legally required permits have been acquired for construction and/or rehabilitation  
(d) The Contractor formally agrees that all work will be carried out in a safe and disciplined manner designed to minimize impacts on neighboring residents and environment.  
(e) Workers’ PPE will comply with international good practice (always hardhats, as needed masks and safety glasses, harnesses and safety boots)  
(f) Appropriate signposting of the sites will inform workers of key rules and regulations to follow. |
| A. General Rehabilitation and/or Construction Activities | Air Quality | (a) During interior demolition debris-chutes shall be used above the first floor  
(b) Demolition debris shall be kept in controlled area and sprayed with water mist to reduce debris dust  
(c) During pneumatic drilling/wall destruction dust shall be suppressed by ongoing water spraying and/or installing dust screen enclosures at site  
(d) The surrounding environment (sidewalks, roads) shall be kept free of debris to minimize dust  
(e) There will be no open burning of construction / waste material at the site  
(f) There will be no excessive idling of construction vehicles at sites |
| | Noise | (a) Construction noise will be limited to restricted times agreed to in the permit  
(b) During operations the engine covers of generators, air compressors and other powered mechanical equipment shall be closed, and equipment placed as far away from residential areas as possible |
| | Water Quality | (a) The site will establish appropriate erosion and sediment control measures such as e.g. hay bales and/or silt fences to prevent sediment from moving off site and causing excessive turbidity in nearby streams and rivers. |
| B. Individual wastewater treatment system | Water Quality | (a) The approach to handling sanitary wastes and wastewater from building sites (installation or reconstruction) must be approved by the local authorities  
(b) Before being discharged into receiving waters, effluents from individual wastewater systems must be treated in order to meet the minimal quality criteria set out by national guidelines on effluent quality and wastewater treatment  
(c) Monitoring of new wastewater systems (before/after) will be carried out  
(d) Construction vehicles and machinery will be washed only in designated areas where runoff will not pollute natural surface water bodies. |
| C. Historic building(s) | Cultural Heritage | (a) If the building is a designated historic structure, very close to such a structure, or located in a designated historic district, notification shall be made and approvals/permits be obtained from local authorities and all construction activities planned and carried out in line with local and national legislation.  
(b) It shall be ensured that provisions are put in place so that artifacts or other possible “chance finds” encountered in excavation or construction are noted and registered, responsible officials contacted, and works activities delayed or modified to account for such finds. |
| D. Acquisition of land | Land Acquisition Plan/Framework | (a) If expropriation of land was not expected but is required, or if loss of access to income of legal or illegal users of land was not expected but may occur, that the Bank’s Task Team Leader shall be immediately consulted.  
(b) The approved Land Acquisition Plan/Framework (if required by the sub-project) will be implemented |
| E. Toxic Materials | Asbestos management | (a) If asbestos is located on the sub-project site, it shall be marked clearly as hazardous material |
### F. Affected forests, wetlands and/or protected areas

**Protection**

- **(a)** All recognized natural habitats, wetlands and protected areas in the immediate vicinity of the activity will not be damaged or exploited, all staff will be strictly prohibited from hunting, foraging, logging or other damaging activities.
- **(b)** A survey and an inventory shall be made of large trees in the vicinity of the construction activity, large trees shall be marked and cordoned off with fencing, their root system protected, and any damage to the trees avoided.
- **(c)** Adjacent wetlands and streams shall be protected from construction site run-off with appropriate erosion and sediment control feature to include by not limited to hay bales and silt fences.
- **(d)** There will be no unlicensed borrow pits, quarries or waste dumps in adjacent areas, especially not in protected areas.

### G. Disposal of medical waste

**Infrastructure for medical waste management**

- **(a)** In compliance with national regulations the contractor will insure that newly constructed and/or rehabilitated health care facilities include sufficient infrastructure for medical waste handling and disposal; this includes and not limited to:

### Toxic / hazardous waste management

**Toxic / hazardous waste management**

- **(a)** Temporarily storage on site of all hazardous or toxic substances will be in safe containers labeled with details of composition, properties and handling information.
- **(b)** The containers of hazardous substances shall be placed in an leak-proof container to prevent spillage and leaching.
- **(c)** The wastes shall be transported by specially licensed carriers and disposed in a licensed facility.
- **(d)** Paints with toxic ingredients or solvents or lead-based paints will not be used.

---

(b) When possible the asbestos will be appropriately contained and sealed to minimize exposure

(c) The asbestos prior to removal (if removal is necessary) will be treated with a wetting agent to minimize asbestos dust

(d) Asbestos will be handled and disposed by skilled & experienced professionals

(e) If asbestos material is being stored temporarily, the wastes should be securely enclosed inside closed containments and marked appropriately. Security measures will be taken against unauthorized removal from the site.

(f) The removed asbestos will not be reused
| H Traffic and Pedestrian Safety | Direct or indirect hazards to public traffic and pedestrians by construction activities | (a) In compliance with national regulations the contractor will insure that the construction site is properly secured and construction related traffic regulated. This includes but is not limited to
- Signposting, warning signs, barriers and traffic diversions: site will be clearly visible and the public warned of all potential hazards
- Traffic management system and staff training, especially for site access and near-site heavy traffic. Provision of safe passages and crossings for pedestrians where construction traffic interferes.
- Adjustment of working hours to local traffic patterns, e.g. avoiding major transport activities during rush hours or times of livestock movement
- Active traffic management by trained and visible staff at the site, if required for safe and convenient passage for the public.
- Ensuring safe and continuous access to office facilities, shops and residences during renovation activities, if the buildings stay open for the public. |
### PART D: MONITORING PLAN

<table>
<thead>
<tr>
<th>Activity</th>
<th>What</th>
<th>Where</th>
<th>How</th>
<th>When</th>
<th>Why</th>
<th>Who</th>
</tr>
</thead>
</table>
| Transportation of construction materials and waste movement of construction machinery | Technical condition of vehicles and machinery  
Confinement and protection of truck loads with lining  
Respect of the established hours and routes of transportation | Construction site | Inspection | Unannounced inspections during work hours and beyond | Limit pollution of soil and air from emissions; Limit nuisance to local communities from noise and vibration; Minimize traffic disruption. | Elkana |
| Earthworks (small scale) | Temporary storage of excavated material in the pre-defined and agreed upon locations;  
Backfilling of the excavated material and/or its disposal to the formally designated locations;  
In case of chance finds immediate suspension of works, notification of the Ministry of Culture and Monument Protection, and resumption of works exclusively upon formal consent of the Ministry. | Construction site | Inspection | In the course of earth works | Prevent pollution of the construction site and its surroundings with construction waste; Prevent damage and loss of physical cultural resources | Elkana |
| Traffic disruption and limitation of pedestrian access | Storage of construction materials and temporary placement of construction waste in a way preventing congestion of access roads | At and around the construction site | Inspection | In the course of construction works | Prevent traffic accidents; | Elkana |
| Workers’ health and safety | Provision of uniforms and safety gear to workers; Ensuring use of the personal protective gear by workers; Informing of workers and personnel on the personal safety rules and instructions for operating machinery/equipment, and strict compliance with these rules/instructions | Construction site | Inspection | Unannounced inspections in the course of work | Limit occurrence of on-the-job accidents and emergencies | Elkana |

Attachment 8: Minutes of public consultation meeting

Date: November 28, 2017
Venue: Khoni Municipality, Khoni town and village Gordi
Donor: Biological Farming Association “Elkana”, through funding from the Japan Social Development Fund and the World Bank
Aim: Consult with the local community on the Draft Environment and Social Management Plan for the projects “Improvement of tourism infrastructure on the road of Khoni-Kinchkhhi” and “Arrangement of tourist information signs and picnic spots in Baghdati and Khoni municipalities”.

Elkana Project Manager, representatives of implementing NGOs Bright Future and Democracy House of Georgia, local authority and community members attended the meetings, held in Khoni town and village Gordi. In Khoni 11 persons participated in the meeting, including 10 women. In Gordi 12 persons attended the meeting, including nine women.

Elkana Project Manager presented planned project and activities, as well as the draft Environment Management Plans prepared to mitigate their possible negative impacts on the natural and social environment. After the presentation, meeting participants were given the floor for questions and comments. During the meeting, participants asked the following questions:

Question: In Khoni where will be the light-box be installed and what information will it contain?
Answer: The light-box will be installed in the town center as agreed with Gamgeoba and it will contain information about the short history and sightseeings of the municipality.

Question: Who will be responsible for waste management?
Answer: Both projects foresee installation of garbage receptacles. Khoni and Baghdadi municipalities will be responsible for waste management after completion of projects.

Community members were satisfied with the received information and supported implementation of the project.

მოხვორდა ართობები ძალიან გამოლინია.

გამოხვორდა ჩატარებით პრობლემები და ზოგიერთი საქმიანობა.

შეუძლიათ ხალხმა იქნებოდა, რომ გამოდიდნენ და გამოვიყენებოდნენ ნაბავი და შეგუმბავოდნენ პრობლემებს.

ვისცემთ ამოცანები და იარაღები, რომ შევქნენ საგზაო ადრეულობა.

ღამე მოხარხა.
