Reduction of the fragmentation of policy and institutions related to the management of coastal resources through (i) supporting the preparation and adoption of the Coastal Zone Master Plan, (ii) supporting the preparation and adoption of the Coastal Zone Framework Law, and related implementation decrees, (iii) the creation of a national commission for coastal zone protection and management (NCCZPM) that will help to harmonize sector policies and programs that affect coastal resources, and (iv) helping to create and/or strengthen communal councils (CCED) and the inter-communal council for eco-development (CIED) to coordinate economic development and the management of critical natural resources, including biodiversity hot spots in communal territories, and areas that span over several municipalities, and to oversee the implementation of the CBCA Management Plans.

2. Strengthening of the technical capacity of line ministries, coastal municipalities, the ABE, and local communities involved in coastal resource management and conservation, through workshops seminars, awareness raising, study tours, participation in regional conferences, and ‘learning-by-doing’, and short-term training sessions, which will focus on developing skills in: (i) integrated land use planning, (ii) conflict resolution in resource multiple-use systems, (iii) environmental impact assessment, and (iv) participatory monitoring and evaluation in sustainable natural resource management.

site-specific conservation managements plans (“CBCA Management Plans”), which will provide for small grants to be available for Sub-projects, (vii) the creation of site management units for each of the CBCAs (“CBCA Management Units”), through technical assistance, surveys and baseline studies, and (viii) support to the creation and reinforcement of the capacities of associations of CBCA users, representatives of local communities and local partners for the implementation of the CBCA Management Plans.

Component 3: Monitoring and Evaluation of Coastal and Marine Biodiversity

1. Development of a monitoring and information system for coastal and marine resources and ecosystems to guide local and national policy and decision-making processes, and to foster public awareness of conservation needs and social, economic and cultural benefits, through (a) the design of an integrated database for biodiversity monitoring and evaluation to be complementary and linked to the existing environmental information and monitoring system which is managed by ABE; and (b) the purchase and establishment of hardware and software necessary for the operation of the integrated database and the effective functioning of the biodiversity monitoring and evaluation system, and (c) technical assistance.

2. Provision of support for inventorying and monitoring activities of coastal biodiversity resources, through (i) planning of inventorying and monitoring activities, (ii) surveying, quantifying and mapping of resources, and (iii) collection of economic, social and environmental baseline data within the coastal zone in order to establish the baseline for monitoring the performance of the Project during implementation.
