# Introduction

*Doing Business 2010: Reforming Through Difficult Times* is the seventh in a series of annual reports investigating regulations that enhance business activity and those that constrain it. Doing Business presents quantitative indicators on business regulations and the protection of property rights that can be compared across 183 economies, from Afghanistan to Zimbabwe, over time.

A set of regulations affecting 10 stages of a business's life are measured: starting a business, dealing with construction permits, employing workers, registering property, getting credit, protecting investors, paying taxes, trading across borders, enforcing contracts and closing a business. Data in *Doing Business 2010: Reforming Through Difficult Times* are current as of June 1, 2009\*. The indicators are used to analyze economic outcomes and identify what reforms have worked, where, and why.

The Doing Business methodology has limitations. Other areas important to business such as an economy's proximity to large markets, the quality of its infrastructure services (other than those related to trading across borders), the security of property from theft and looting, the transparency of government procurement, macroeconomic conditions or the underlying strength of institutions, are not studied directly by Doing Business. To make the data comparable across economies, the indicators refer to a specific type of business, generally a local limited liability company operating in the largest business city. Because standard assumptions are used in the data collection, comparisons and benchmarks are valid across economies. The data not only highlight the extent of obstacles to doing business; they also help identify the source of those obstacles, supporting policymakers in designing reform.

The data set covers 183 economies: 46 in Sub-Saharan Africa, 32 in Latin America and The Caribbean, 27 in Eastern Europe and Central Asia, 24 in East Asia and Pacific, 19 in the Middle East and North Africa and 8 in South Asia, as well as 27 OECD high-income economies as benchmarks.

The following pages present the summary Doing Business indicators for Algeria. The data used for this country profile come from the Doing Business database and are summarized in graphs. These graphs allow a comparison of the economies in each region not only with one another but also with the "good practice" economy for each indicator. The good-practice economies are identified by their position in each indicator as well as their overall ranking and by their capacity to provide good examples of business regulation to other countries. These good-practice economies do not necessarily rank number 1 in the topic or indicator, but they are in the top 10.

More information is available in the full report. *Doing Business 2010: Reforming Through Difficult Times* presents the indicators, analyzes their relationship with economic outcomes and recommends reforms. The data, along with information on ordering the report, are available on the Doing Business website ([www.doingbusiness.org](http://www.doingbusiness.org)).

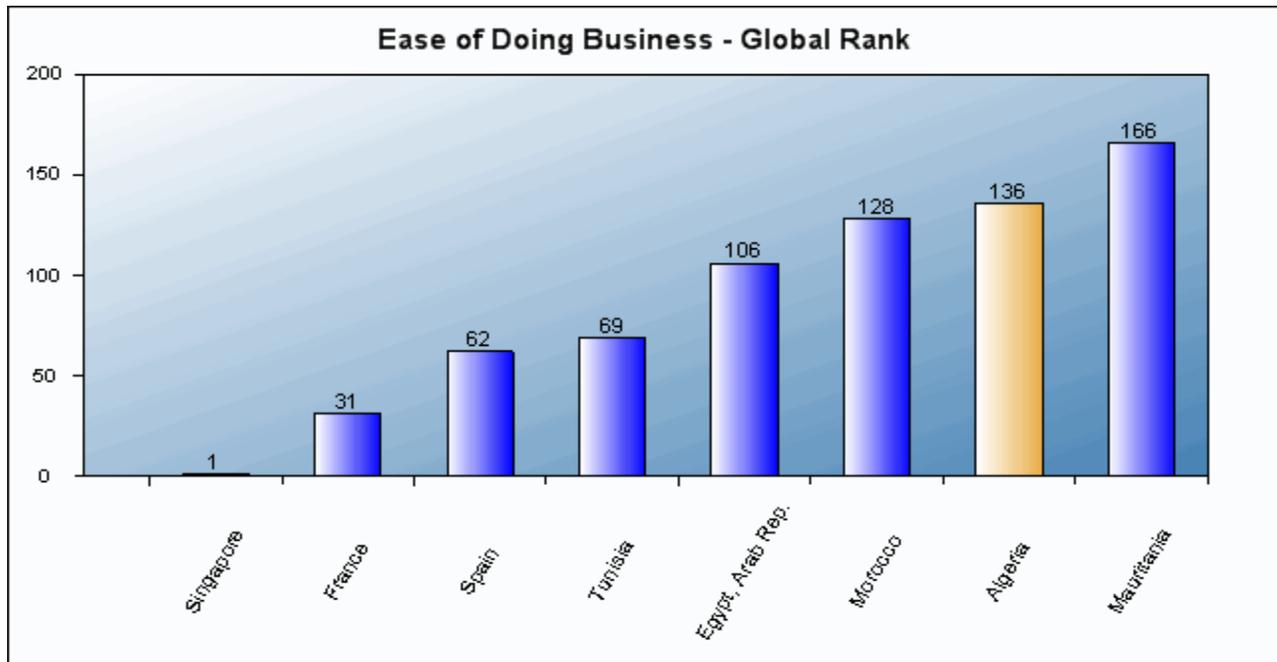

\* Except for the Paying Taxes indicator that refers to the period January to December of 2008.

*Note: Doing Business 2008 and Doing Business 2009 data and rankings have been recalculated to reflect changes to the methodology and the addition of new countries (in the case of the rankings).*

## Economy Rankings - Ease of Doing Business

Algeria is ranked 136 out of 183 economies. Singapore is the top ranked economy in the Ease of Doing Business.

### Algeria - Compared to global good practice economy as well as selected economies:

### Algeria's ranking in Doing Business 2010

Rank	Doing Business 2010

	Time (days)	630
	Cost (% of claim)	21.9
<b>Closing a Business</b>	Recovery rate (cents on the dollar)	41.7
	Time (years)	2.5
	Cost (% of estate)	7

# Starting a Business

When entrepreneurs draw up a business plan and try to get under way, the first hurdles they face are the procedures required to incorporate and register the new firm before they can legally operate. Economies differ greatly in how they regulate the entry of new businesses. In some the process is straightforward and affordable. In others the procedures are so burdensome that entrepreneurs may have to bribe officials to speed up the process or may decide to run their businesses informally.

Analysis shows that burdensome entry regulations do not increase the quality of products, make work safer or reduce pollution. Instead, they constrain private investment; push more people into the informal economy; increase consumer prices and fuel corruption.

## Methodology

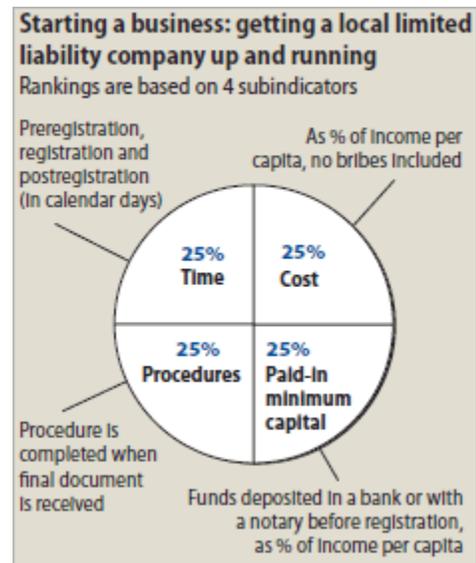

The data on starting a business is based on a survey and research investigating the procedures that a standard small to medium-size company needs to complete to start operations legally. This includes obtaining all necessary permits and licenses and completing all required inscriptions, verifications and notifications with authorities to enable the company to formally operate. Procedures are recorded only where interaction is required with an external party. It is assumed that the founders complete all procedures themselves unless professional services (such as by a notary or lawyer) are required by law. Voluntary procedures are not counted, nor are industry-specific requirements and utility hook-ups. Lawful shortcuts are counted.

It is assumed that all information is readily available to the entrepreneur, that there has been no prior contact with officials and that all government and nongovernment entities involved in the process function without corruption.

## Survey Case Study

*The business:*

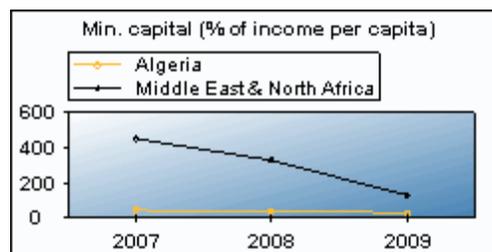

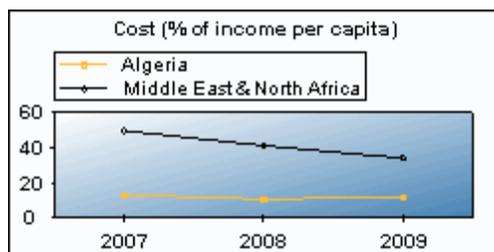

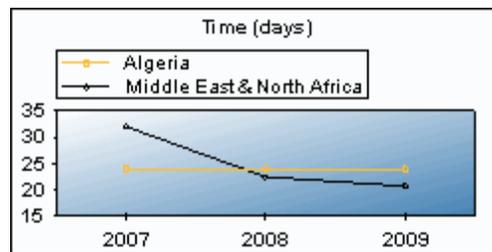

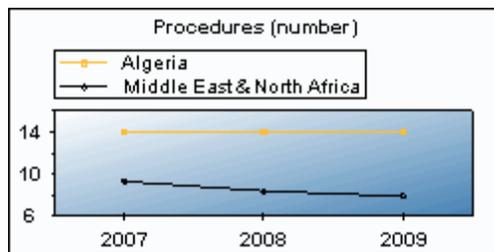

- is a limited liability company conducting general commercial activities
- is located in the largest business city
- is 100% domestically owned
- has a start-up capital of 10 times income per capita
- has a turnover of at least 100 times income per capita
- has between 10 and 50 employees
- does not qualify for any special benefits
- does not own real estate

## 1. Historical data: Starting a Business in Algeria

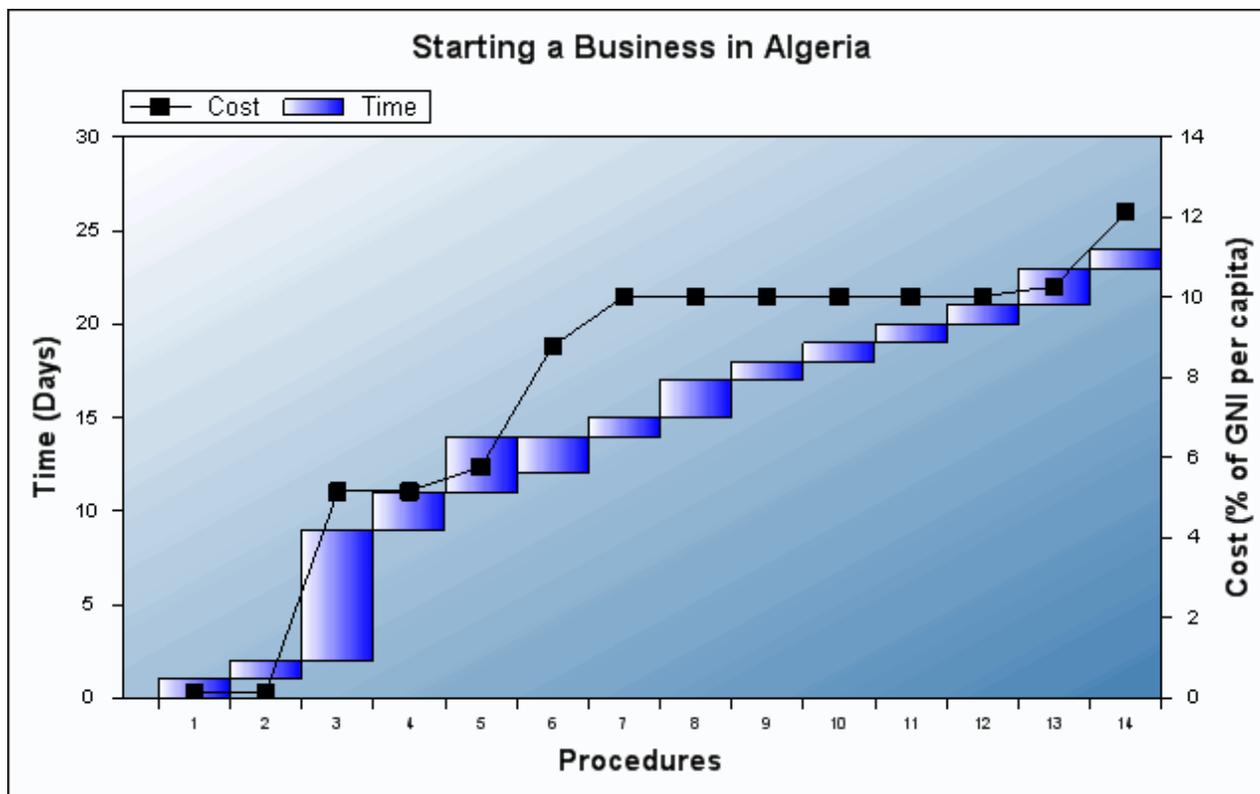

Starting a Business data	Doing Business 2008	Doing Business 2009	Doing Business 2010
Rank	..	141	148
Procedures (number)	14	14	14
Time (days)	24	24	24
Cost (% of income per capita)	13.2	10.8	12.1
Min. capital (% of income per capita)	45.2	36.6	31.0

## 2. The following graphs illustrates the Starting a Business indicators in Algeria over the past 3 years:

### 3. Steps to Starting a Business in Algeria

It requires 14 procedures, takes 24 days, and costs 12.13 % GNI per capita to start a business in Algeria.

#### List of Procedures:

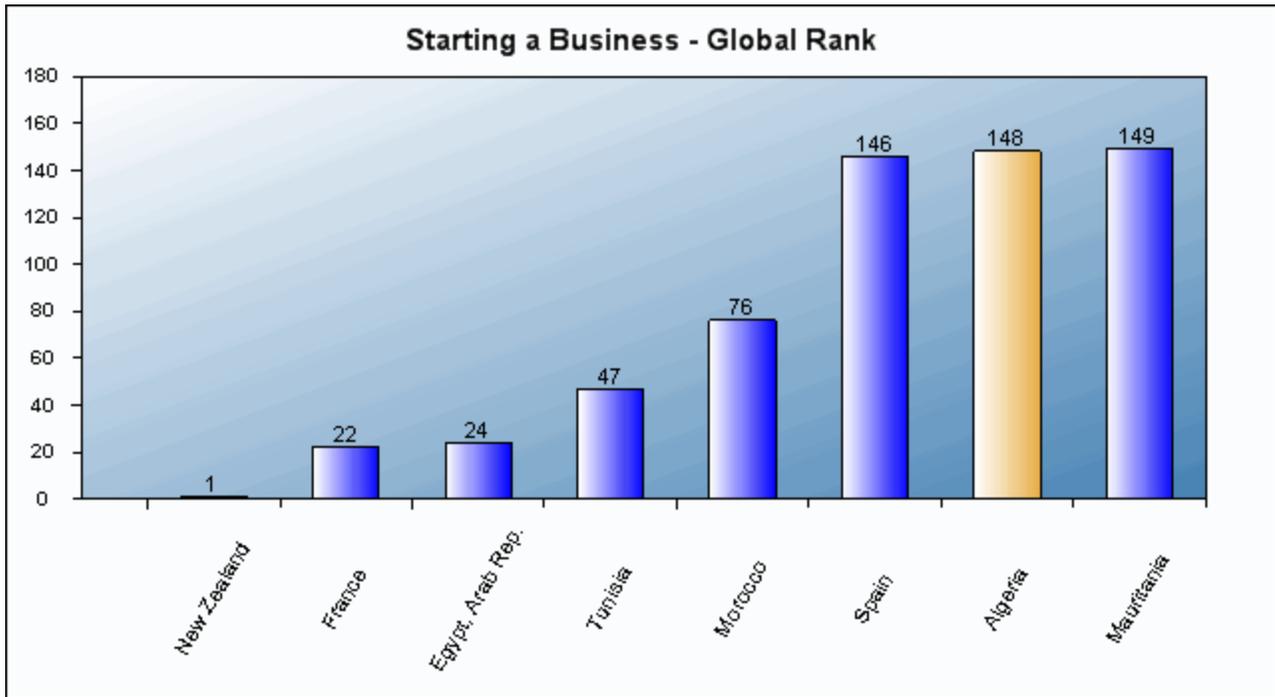

1. Obtain an attestation on the uniqueness of selected company name from the Centre National du Registre du Commerce (CNRC); pick up registration forms
2. Deposit the start-up capital with the notary public
3. Draw up and notarize the company constitution documents, submit specimen of managers' signatures, and prepare and submit the lease for the registered office of the company
4. Obtain the criminal record and birth certificate of manager
5. Publish the company constitution on the legal journal (B.O.A.L.) and a nationally circulated newspaper
6. File for company registration with the commercial registry within two months of the formation of the company
7. Pay for the stamp duty and obtain a receipt
8. Register for income tax (Impôt sur le revenu global des personnes physiques, IRG), corporate tax (Impôt sur les bénéfices des personnes morales ou des sociétés, IBS), and VAT with the local tax inspectorate
9. Register for the Caisse Nationale des Assurances Sociales des Travailleurs Salariés (CNAS)
10. Open the company's bank account with a commercial bank
11. Register for the Caisse Nationale de Sécurité Sociale des Non Salariés (CASNOS)
12. Register with the Unemployment Insurance Fund (CNAC)
13. Make a company seal
14. Have company's accounting books stamped at the court

More detail is included in the appendix.

#### 4. Benchmarking Starting a Business Regulations:

Algeria is ranked 148 overall for Starting a Business.

Ranking of Algeria in Starting a Business - Compared to good practice and selected economies:

The following table shows Starting a Business data for Algeria compared to good practice and comparator economies:

<b>Good Practice Economies</b>	<b>Procedures (number)</b>	<b>Time (days)</b>	<b>Cost (% of income per capita)</b>	<b>Min. capital (% of income per capita)</b>
<b>Denmark*</b>			0.0	
<b>New Zealand*</b>	1	1		0.0

**Procedures (number): Canada**

**Cost (% of income per capita): Slovenia**

# Dealing with Construction Permits

Once entrepreneurs have registered a business, what regulations do they face in operating it? To measure such regulation, Doing Business focuses on the construction sector. Construction companies are under constant pressure from government to comply with inspections, with licensing and safety regulations, from customers to be quick and cost-effective. These conflicting pressures point to the tradeoff in building regulation; the tradeoff between protecting people (construction workers, tenants, passersby) and keeping the cost of building affordable.

In many economies, especially poor ones, complying with building regulations is so costly in time and money that many builders opt out. Builders may pay bribes to pass inspections or simply build illegally, leading to hazardous construction. Where the regulatory burden is large, entrepreneurs may tend to move their activity into the informal economy. There they operate with less concern for safety, leaving everyone worse off. In other economies compliance is simple, straightforward and inexpensive, yielding better results.

## Methodology

The indicators on dealing with construction permits record all procedures officially required for an entrepreneur in the construction industry to build a warehouse. These include submitting project documents (building plans, site maps) to the authorities, obtaining all necessary licenses and permits, completing all required notifications and receiving all necessary inspections. They also include procedures for obtaining utility connections, such as electricity, telephone, water and sewerage. The time and cost to complete each procedure under normal circumstances are calculated. All official fees associated with legally completing the procedures are included. Time is recorded in calendar days. The survey assumes that the entrepreneur is aware of all existing regulations and does not use an intermediary to complete the procedures unless required to do so by law.

## Survey Case Study

### The business:

- is a small to medium-size limited liability company
- is located in the largest business city
- is domestically owned and operated, in the construction business
- has 20 qualified employees

### The warehouse to be built:

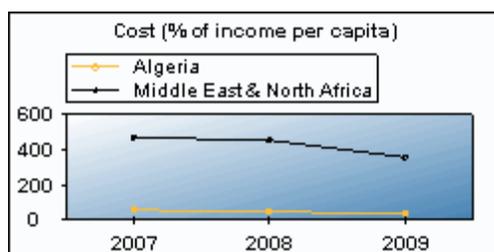

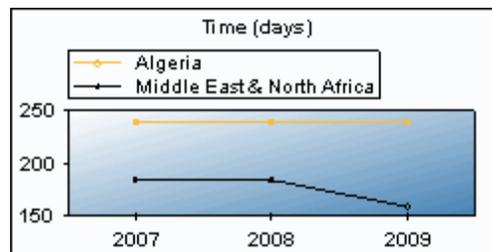

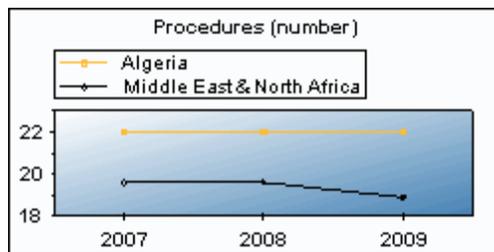

- is a new construction (there was no previous construction on the land)
- has complete architectural and technical plans prepared by a licensed architect
- will be connected to electricity, water, sewerage (sewage system, septic tank or their equivalent) and one land phone line. The connection to each utility network will be 32 feet, 10 inches (10 meters) long.
- will be used for general storage, such as of books or stationery. The warehouse will not be used for any goods requiring special conditions, such as food, chemicals or pharmaceuticals.
- will take 30 weeks to construct (excluding all delays due to administrative and regulatory requirements).

## 1. Historical data: Dealing with Construction Permits in Algeria

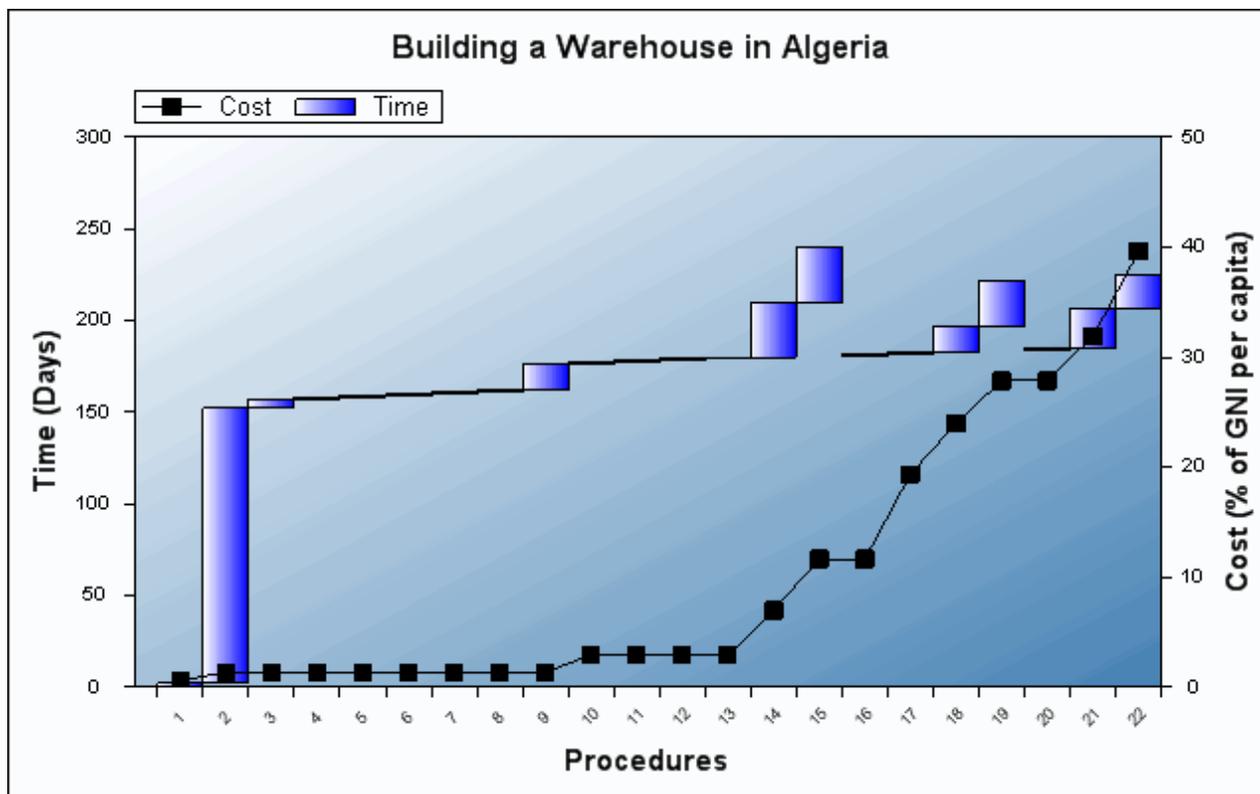

Dealing with Construction Permits data	Doing Business 2008	Doing Business 2009	Doing Business 2010
Rank	..	113	110
Procedures (number)	22	22	22
Time (days)	240	240	240
Cost (% of income per capita)	57.8	46.8	39.6

2. The following graphs illustrates the Dealing with Construction Permits indicators in Algeria over the past 3 years:

### 3. Steps to Building a Warehouse in Algeria

It requires 22 procedures, takes 240 days, and costs 39.62 % GNI per capita to build a warehouse in Algeria.

#### List of Procedures:

- |   |   |
|---|---|
| 1. Legalize property act  | 12. Register the updated property act (title) at the property registry                  |
| 2. Obtain building permit   | 13. Apply for telephone line  |
| 3. Receive municipal inspection   | 14. Ministry of Posts and Telecommunications inspects the site and prepares an estimate |
| 4. Receive municipal inspection   | 15. Obtain telephone connection   |
| 5. Receive municipal inspection   | 16. Notify municipal/ communal authority of connection to sewer mains                   |
| 6. Receive municipal inspection   | 17. Apply for electricity connection  |
| 7. Receive municipal inspection   | 18. Electricity company inspects the site and prepares an estimate                      |
| 8. Receive municipal inspection   | 19. Obtain electricity connection   |
| 9. Request and receive final inspection to obtain certificate of conformity | 20. Apply for water connection  |
| 10. Obtain certificate of conformity  | 21. The water company inspects the site and prepares an estimate                        |
| 11. Notarize the updated property act                                       |   |

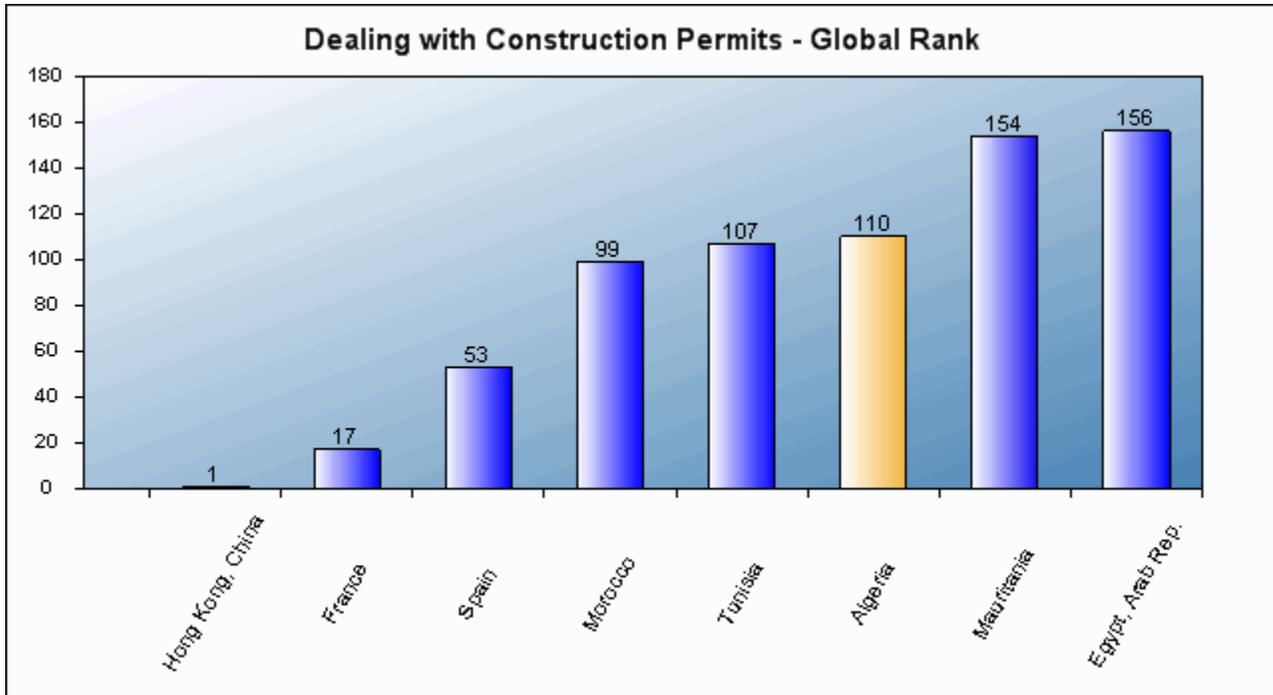

22. Obtain water connection

More detail is included in the appendix.

#### 4. Benchmarking Dealing with Construction Permits Regulations:

Algeria is ranked 110 overall for Dealing with Construction Permits.

Ranking of Algeria in Dealing with Construction Permits - Compared to good practice and selected economies:

<b>Tunisia</b>	20	84	998.3

# Employing Workers

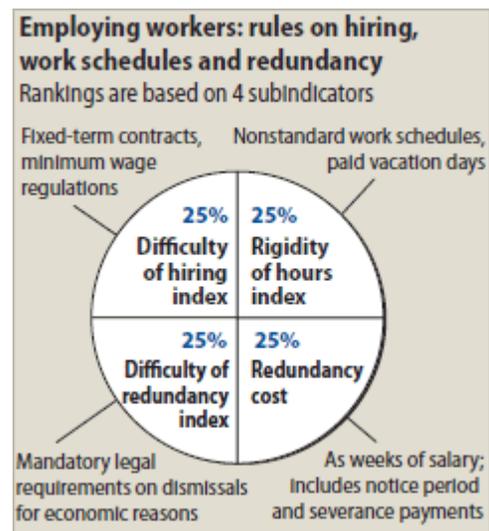

Economies worldwide have established a system of laws and institutions intended to protect workers and guarantee a minimum standard of living for its population. This system generally encompasses four bodies of law: employment, industrial relations, social security and occupational health and safety laws.

Employment regulations are needed to allow efficient contracting between employers and workers and to protect workers from discriminatory or unfair treatment by employers. Doing Business measures flexibility in the regulation of hiring, working hours and dismissal in a manner consistent with the conventions of the International Labour Organization (ILO). An economy can have the most flexible labor regulations as measured by Doing Business while ratifying and complying with all conventions directly relevant to the factors measured by Doing Business and with the ILO core labor standards. No economy can achieve a better score by failing to comply with these conventions.

Governments all over the world face the challenge of finding the right balance between worker protection and labor market flexibility. But in developing countries especially, regulators often err to one extreme, pushing employers and workers into the informal sector. Analysis across economies shows that while employment regulation generally increases the tenure and wages of incumbent workers, overly rigid regulations may have undesirable side effects. These include less job creation, smaller company size, less investment in research and development, and longer spells of unemployment and thus the obsolescence of skills, all of which may reduce productivity growth.

## Methodology

Two measures are presented: a rigidity of employment index and a redundancy cost measure. The rigidity of employment index is the average of three sub-indices: difficulty of hiring, rigidity of hours and difficulty of redundancy. Each index takes values between 0 and 100, with higher values indicating more rigid regulation. The difficulty of hiring index measures the flexibility of contracts and the ratio of the minimum wage to the value added per worker. The rigidity of hours index covers restrictions on weekend and night work, requirements relating to working time and the workweek taking into account legal provisions that refer specifically to small to medium-size companies in the manufacturing industry in which continuous operation is economically necessary, as well as mandated days of annual leave with pay. The difficulty of redundancy index covers workers' legal protections against dismissal, including the grounds permitted for dismissal and procedures for dismissal (individual and collective): notification and approval requirements, retraining or reassignment obligations and priority rules for dismissals and reemployment.

The Redundancy cost indicator measures the cost of advance notice requirements, severance payments and penalties due when terminating a redundant worker, expressed in weeks of salary.

## Survey Case Study

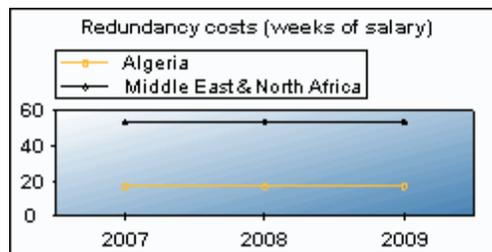

*The business:*

- is a limited liability company operating in the manufacturing sector
- is located in the largest business city
- is 100% domestically owned
- has 60 employees
- The company is also assumed to be subject to collective bargaining agreements in economies where such agreements cover more than half the manufacturing sector and apply even to firms not party to them.

## 1. Historical data: Employing Workers in Algeria

Employing Workers data	Doing Business 2008	Doing Business 2009	Doing Business 2010
Rank	..	117	122
Redundancy costs (weeks of salary)	17	17	17
Rigidity of employment index (0-100)	41	41	41

2. The following graphs illustrates the Employing Workers indicators in Algeria over the past 3 years:

### 3. Benchmarking Employing Workers Regulations:

Algeria is ranked 122 overall for Employing Workers.

Ranking of Algeria in Employing Workers - Compared to good practice and selected economies:

The following table shows Employing Workers data for Algeria compared to good practice and comparator economies:

<b>Good Practice Economies</b>	<b>Rigidity of employment index (0-100)</b>	<b>Redundancy costs (weeks of salary)</b>
<b>Hong Kong, China*</b>	0	
<b>New Zealand*</b>		0

<i>Selected Economy</i>		
<b>Algeria</b>	41	17

<i>Comparator Economies</i>		
<b>Egypt, Arab Rep.</b>	27	132
<b>France</b>	52	32
<b>Mauritania</b>	39	31
<b>Morocco</b>	60	85
<b>Spain</b>	49	56
<b>Tunisia</b>	40	17

\* The following economies are also good practice economies for :

**Rigidity of employment index (0-100):** Australia, Brunei Darussalam, Kuwait, Marshall Islands, Singapore, St. Lucia, Uganda, United States

**Redundancy costs (weeks of salary):** Denmark, Iraq, Marshall Islands, Micronesia, Fed. Sts., Palau, Puerto Rico, Tonga, United States

# Registering Property

Formal property titles help promote the transfer of land, encourage investment and give entrepreneurs access to formal credit markets. But a large share of property in developing economies is not formally registered. Informal titles cannot be used as security in obtaining loans, which limits financing opportunities for businesses. Many governments have recognized this and started extensive property titling programs. But bringing assets into the formal sector is only part of the story. The more difficult and costly it is to formally transfer property, the greater the chances that formalized titles will quickly become informal again. Eliminating unnecessary obstacles to registering and transferring property is therefore important for economic development.

Efficient property registration reduces transaction costs and helps to formalize property titles. Simple procedures to register property are also associated with greater perceived security of property rights and less corruption. That benefits all entrepreneurs, especially women, the young and the poor. The rich have few problems protecting their property rights. They can afford to invest in security systems and other measures to defend their property. But small entrepreneurs cannot. Reform can change this.

## Methodology

Doing Business records the full sequence of procedures necessary for a business (buyer) to purchase a property from another business (seller) and to transfer the property title to the buyer's name. The property of land and building will be transferred in its entirety. The transaction is considered complete when the buyer can use the property as collateral for a bank loan.

Local property lawyers and officials in property registries provide information on required procedures as well as the time and cost to complete each one. For most economies the data are based on responses from both. Based on the responses, three indicators are constructed:

- number of procedures to register property
- time to register property (in calendar days)
- official costs to register property (as a percentage of the property value)

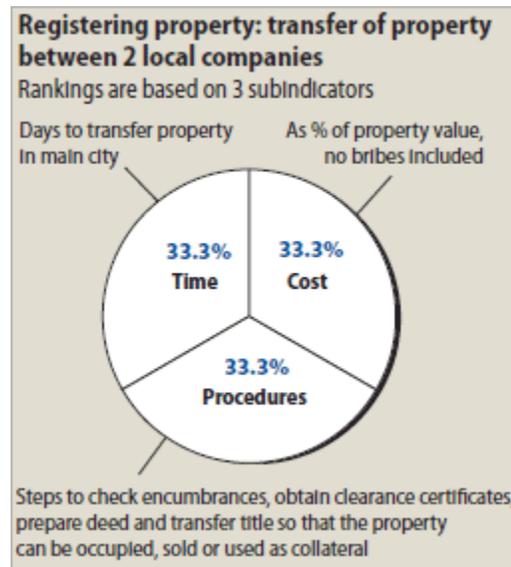

## Survey Case Study

*The buyer and seller:*

- are limited liability companies
- are private nationals (no foreign ownership)
- are located in periurban area of the largest business city
- conduct general commercial activities

*The property:*

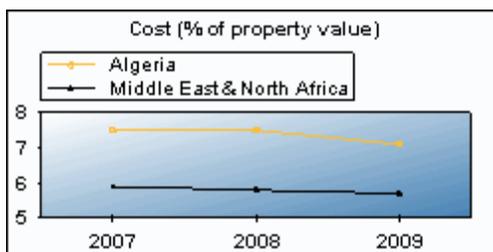

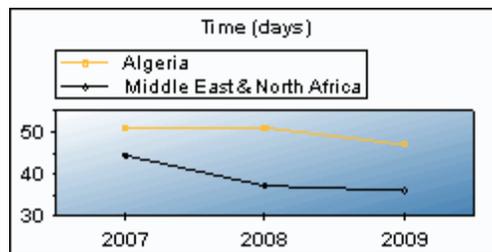

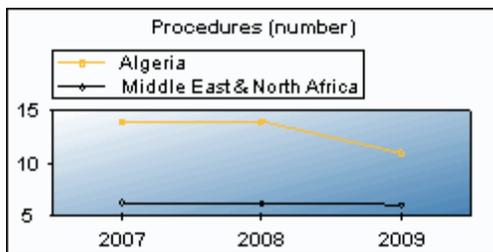

- consists of land and a 2-story building (warehouse)
- is located in the periurban commercial zone of the largest business city
- The land area is 557.4 m<sup>2</sup> (6,000 square feet).
- The warehouse has a total area of 929 m<sup>2</sup> (10,000 square feet).
- has a value equal to 50 times income per capita
- The seller company owned the property for the last 10 years.
- is registered in the land registry and/or cadastre and is free of all disputes.

## 1. Historical data: Registering Property in Algeria

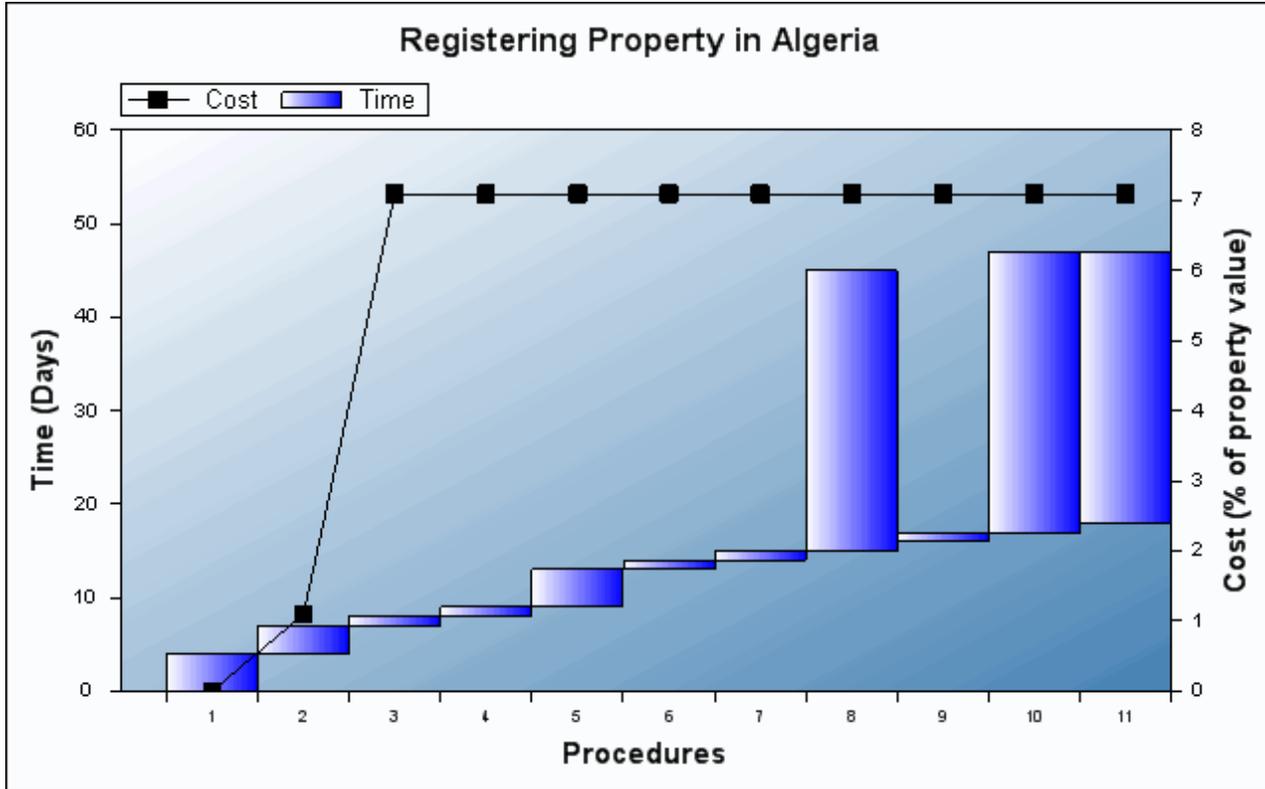

Registering Property data	Doing Business 2008	Doing Business 2009	Doing Business 2010
Rank	..	166	160
Procedures (number)	14	14	11
Time (days)	51	51	47
Cost (% of property value)	7.5	7.5	7.1

2. The following graphs illustrates the Registering Property indicators in Algeria over the past 3 years:

### 3. Steps to Registering Property in Algeria

It requires 11 procedures, takes 47 days, and costs 7.09 % of property value to register the property in Algeria.

#### List of Procedures:

1. Obtain the original deed of the property and a certificate of encumbrances from the Land Registry (Conservation Foncière)
2. Parties file the unsigned contract with the relevant documents at the notary
3. The seller pays registration and publication fees into notary's account at the Public Revenue Office (Trésor Public)
4. Parties sign the contract at the public notary
5. The original deed and documents are filed by the notary at the Registry of Deeds (Service de l'Enregistrement et du Timbre)
6. The notary provides a tax declaration to be deposited at the local tax office
7. File tax declaration and proof of payment at the local tax office (Sous Direction du Recouvrement des Impôts)
8. Notary returns deposit to seller
9. The notary pays registration fees to the local tax authorities (Recette des Impôts)
10. The notary issues payment for publication fee to the Local Land Registry (Conservation Foncière) for publication and issuance of the new deed
11. The notary issues a copy of the deed to each party

More detail is included in the appendix.

#### 4. Benchmarking Registering Property Regulations:

Algeria is ranked 160 overall for Registering Property.

Ranking of Algeria in Registering Property - Compared to good practice and selected economies:

The following table shows Registering Property data for Algeria compared to good practice and comparator economies:

<b>Good Practice Economies</b>	<b>Procedures (number)</b>	<b>Time (days)</b>	<b>Cost (% of property value)</b>
<b>New Zealand*</b>		2	
<b>Norway*</b>	1		
<b>Saudi Arabia</b>			0.0

<b>France</b>	8	98	6.1
<b>Mauritania</b>	4	49	5.2
<b>Morocco</b>	8	47	4.9
<b>Spain</b>	4	18	7.2
<b>Tunisia</b>	4	39	6.1

\* The following economies are also good practice economies for :

**Procedures (number): United Arab Emirates**

**Time (days): Saudi Arabia, Thailand, United Arab Emirates**

# Getting Credit

Firms consistently rate access to credit as among the greatest barriers to their operation and growth. Doing Business constructs two sets of indicators of how well credit markets function: one on credit registries and the other on legal rights of borrowers and lenders. Credit registries, institutions that collect and distribute credit information on borrowers, can greatly expand access to credit. By sharing credit information, they help lenders assess risk and allocate credit more efficiently. They also free entrepreneurs from having to rely on personal connections alone when trying to obtain credit.

## Methodology

Credit information: three indicators are constructed

- depth of credit information index, which measures the extent to which the rules of a credit information system facilitate lending based on the scope of information distributed, the ease of access to information and the quality of information
- public registry coverage, which reports the number of individuals and firms covered by a public credit registry as a percentage of the adult population
- private bureau coverage, which reports the number of individuals and firms, covered by a private credit bureau as a percentage of the adult population

Legal Rights: the strength of legal rights index measures the degree to which collateral and bankruptcy laws protect the rights of borrowers and lenders. Ten points are analyzed:

- Can a business use movable assets as collateral while keeping possession of the assets, and can any financial institution accept such assets as collateral?
- Does the law allow a business to grant a non-possessory security right in a single category of revolving movable assets, without requiring a specific description of the secured assets?
- Does the law allow a business to grant a non-possessory security right in substantially all of its assets, without requiring a specific description of the secured assets?
- Can a security right extend to future or after-acquired assets and extend automatically to the products, proceeds or replacements of the original assets?
- Is general description of debts and obligations permitted in collateral agreements and in registration documents, so that all types of obligations and debts can be secured by stating a maximum rather than a specific amount between the parties?
- Is a collateral registry in operation that is unified geographically and by asset type as well as being indexed by the name of the grantor of a security right?
- Are secured creditors paid first when a debtor defaults outside an insolvency procedure or when a business is liquidated?
- Are secured creditors subject to an automatic stay or moratorium on enforcement procedures when a debtor enters a court-supervised reorganization procedure?
- Are parties allowed to agree in a collateral agreement that the lender may enforce its security right out of court?

## Legal Rights Survey Case Study

*The Debtor:*

- is a Private Limited Liability Company
- has its headquarters and only base of operations in the largest business city
- obtains a loan from a local bank (the Creditor) for an amount up to 10 times income (GNI) per capita
- Both debtor and creditor are 100% domestically owned.

## Getting credit: collateral rules and credit information

# Protecting Investors

Companies grow by raising capital, either through a bank loan or by attracting equity investors. Selling shares allows companies to expand without the need to provide collateral and repay bank loans. However, investors worry about their money, and look for laws that protect them. A study finds that the presence of legal and regulatory protections for investors explains up to 73% of the decision to invest. In contrast, company characteristics explain only between 4% and 22%\*. Good protections for minority shareholders are associated with larger and more active stock markets. Thus both governments and businesses have an interest in reforms strengthening investor protections.

## Methodology

To document some of the protections investors have, Doing Business measures how economies regulate a standard case of self-dealing, use of corporate assets for personal gain. Three indices of investor protection are constructed based on the answers to these and other questions. All indices range from 0 to 10, with higher values indicating more protections or greater disclosure. The three indices are:

- The extent of disclosure index covers approval procedures, requirements for immediate disclosure to the public and shareholders of proposed transactions, requirements for disclosure in periodic filings and reports and the availability of external review of transactions before they take place.
- The extent of director liability index covers the ability of investors to hold Mr. James and the board of directors liable for damages, the ability to rescind the transaction, the availability of fines and jail time associated with self-dealing, the availability of direct or derivative suits and the ability to require Mr. James to pay back his personal profits from the transaction.
- The ease of shareholder suits index covers the availability of documents that can be used during trial, the ability of the investor to examine the defendant and other witnesses, shareholders' access to internal documents of the company, the appointment of an inspector to investigate the transaction and the standard of proof applicable to a civil suit against the directors.

These three indices are averaged to create the strength of investor protection index.

## Survey case study

Mr. James, a director and the majority shareholder of a public company, proposes that the company purchase used trucks from another company he owns. The price is higher than the going price for used trucks. The transaction goes forward. All required approvals are obtained, and all required disclosures made, though the transaction is prejudicial to the purchasing company. Shareholders sue the interested parties and the members of the board of directors.

Several questions arise:

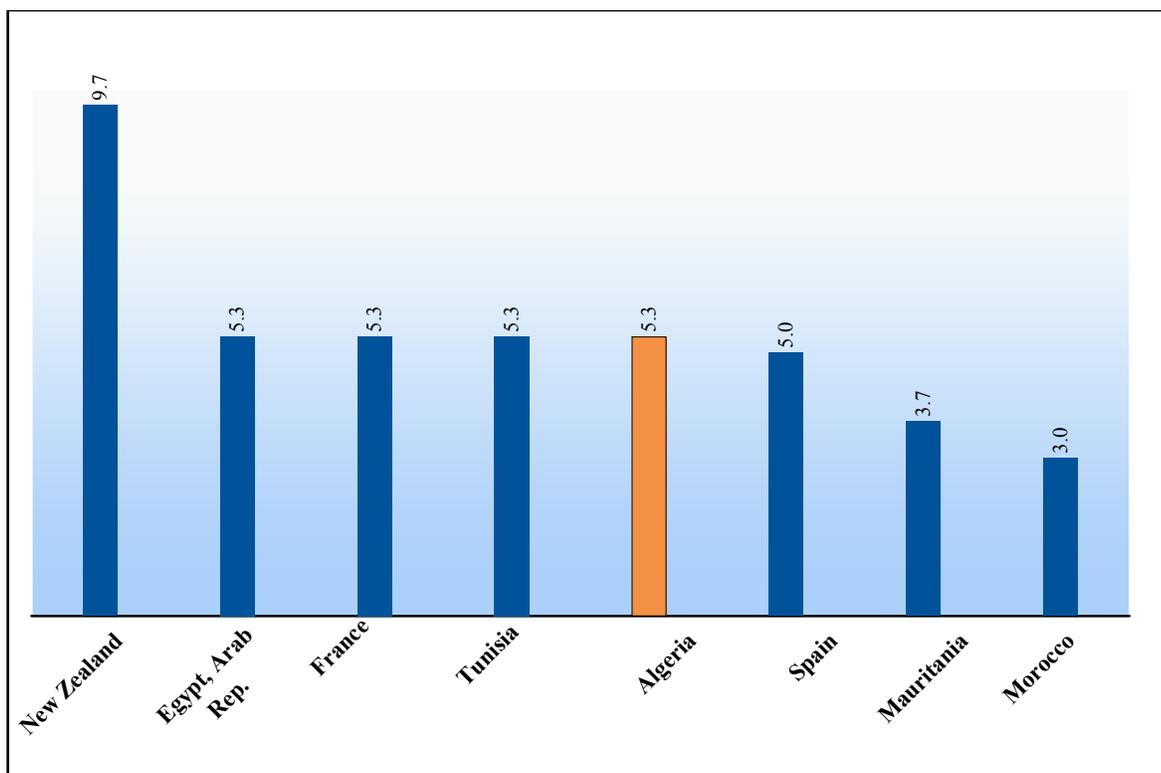

- Who approves the transaction?
- What information must be disclosed?
- What company documents can investors access?
- What do minority shareholders have to prove to get the transaction stopped or to receive compensation from Mr. James?

# Paying Taxes

Taxes are essential. Without them there would be no money to provide public amenities, infrastructure and services which are crucial for a properly functioning economy. But particularly for small and medium size companies, they may opt out and choose to operate in the informal sector. One way to enhance tax compliance is to ease and simplify the process of paying taxes for such businesses.

## Methodology

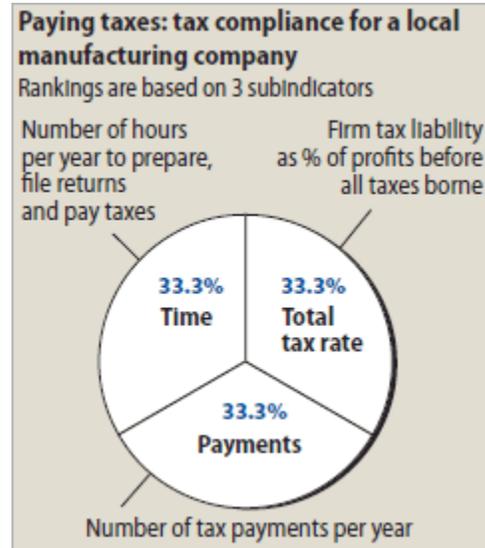

The Doing Business tax survey records the effective tax that a small and medium company must pay and the administrative costs of doing so.

Three indicators are constructed:

- number of tax payments, which takes in to account the method of payment, the frequency of payments and the number of agencies involved in our standardized case study.
- time, which measures the number of hours per year necessary to prepare and file tax returns and to pay the corporate income tax, value added tax, sales tax or goods and service tax and labor taxes and mandatory contributions.
- total tax rate, which measures the amount of taxes and mandatory contributions payable by the company during the second year of operation. This amount, expressed as a percentage of commercial profit, is the sum of all the different taxes payable after accounting for various deductions and exemptions.

## Survey case study

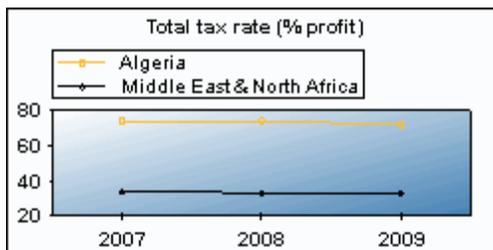

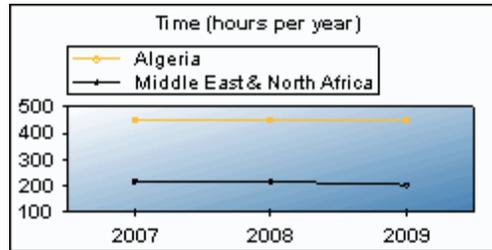

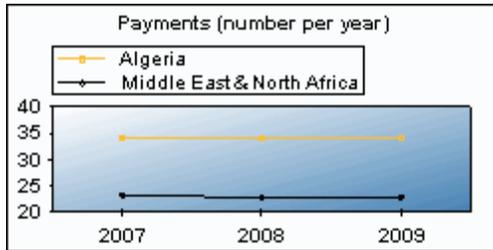

- TaxpayerCo is a medium-size business that started operations last year. Doing Business asks tax practitioners in 183 economies to review TaxpayerCo's financial statements and a standard list of transactions that the company completed during the year. Respondents are asked how much in taxes and mandatory contributions the business must pay and what the process is for doing so.
- The business starts from the same financial position in each economy. All the taxes and mandatory contributions paid during the second year of operation are recorded.
- Taxes and mandatory contributions are measured at all levels of government and include corporate income tax, turnover tax, all labor taxes and contributions paid by the company (including mandatory contributions paid to private pension or insurance funds), property tax, property transfer tax, dividend tax, capital gains tax, financial transactions tax, vehicle tax, sales tax and other small taxes (such as fuel tax, stamp duty and local taxes). A range of standard deductions and exemptions are also recorded.

## 1. Historical data: Paying Taxes in Algeria

# Trading Across Borders

The benefits of trade are well documented; as are the obstacles to trade. Tariffs, quotas and distance from large markets greatly increase the cost of goods or prevent trading altogether. But with bigger ships and faster planes, the world is shrinking. Global and regional trade agreements have reduced trade barriers. Yet Africa's share of global trade is smaller today than it was 25 years ago. So is the Middle East's, excluding oil exports. Many entrepreneurs face numerous hurdles to exporting or importing goods, including delays at the border. They often give up. Others never try. In fact, the potential gains from trade facilitation may be greater than those arising from only tariff reductions.

## Methodology

Doing Business compiles procedural requirements for trading a standard shipment of goods by ocean transport. Every procedure and the associated documents, time and cost, for importing and exporting the goods is recorded, starting with the contractual agreement between the two parties and ending with delivery of the goods. For importing the goods, the procedures measured range from the vessel's arrival at the port of entry to the shipment's delivery at the importer's warehouse. For exporting the goods, the procedures measured range from the packing of the goods at the factory to their departure from the port of exit. Payment is by letter of credit and the time and cost for issuing or securing a letter of credit is taken into account.

Documents recorded include port filing documents, customs declaration and clearance documents, as well as official documents exchanged between the parties to the transaction. Time is recorded in calendar days, from the beginning to the end of each procedure. Cost includes the fees levied on a 20-foot container in U.S. dollars.

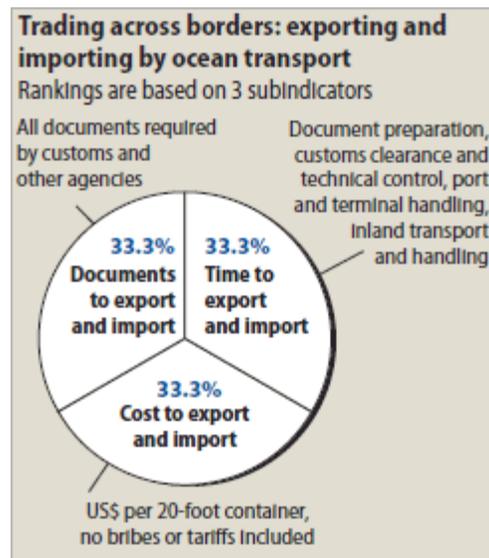

All the fees associated with completing the procedures to export or import the goods are included, such as costs for documents, administrative fees for customs clearance and technical control, terminal handling charges and inland transport. The cost measure does not include tariffs or duties.

Economies that have efficient customs, good transport networks and fewer document requirements, making compliance with export and import procedures faster and cheaper, are more competitive globally. That can lead to more exports; and exports are associated with faster growth and more jobs. Conversely, a need to file many documents is associated with more corruption in customs. Faced with long delays and frequent demands for bribes, many traders may avoid customs altogether. Instead, they smuggle goods across the border. This defeats the very purpose in having border control of trade to levy taxes and ensure high quality of goods.

## Survey case study

To make the data comparable across countries, several assumptions about the business and the traded goods are used:

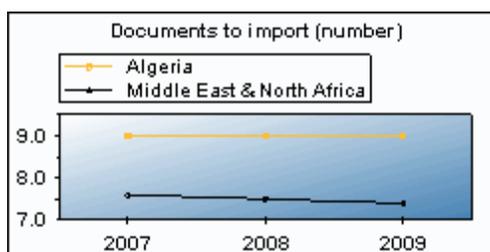

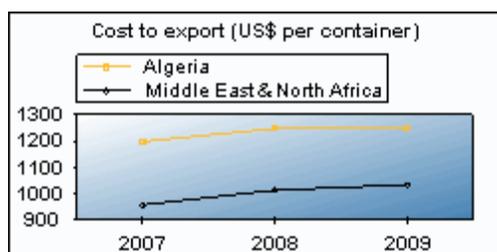

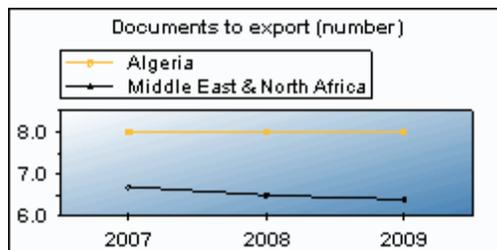

- The business is of medium size.
- The business employs 60 people.
- The business is located in the peri-urban area of the economy's largest business city.
- The business is a private, limited liability company, domestically owned, formally registered and operating under commercial laws and regulations of the economy.
- The traded goods are ordinary, legally manufactured products transported in a dry-cargo, 20-foot FCL (full container load) container.

# Enforcing Contracts

Where contract enforcement is efficient, businesses are more likely to engage with new borrowers or customers. Doing Business tracks the efficiency of the judicial system in resolving a commercial dispute, following the step-by-step evolution of a commercial sale dispute before local courts. The data is collected through study of the codes of civil procedure and other court regulations as well as through surveys completed by local litigation lawyers (and, in a quarter of the countries, by judges as well).

Justice delayed is often justice denied. And in many economies only the rich can afford to go to court. For the rest, justice is out of reach. In the absence of efficient courts, firms undertake fewer investments or business transactions. And they prefer to involve only a small group of people who know each other from previous dealings.

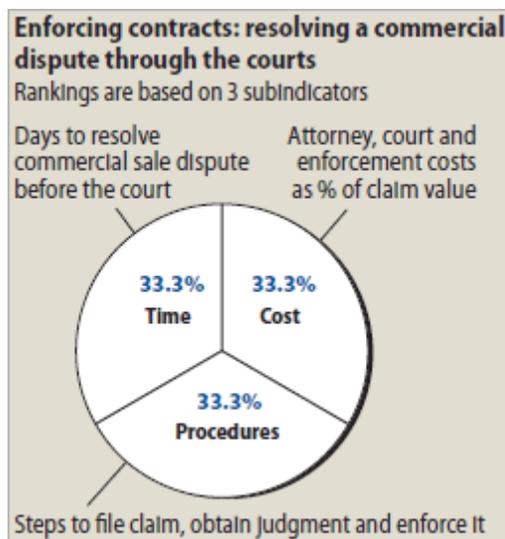

## Methodology

Rankings on enforcing contracts are based on 3 sub-indicators:

- number of procedures, which are defined as any interaction between the parties or between them and the judge or court officer. This includes steps to file the case, steps for trial and judgment and steps necessary to enforce the judgment.
- time, which counts the number of calendar days from the moment the Seller files the lawsuit in court until payment is received. This includes both the days on which actions take place and the waiting periods in between.
- cost, which is recorded as a percentage of the claim (assumed to be equivalent to 200% of income per capita). Three types of costs are recorded: court costs (including expert fees), enforcement costs (including costs for a public sale of Buyer's assets) and attorney fees.

## Survey case Study

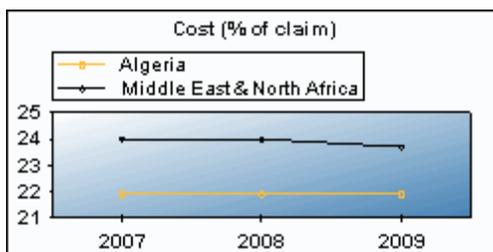

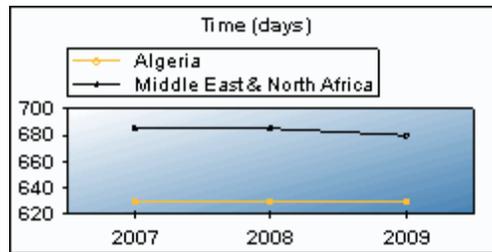

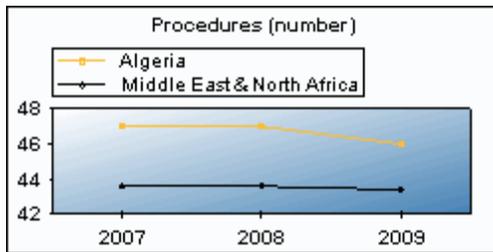

- The dispute concerns a contract for the sale of goods between two businesses (the Seller and the Buyer).
- Both are located in the economy's largest business city.
- The Seller sells and delivers goods, worth 200% of the economy's income per capita, to the Buyer. The Buyer refuses to pay on the grounds that they were not of adequate quality.
- The Seller sues the Buyer to recover the amount under the sales agreement (200% of the economy's income per capita).
- The claim is filed before a court in the economy's largest business city with jurisdiction over commercial cases worth 200% of the income per capita and is disputed on the merits.
- Judgment is 100% in favor of the Seller and is not appealed.
- The Seller enforces the judgment and the money is successfully collected through a public sale of Buyer's assets.

# Closing a Business

The economic crises of the 1990s in emerging markets, from East Asia to Latin America, from Russia to Mexico, raised concerns about the design of bankruptcy systems and the ability of such systems to help reorganize viable companies and close down unviable ones. In countries where bankruptcy is inefficient, unviable businesses linger for years, keeping assets and human capital from being reallocated to more productive uses.

Bottlenecks in bankruptcy cut into the amount claimants can recover. In countries where bankruptcy laws are inefficient, this is a strong deterrent to investment. Access to credit shrinks, and nonperforming loans and financial risk grow because creditors cannot recover overdue loans. Conversely, efficient bankruptcy laws can encourage entrepreneurs. The freedom to fail, and to do so through an efficient process, puts people and capital to their most effective use. The result is more productive businesses and more jobs.

The Doing Business indicators identify weaknesses in the bankruptcy law as well as the main procedural and administrative bottlenecks in the bankruptcy process. In many developing countries bankruptcy is so inefficient that creditors hardly ever use it. In countries such as these, reform would best focus on improving contract enforcement outside bankruptcy.

## Methodology

Three measures are constructed from the survey responses: the time to go through the insolvency process, the cost to go through the process and the recovery rate, how much of the insolvency estate is recovered by stakeholders, taking into account the time, cost, depreciation of assets and the outcome of the insolvency proceeding.

## Survey case study

The data on closing a business are developed using a standard set of case assumptions to track a company going through the step-by-step procedures of the bankruptcy process. It is assumed that:

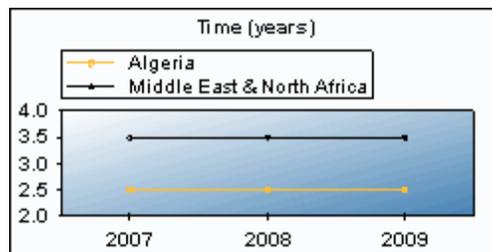

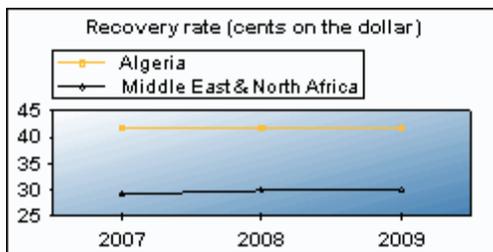

- the company is a domestically owned
- the company is a limited liability corporation operating a hotel in the country's largest business city
- the company has 201 employees, 1 main secured creditor and 50 unsecured creditors
- Assumptions are also made about the future cash flows.
- The case is designed so that the company has a higher value as a going concern, that is, the efficient outcome is either reorganization or sale as a going concern, not piecemeal liquidation.
- The data are derived from questionnaires answered by attorneys at private law firms.

Note: Economies are ranked on the number and impact of reforms, Doing Business selects the economies that reformed in 3 or more of the Doing Business topics. Second, it ranks these economies on the increase in rank in Ease of Doing Business from the previous year. The larger the improvement, the higher the ranking as a reformer.

<b>Algeria</b>	Algeria introduced regulations to better administer the construction permit process and ensure the safe, timely completion of construction projects. Contract enforcement was improved with a new code of civil procedures that reduces time and eliminates procedures. The courts are being fully computerized, including with an electronic case register and case management software. The corporate income tax rate was cut from 25 percent to 19 percent for tourism, construction and public works, and production of goods. Finally, property registration has been made easier and less costly by reducing the notary fee by 0.39 percent of the property's value and eliminating the capital gains tax.
<b>Belarus</b>	Belarus eased the process for getting construction permits by simplifying approval processes. Restrictions relating to redundancy dismissals were eased by raising the threshold for prior notification requirements. Tax payments were made more convenient through increased use of electronic systems—reducing tax compliance times—while lower ecological and turnover tax rates and a reduction in the number of payments for property tax reduced the tax burden on businesses. Property registration continues to improve, with faster processing and elimination of the requirement for notarization. Business start-up was eased by simplifying registration formalities, abolishing the minimum capital requirement, limiting the role of notaries, and removing the need for a company seal approval. Implementation of a risk-based management system and improvement of border crossing operations reduced transit times for trade.
<b>Colombia</b>	Colombia passed several decrees continuing its efforts to regulate the profession of insolvency administrators. The government eased the construction permit process with a new construction decree that categorizes building projects based on risk and allows electronic verification for certain documents. Access to credit improved thanks to a new credit information law that guarantees the right of borrowers to inspect their own data and new rules that make it mandatory for credit providers to consult and share information with credit bureaus. The tax burden on businesses was eased with the introduction of electronic tax filing and payment, and some payments were reduced. An amendment to the Company Law strengthened investor protections by making it easier to sue directors in cases of prejudicial transactions between interested parties. Property registration was made easier by making it possible to obtain required certificates online and by making standard preliminary sale agreements available free of charge. Business start-up was made easier by creating a public-private health provider that enables faster affiliation of employees and through a tool that allows online pre-enrollment with the social security office. Implementation of an electronic declaration system has expedited customs clearance.
<b>Egypt, Arab Rep.</b>	The Arab Republic of Egypt, a former global leading reformer and a regional leading reformer in 2008/09, continued to make it easier to deal with construction permits by issuing executive articles for the 2008 construction law and eliminating most preapprovals for construction permits. Contract enforcement was expedited with the creation of commercial courts. Access to credit information has expanded with the addition of retailers to the database of the private credit bureau. Finally, company start-up was eased by the removal of the minimum capital requirement.
<b>France</b>	France improved the insolvency process by encouraging preinsolvency workouts and no longer requiring estimation of the value of assets by a public auctioneer. A fuller electronic connection between notaries and the land registry reduced the time to transfer property in France and made it easier to obtain encumbrance and ownership documents from the registry.
<b>Kyrgyz Republic</b>	The Kyrgyz Republic eased the process for getting construction permits by streamlining the fee structure, introducing a risk-based system of approval and building control, allowing low-risk projects to conduct an internal building control process, and simplifying the process for obtaining utility connections. Requirements relating to redundancy dismissals and worker reassignment were eased. Access to credit was enhanced by making secured lending more flexible and allowing general descriptions of encumbered assets and of debts and obligations. In addition, amendments to the Civil Code provide for automatic extension of security rights to proceeds of the original assets. The tax burden on businesses was eased by reducing the rates for several taxes and the number of payments for several. Surveying and notarization requirements were made optional for property registration, and business start-up was eased by eliminating the minimum capital requirement, reducing the registration time, and abolishing various post-registration fees and the need to open a bank account before registration. The elimination of six previously required documents and the simplification of inspection procedures has sped up trading across borders.

<b>Liberia</b>	Liberia eased the process for getting construction permits by lowering the permit fee and cost of obtaining a power generator, abolishing the requirement to obtain a tax waiver certificate before submitting documents to obtain a building permit, and making fixed telephone connections more readily available for public use with the reopening of the national phone company. Business start-up was eased by removing the need to obtain an environmental impact assessment when forming a general trading company. The trade process was expedited by creating a one-stop shop bringing together various ministries and agencies, and streamlining the inspection regime.
<b>Macedonia, FYR</b>	The Former Yugoslav Republic of Macedonia has been reforming the construction permit process, shortening waiting times but raising fees. Worker hiring was made more flexible by allowing greater use of fixed-term contracts, easing restrictions on working hours, and making redundancy dismissals more flexible. The public credit bureau increased its coverage by introducing a better database that includes more information and by lowering the minimum loan threshold. Social security payments were classified in five groups, and social security contribution rates reduced. Investor protections were increased by regulating the approval of transactions between interested parties, increasing disclosure requirements in annual reports, and making it easier to sue directors in cases of prejudicial transactions between interested parties. Property registration was eased with the introduction of new time limits at the real estate cadastre—reducing the average time to register a title deed by eight days—and a non-encumbrance certificate can now be obtained from the real estate registry instead of through the court. Business start-up was simplified by integrating procedures at a one-stop shop.
<b>Mauritania</b>	In Mauritania no major reform was recorded.
<b>Moldova</b>	Moldova lowered the rates for social security contributions paid by employers. Property registration was simplified by eliminating the requirement for a cadastral sketch, reducing procedures from six to five and days from 48 to 5. Business start-up was eased by implementing an expedited company registration service.
<b>Morocco</b>	Morocco strengthened access to credit with a new private credit bureau that began operating in March 2009.
<b>Rwanda</b>	Rwanda improved the process for dealing with distressed companies with a new law aimed at streamlining reorganization. Employing workers was made easier by abolishing the maximum duration for fixed-term contracts and allowing unlimited renewals of such contracts, as well as by allowing redundancy procedures to be more flexible, with consultation and notification of third parties no longer required. Getting credit was made easier with a new secured transactions act and insolvency act to make secured lending more flexible, allowing a wider range of assets to be used as collateral and a general description of debts and obligations. In addition, out of court enforcement of collateral has become available to secured creditors, who also now have top priority within bankruptcy. A new company law has strengthened investor protections by requiring greater corporate disclosure, director liability, and shareholder access to information. Property registration was simplified by decreasing the number of days required to transfer a property. Business start-up was eased by eliminating a notarization requirement; introducing standardized memorandums of association; enabling online publication; consolidating name checking, registration fee payment, tax registration, and company registration procedures; and shortening the time required to process completed applications. By implementing administrative changes—such as increased operating hours and enhanced cooperation at the border, along with the removal of some documentation requirements for importers and exporters—Rwanda has improved trading times.
<b>Spain</b>	Spain eased the tax burden on business by reducing the corporate income tax rate from 32.5 percent to 30 percent and increasing efficiency through an electronic filing and payment system.
<b>Tajikistan</b>	Tajikistan amended its insolvency law, aiming to reduce statutory time limits and the costs of proceedings. Changes were introduced that simplified the construction permit process, reducing procedures and time. A new law on credit histories improves access to credit information by creating a private credit bureau. Investor protections were strengthened with amendments to the joint stock company law, increasing disclosure requirements for transactions involving conflicts of interest, allowing for greater director liability, and giving shareholders the chance to request that harmful related-party transactions be rescinded. The state duty for property transfer has quadrupled, raising the cost of registering property by 2.8 percent of a property's value. Business start-up was eased by reducing the minimum capital requirement and shortening the time to obtain a tax identification number.

**Tunisia**

Tunisia raised the total tax rate for businesses by 3.7 percentage points, through an increase in social security taxes of 0.6 percentage point and an increase of 3.1 percentage points for abandoning accelerated depreciation. Introduction of electronic filing may shorten tax payment compliance times and will affect payments. Expansion of the country's electronic single window will allow Tunisian traders to quickly file all documents required to clear their cargo online, and the system has reduced processing delays by two days. Furthermore, Tunisia strengthened investor protections by requiring greater corporate disclosure.

**United Arab Emirates**

The United Arab Emirates shortened the time for delivering building permits by improving its online system for processing applications. Business start-up was eased by simplifying the documents needed for registration, abolishing the minimum capital requirement, and removing the requirement that proof of deposit of capital be shown for registration. Greater capacity at the container terminal, elimination of the terminal handling receipt as a required document, and an increase in trade finance products, have improved trade processes.

## APPENDICES

### Starting a Business in Algeria

This table summarizes the procedures and costs associated with setting up a business in Algeria.

#### STANDARDIZED COMPANY

Legal Form: Société à Responsabilité Limitée (SARL) -

Limited Liability Company

Minimum Capital Requirement:

City: Algiers

#### Registration Requirements:

No:	Procedure	Time to complete	Cost to complete
1	Obtain an attestation on the uniqueness of selected company name from the Centre National du Registre du Commerce (CNRC); pick up registration forms	1	490
2	Deposit the start-up capital with the notary public	1	0
3	Draw up and notarize the company constitution documents, submit specimen of managers' signatures, and prepare and submit the lease for the registered office of the company	7	0.379205
4	Obtain the criminal record and birth certificate of manager	2	30
5	Publish the company constitution on the legal journal (B.O.A.L.) and a nationally circulated newspaper	3	1960
6 *	File for company registration with the commercial registry within two months of the formation of the company	2	9760
7	Pay for the stamp duty and obtain a receipt	1	4000
8	Register for income tax (Impôt sur le revenu global des personnes physiques, IRG), corporate tax (Impôt sur les bénéfices des personnes morales ou des sociétés, IBS), and VAT with the local tax inspectorate	2	0
9	Register for the Caisse Nationale des Assurances Sociales des Travailleurs Salariés (CNAS)	1	0
10	Open the company's bank account with a commercial bank	1	0
11	Register for the Caisse Nationale de Sécurité Sociale des Non Salariés (CASNOS)	1	0
12	Register with the Unemployment Insurance Fund (CNAC)	1	0
13	Make a company seal	2	800

---

14 Have company's accounting books stamped at the court

1

6000

---

\* Takes place simultaneously with another procedure.

**Procedure 1 Obtain an attestation on the uniqueness of selected company name from the Centre National du Registre du Commerce (CNRC); pick up registration forms**

**Time to complete:** 1

**Cost to complete:** 490

**Comment:** Fees for attestation of company name:  
- Name search: DZD 480.  
- Fiscal stamp: DZD 10.  
The applicant must fill out a form, listing the four proposed company names, and pay a fee. The Commercial Registry (Centre National du Registre du Commerce, CNRC) conducts a name search and issues a name certificate on the same day.

**Procedure 2 Deposit the start-up capital with the notary public**

**Time to complete:** 1

**Cost to complete:** 0

**Comment:** The notary deposits the capital in a bank and obtains a deposit certificate before drawing up the statutes.

**Procedure 3 Draw up and notarize the company constitution documents, submit specimen of managers' signatures, and prepare and submit the lease for the registered office of the company**

**Time to complete:** 7

**Cost to complete:** 0.379205

**Comment:** According to Executive Decree n° 08-243 fees are:  
-5% if the company capital is between DZD 1 and DZD 200,000 ,  
-1% if the company capital is between DZD 200,001 and DZD 300,000 DA,  
-0.7% if the company capital is between DZD 300,001 and DZD 400,000  
-0.6% if the company capital is between DZD 400,001 and DZD 500,000  
-0.5% if the company capital is between DZD 500,001 and DZD 1,000,000  
-0.5% if the company capital is DZD 1,000,000 and above

**Procedure 4 Obtain the criminal record and birth certificate of manager**

**Time to complete:** 2

**Cost to complete:** 30

**Comment:** Since 2003, one can apply for the criminal record (extract de casier judiciaire) anywhere, without visiting the Clerk of the Court in the manager's birthplace. The managers must file the criminal record with the Trade Register and also provide a copy of the birth certificate, obtained at the birthplace. It is assumed that the managers already hold a birth certificate.

**Procedure 5 Publish the company constitution on the legal journal (B.O.A.L.) and a nationally circulated newspaper**

**Time to complete:** 3

**Cost to complete:** 1960

**Comment:** The two newspapers are in Arabic and French language, respectively. The fees vary by newspaper. For a daily newspaper, the fee is DZD 280 per line of 24 characters. For the official journal, the Official Bulletin of Legal Announcements (BOAL), the fee is DZD 48

per line.

**Procedure 6** File for company registration with the commercial registry within two months of the formation of the company

**Time to complete:** 2

**Cost to complete:** 9760

**Comment:** According to Law No. 04-08 (April, 14 2004), registration is completed within 1 day. However, in practice, it still takes 2 days to obtain the final registration certificate.  
Registration fee:  
- DZD 9,120 if the company capital is between DZD 30,001 and DZD 100,000.  
- DZD 9,520 if the company capital is between DZD 100,001 and DZD 300,000.  
- DZD 9,760 if the company capital is more than DZD 300,000.

**Procedure 7** Pay for the stamp duty and obtain a receipt

**Time to complete:** 1

**Cost to complete:** 4000

**Comment:** Fiscal stamps are sealed at the fiscal administration. Other stamps are paid at the CNRC.

**Procedure 8** Register for income tax (Impôt sur le revenu global des personnes physiques, IRG), corporate tax (Impôt sur les bénéfices des personnes morales ou des sociétés, IBS), and VAT with the local tax inspectorate

**Time to complete:** 2

**Cost to complete:** 0

**Comment:**

**Procedure 9** Register for the Caisse Nationale des Assurances Sociales des Travailleurs Salariés (CNAS)

**Time to complete:** 1

**Cost to complete:** 0

**Comment:** The following three departments handle social security matters:  
1. The Caisse Nationale des Assurances Sociales des Travailleurs Salariés (CNAS) receives employee declarations.  
2. The Caisse Nationale de Sécurité Sociale des Non Salariés (CASNOS) receives employer declarations.  
3. The Caisse Nationale d'Assurance Chômage (CNAC) is the competent authority for unemployment matters.  
The employer must report any new employee within 10 days of hiring.

**Procedure 10** Open the company's bank account with a commercial bank

**Time to complete:** 1

**Cost to complete:** 0

**Comment:** The bank account can be opened only following commercial registration (a receipt by the Commercial Registry suffices). The bank requires the following documents: company statutes, tax registration, statistical ID, copy of director's birth certificate. Documents are deposited in one day, but the time needed for bank accounts to be operational and receive check books varies from bank to bank.

**Procedure 11 Register for the Caisse Nationale de Sécurité Sociale des Non Salariés (CASNOS)**

**Time to complete:** 1

**Cost to complete:** 0

**Comment:**

**Procedure 12 Register with the Unemployment Insurance Fund (CNAC)**

**Time to complete:** 1

**Cost to complete:** 0

**Comment:**

**Procedure 13 Make a company seal**

**Time to complete:** 2

**Cost to complete:** 800

**Comment:**

**Procedure 14 Have company's accounting books stamped at the court**

**Time to complete:** 1

**Cost to complete:** 6000

**Comment:** The accounting and inventory books must be stamped when the company starts its business activity. The fees amount to about DZD 2,000 per book.

## Dealing with Construction Permits in Algeria

The table below summarizes the procedures, time, and costs to build a warehouse in Algeria.

### BUILDING A WAREHOUSE

Date as of: January 2009

Estimated Warehouse Value:

City: Algiers

#### Registration Requirements:

No:	Procedure	Time to complete	Cost to complete
1	Legalize property act	2 days	DZD 1,800
2	Obtain building permit	150 days	DZD 2,500
3	Receive municipal inspection	5 days	no charge
4	Receive municipal inspection	1 day	no charge
5	Receive municipal inspection	1 day	no charge
6	Receive municipal inspection	1 day	no charge
7	Receive municipal inspection	1 day	no charge
8	Receive municipal inspection	1 day	no charge
9	Request and receive final inspection to obtain certificate of conformity	14 days	no charge
10	Obtain certificate of conformity	1 day	DZD 5,000
11	Notarize the updated property act	1 day	no charge
12	Register the updated property act (title) at the property registry	1 day	no charge
13	Apply for telephone line	1 day	no charge
14	Ministry of Posts and Telecommunications inspects the site and prepares an estimate	30 days	DZD 13,200
15	Obtain telephone connection	30 days	DZD 15,000

16 *	Notify municipal/ communal authority of connection to sewer mains	1 day	no charge
17	Apply for electricity connection	1 day	DZD 25,000
18	Electricity company inspects the site and prepares an estimate	14 days	DZD 15,000
19	Obtain electricity connection	25 days	DZD 12,500
20	Apply for water connection	1 day	no charge
21	The water company inspects the site and prepares an estimate	22 days	DZD 13,000
22	Obtain water connection	18 days	DZD 25,000

\* Takes place simultaneously with another procedure.

**Procedure 1 Legalize property act**

**Time to complete:** 2 days

**Cost to complete:** DZD 1,800

**Comment:**

**Procedure 2 Obtain building permit**

**Time to complete:** 150 days

**Cost to complete:** DZD 2,500

**Comment:**

**Procedure 3 Receive municipal inspection**

**Time to complete:** 5 days

**Cost to complete:** no charge

**Comment:**

**Procedure 4 Receive municipal inspection**

**Time to complete:** 1 day

**Cost to complete:** no charge

**Comment:** The law does not specify the number of inspections that take place during construction. However, inspections occur randomly before and during the construction process. The variation depends on the visibility and on the exact location of the construction site.

**Procedure 5 Receive municipal inspection**

**Time to complete:** 1 day

**Cost to complete:** no charge

**Comment:**

**Procedure 6 Receive municipal inspection**

**Time to complete:** 1 day

**Cost to complete:** no charge

**Comment:**

**Procedure 7 Receive municipal inspection**

**Time to complete:** 1 day

**Cost to complete:** no charge

**Comment:**

**Procedure 8 Receive municipal inspection**

**Time to complete:** 1 day

**Cost to complete:** no charge

**Comment:**

**Procedure 9 Request and receive final inspection to obtain certificate of conformity**

**Time to complete:** 14 days

**Cost to complete:** no charge

**Comment:** When the warehouse is completed, BuildCo must notify the municipality so that it can perform a final inspection of the construction. The inspector will usually arrive on site within 2 weeks of the request.

**Procedure 10 Obtain certificate of conformity**

**Time to complete:** 1 day

**Cost to complete:** DZD 5,000

**Comment:** Although the law requires a certificate of conformity, it is seldom issued in practice.

**Procedure 11 Notarize the updated property act**

**Time to complete:** 1 day

**Cost to complete:** no charge

**Comment:**

**Procedure 12 Register the updated property act (title) at the property registry**

**Time to complete:** 1 day

**Cost to complete:** no charge

**Comment:** Before the building can be used as collateral, banks require the property title and the construction license. This case study assumes that BuildCo possesses a construction license.

**Procedure 13 Apply for telephone line**

**Time to complete:** 1 day

**Cost to complete:** no charge

**Comment:**

**Procedure 14 Ministry of Posts and Telecommunications inspects the site and prepares an estimate**

**Time to complete:** 30 days

**Cost to complete:** DZD 13,200

**Comment:** The Ministry of Posts and Telecommunications requires a 50% down payment on the estimated charge before connecting the building.

**Procedure 15 Obtain telephone connection**

**Time to complete:** 30 days

**Cost to complete:** DZD 15,000

**Comment:** A site visit may be required to prepare the estimate.

**Procedure 16 Notify municipal/ communal authority of connection to sewer mains**

**Time to complete:** 1 day

**Cost to complete:** no charge

**Comment:**

**Procedure 17 Apply for electricity connection**

**Time to complete:** 1 day

**Cost to complete:** DZD 25,000

**Comment:**

**Procedure 18 Electricity company inspects the site and prepares an estimate**

**Time to complete:** 14 days

**Cost to complete:** DZD 15,000

**Comment:** A site visit is sometimes required to prepare the estimate.

**Procedure 19 Obtain electricity connection**

**Time to complete:** 25 days

**Cost to complete:** DZD 12,500

**Comment:**

**Procedure 20 Apply for water connection**

**Time to complete:** 1 day

**Cost to complete:** no charge

**Comment:**

**Procedure 21 The water company inspects the site and prepares an estimate**

**Time to complete:** 22 days

**Cost to complete:** DZD 13,000

**Comment:** A site visit is sometimes required to prepare the estimate.

**Procedure 22 Obtain water connection**

**Time to complete:** 18 days

**Cost to complete:** DZD 25,000

**Comment:**

## Employing Workers in Algeria

Employing workers indices are based on responses to survey questions. The table below shows these responses in Algeria.

Employing Workers Indicators (2009)	Answer	Score
<b>Difficulty of hiring index (0-100)</b>		<b>44.4</b>
Are fixed-term contracts prohibited for permanent tasks?	Yes	1
What is the maximum duration of fixed-term contracts (including renewals)? (in months)	No limit	0.0
What is the ratio of mandated minimum wage to the average value added per worker?	0.30	0.33
<b>Difficulty of redundancy index (0-10)</b>		<b>40.0</b>
Is the termination of workers due to redundancy legally authorized?	Yes	0
Must the employer notify a third party before terminating one redundant worker?	Yes	1
Does the employer need the approval of a third party to terminate one redundant worker?	No	0
Must the employer notify a third party before terminating a group of 9 redundant workers?	Yes	1
Does the employer need the approval of a third party to terminate a group of 9 redundant workers?	No	0
Is there a retraining or reassignment obligation before an employer can make a worker redundant?	Yes	1
Are there priority rules applying to redundancies?	Yes	1
Are there priority rules applying to re-employment?	No	0
<b>Redundancy costs (weeks of salary)</b>		<b>17.3</b>
What is the notice period for redundancy dismissal after 20 years of continuous employment? (weeks of salary)		4.3
What is the severance pay for redundancy dismissal after 20 years of employment? (weeks of salary)		13.0
What is the legally mandated penalty for redundancy dismissal? (weeks of salary)		0.0
<b>Rigidity of employment index (0-100)</b>		<b>41.5</b>
<b>Rigidity of hours index (0-100)</b>		<b>40.0</b>
Can the workweek extend to 50 hours (including overtime) for 2 months per year to respond to a seasonal increase in production?	No	1

What is the maximum number of working days per week?	6	0
Are there restrictions on night work and do these apply when continuous operations are economically necessary?	No	0.00
Are there restrictions on "weekly holiday" work and do these apply when continuous operations are economically necessary?	No	0.00
What is the paid annual vacation (in working days) for an employee with 20 years of service?	22	1

Note: The first three indices measure how difficult it is to hire a new worker, how rigid the regulations are on working hours, and how difficult it is to dismiss a redundant worker. Each index assigns values between 0 and 100, with higher values representing more rigid regulations. The overall Rigidity of Employment Index is an average of the three indices.

## Registering Property in Algeria

This topic examines the steps, time, and cost involved in registering property in Algeria.

### STANDARDIZED PROPERTY

Property Value: 16,152,398.10

City: Algiers

#### Registration Requirements:

No:	Procedure	Time to complete	Cost to complete
1	Obtain the original deed of the property and a certificate of encumbrances from the Land Registry (Conservation Foncière)	4 days	DZD 110 (property title) DZD 130 (non-encumbrance certificate)
2	Parties file the unsigned contract with the relevant documents at the notary	3 days	3% for first DZD 500,000 of property value, 2% for the next DZD 500,000, 1% for exceeding amount
3	The seller pays registration and publication fees into notary's account at the Public Revenue Office (Trésor Public)	1 day	6% of the property value (5% registration fee + 1% publication fee)
4	Parties sign the contract at the public notary	1 day	no cost
5	The original deed and documents are filed by the notary at the Registry of Deeds (Service de l'Enregistrement et du Timbre)	4 days	no cost
6 *	The notary provides a tax declaration to be deposited at the local tax office	1 day (simultaneous with following procedures)	no cost
7 *	File tax declaration and proof of payment at the local tax office (Sous Direction du Recouvrement des Impôts)	1 day (simultaneous with following procedures)	no cost
8 *	Notary returns deposit to seller	30 days (time limit) (simultaneous with following procedures)	no cost
9 *	The notary pays registration fees to the local tax authorities (Recette des Impôts)	1 day (simultaneous with previous procedures)	Already counted in Procedure 3

10 *	The notary issues payment for publication fee to the Local Land Registry (Conservation Foncière) for publication and issuance of the new deed	30 day (time limit - (simultaneous with previous procedures) )	Already counted in Procedure 3
11 *	The notary issues a copy of the deed to each party	1 day (simultaneous with procedures 6 to 11)	no cost

\* Takes place simultaneously with another procedure.

**Procedure 1 Obtain the original deed of the property and a certificate of encumbrances from the Land Registry (Conservation Foncière)**

**Time to complete:** 4 days

**Cost to complete:** DZD 110 (property title) + DZD 130 (non-encumbrance certificate)

**Comment:** The seller obtains the original deed of the property and a non-encumbrance certificate from the Land Registry (Conservation Foncière). The Land Registry will also check with the Tax Office to see that the seller is up-to-date with tax payments linked to the property.

**Procedure 2 Parties file the unsigned contract with the relevant documents at the notary**

**Time to complete:** 3 days

**Cost to complete:** 3% for first DZD 500,000 of property value, 2% for the next DZD 500,000, 1% for exceeding amount

**Comment:** The parties provide the notary with all the relevant documents such as the original Property title, non-encumbrance certificate, Birth certificate. The notary takes note of the purchase price and reviews the documents. He/she then issues an order of payment to the buyer for the amount  
20% of the purchasing price, to be deposited in the notary's agent account at the Public Revenue Office.  
5% of the property value for registration fees (2.5% for each party)  
Transfer tax (taxe de publicité foncière) 1% of property value

The notary's fees are as follows:  
3% for the first 500 000 FCFA  
2% for the second 500 000 FCFA  
1% for the rest of the amount  
17% VAT is applicable on the notary fees

**Procedure 3 The seller pays registration and publication fees into notary's account at the Public Revenue Office (Trésor Public)**

**Time to complete:** 1 day

**Cost to complete:** 6% of the property value (5% registration fee + 1% publication fee)

**Comment:** The seller subsequently informs the notary of the payment. The 6% consist of: (i) 5% registration fee (2.5% to be paid each by seller and buyer) and (ii) 1% for publication fees.

**Procedure 4 Parties sign the contract at the public notary**

**Time to complete:** 1 day

**Cost to complete:** no cost

**Comment:** After the deposit, the seller provides the notary with the receipt. The notary then drafts the contract, which is signed by both parties and issues a provisional copy of the deed to the seller. The notary then continues with the registration of the transfer deed (see proc. 6-11).

**Procedure 5 The original deed and documents are filed by the notary at the Registry of Deeds (Service de l'Enregistrement et du Timbre)**

**Time to complete:** 4 days

**Cost to complete:** no cost

**Comment:** The Registry of Deeds issues an order of payment of 6% property value to the notary.

**Procedure 6 The notary provides a tax declaration to be deposited at the local tax office**

**Time to complete:** 1 day (simultaneous with following procedures)

**Cost to complete:** no cost

**Comment:** The seller takes the proof of payment to the notary who provides a tax declaration to be deposited at the local tax office Sous Direction du Recouvrement des Impôts)

**Procedure 7 File tax declaration and proof of payment at the local tax office (Sous Direction du Recouvrement des Impôts)**

**Time to complete:** 1 day (simultaneous with following procedures)

**Cost to complete:** no cost

**Comment:** The seller or notary files the tax declaration and proof of payment at the local tax office (Sous Direction du Recouvrement des Impôts)

**Procedure 8 Notary returns deposit to seller**

**Time to complete:** 30 days (time limit) (simultaneous with following procedures)

**Cost to complete:** no cost

**Comment:** After 30 days, and if there are no objections by the tax office, the notary delivers to the seller a check for the amount of the deposit or, if applicable, the amount minus the capital gains tax, if the latter was paid from the deposit.

**Procedure 9 The notary pays registration fees to the local tax authorities (Recette des Impôts)**

**Time to complete:** 1 day (simultaneous with previous procedures)

**Cost to complete:** Already counted in Procedure 3

**Comment:** The notary issues a payment of 5% of the purchase value for the registration fees from the agent account to the local tax authorities. Subsequently, the tax authorities issue to the notary an original deed ('minute de l'acte) only for his records. (The "minute" is the original received by the notary. The notary must keep it and cannot make it public.)

**Procedure 10 The notary issues payment for publication fee to the Local Land Registry (Conservation Foncière) for publication and issuance of the new deed**

**Time to complete:** 30 day (time limit - (simultaneous with previous procedures) )

**Cost to complete:** Already counted in Procedure 3

**Comment:** The notary issues a payment by check for the publication fee of 1% of the purchase value (part of 6% deposited by the seller) accompanied by a copy of the deed. The Land Registry then issues a public deed to the notary.

**Procedure 11**      **The notary issues a copy of the deed to each party**

**Time to complete:** 1 day (simultaneous with procedures 6 to 11)

**Cost to complete:** no cost

**Comment:**

## Getting Credit in Algeria

The following table summarize legal rights of borrowers and lenders, and the availability and legal framework of credit registries in Algeria.

Getting Credit Indicators (2009)			Indicator
			score
Private bureau coverage (% of adults)	Private credit bureau	Public credit registry	2
Are data on both firms and individuals distributed?	No	Yes	1
Are both positive and negative data distributed?	No	Yes	1
Does the registry distribute credit information from retailers, trade creditors or utility companies as well as financial institutions?	No	No	0
Are more than 2 years of historical credit information distributed?	No	No	0
Is data on all loans below 1% of income per capita distributed?	No	No	0
Is it guaranteed by law that borrowers can inspect their data in the largest credit registry?	No	No	0
<b>Coverage</b>		0.0	0.2
Number of individuals		0	..
Number of firms		0	..

Strength of legal rights index (0-10)		3
Can any business use movable assets as collateral while keeping possession of the assets; and any financial institution accept such assets as collateral ?		Yes
Does the law allow businesses to grant a non possessory security right in a single category of revolving movable assets, without requiring a specific description of the secured assets ?		No
Does the law allow businesses to grant a non possessory security right in substantially all of its assets, without requiring a specific description of the secured assets ?		Yes
May a security right extend to future or after-acquired assets, and may it extend automatically to the products, proceeds or replacements of the original assets ?		No
Is a general description of debts and obligations permitted in collateral agreements, so that all types of obligations and debts can be secured by stating a maximum amount rather than a specific amount between the parties ?		Yes
Is a collateral registry in operation, that is unified geographically and by asset type, as well as indexed by the grantor's name of a security right ?		No
Do secured creditors have absolute priority to their collateral outside bankruptcy procedures?		No
Do secured creditors have absolute priority to their collateral in bankruptcy procedures?		No

During reorganization, are secured creditors' claims exempt from an automatic stay on enforcement?

No

Does the law authorize parties to agree on out of court enforcement?

No

## Protecting Investors in Algeria

The table below provides a full breakdown of how the disclosure, director liability, and shareholder suits indexes are calculated in Algeria.

Protecting Investors Data (2009)	Indicator
<b>Extent of disclosure index (0-10)</b>	<b>6</b>
What corporate body provides legally sufficient approval for the transaction? (0-3; see notes)	3
Immediate disclosure to the public and/or shareholders (0-2; see notes)	0
Disclosures in published periodic filings (0-2; see notes)	0
Disclosures by Mr. James to board of directors (0-2; see notes)	2
Requirement that an external body review the transaction before it takes place (0=no, 1=yes)	1
<b>Extent of director liability index (0-10)</b>	<b>6</b>
Shareholder plaintiff's ability to hold Mr. James liable for damage the Buyer-Seller transaction causes to the company. (0-2; see notes)	1
Shareholder plaintiff's ability to hold the approving body (the CEO or board of directors) liable for damage to the company. (0-2; see notes)	1
Whether a court can void the transaction upon a successful claim by a shareholder plaintiff (0-2; see notes)	0
Whether Mr. James pays damages for the harm caused to the company upon a successful claim by the shareholder plaintiff (0=no, 1=yes)	1
Whether Mr. James repays profits made from the transaction upon a successful claim by the shareholder plaintiff (0=no, 1=yes)	1
Whether fines and imprisonment can be applied against Mr. James (0=no, 1=yes)	1
Shareholder plaintiff's ability to sue directly or derivatively for damage the transaction causes to the company (0-1; see notes)	1
<b>Ease of shareholder suits index (0-10)</b>	<b>4</b>
Documents available to the plaintiff from the defendant and witnesses during trial (0-4; see notes)	2
Ability of plaintiffs to directly question the defendant and witnesses during trial (0-2; see notes)	0
Plaintiff can request categories of documents from the defendant without identifying specific ones (0=no, 1=yes)	0
Shareholders owning 10% or less of Buyer's shares can request an inspector investigate the transaction (0=no, 1=yes)	0

Level of proof required for civil suits is lower than that for criminal cases (0=no, 1=yes) 1

Shareholders owning 10% or less of Buyer's shares can inspect transaction documents before filing suit (0=no, 1=yes) 1

**Strength of investor protection index (0-10) 5.3**

**Notes:**

**Extent of Disclosure Index**

*What corporate body provides legally sufficient approval for the transaction?*

0=CEO or managing director alone; 1=shareholders or board of directors vote and Mr. James can vote; 2=board of directors votes and Mr. James cannot vote; 3 = shareholders vote and Mr. James cannot vote

*Immediate disclosure to the public and/or shareholders*

0=none; 1=disclosure on the transaction only; 2=disclosure on the transaction and Mr. James' conflict of interest

*Disclosures in published periodic filings*

0=none; 1=disclosure on the transaction only; 2=disclosure on the transaction and Mr. James' conflict of interest

*Disclosures by Mr. James to board of directors*

0=none; 1=existence of a conflict without any specifics; 2= full disclosure of all material facts

**Director Liability Index**

Corporate income tax	4		152	19%	taxable profit	6.56	
Social security contributions	12		110	25.5%	gross salaries	28.76	
Tax on professional activity	0	paid jointly		2%	turnover	35.35	
<b>Totals</b>	<b>34</b>		<b>451</b>			<b>72.0</b>	

**Notes:**

- a) data not collected
- b) VAT is not included in the total tax rate because it is a tax levied on consumers
- c) very small amount
- d) included in other taxes
- e) Withheld tax
- f) electronic filling available
- g) paid jointly with another tax

Name of taxes have been standardized. For instance income tax, profit tax, tax on company's income are all named corporate income tax in this table.

When there is more than one statutory tax rate, the one applicable to TaxpayerCo is reported.

The hours for VAT include all the VAT and sales taxes applicable.

The hours for Social Security include all the hours for labor taxes and mandatory contributions in general.
