SCHEDULE 1

Project Description

Part B: Measurement, Monitoring and Verification

Establishment of a database to track data generated from individual chiller replacement activities to be used to generate the reports that would support CER claims.

Part C: Technical Assistance

1. Provision of training and organization of workshops to create awareness about the requirements and potential benefits of the Project, explore opportunities to expand its coverage to other energy conservation options in large buildings and industries, and inform participants about measurement, monitoring, and verification of power consumption, energy savings and accounting for emission reductions.

2. Introduction of a recognition program in the form of awards designed to overcome perceived technology risks of chiller owners and promote proper maintenance of chillers to sustain the designed performance of the equipment.
