Implementation Status and Key Decisions

The project became effective on January 25, 2017. The project is meant to support the implementation of an automated risk-based approach to maximize revenue collection, promote open interaction with taxpayers, and develop a fair, taxpayer-friendly approach to addressing taxpayer grievances. This will allow the State Tax Service (STS) to focus on non-compliant taxpayers, including businesses that avoid paying taxes while reducing compliance costs for taxpayers. The project will also finance the acquisition of a modern revenue management IT system. The long-term vision supported by the project is the creation of client-oriented tax administration. The modernized tax administration will improve the business environment and the country's competitiveness.
