International Forum for Utility Regulation
December 1997
Introduction

The International Forum for Utility Regulation (IFUR) published the first edition of the Directory in 1996 to connect utility regulators worldwide. As a follow-up to the print copy, we made available a searchable, electronic version in the spring of 1997; the website is:

Heartened by the positive response to this Directory from the regulatory community, we contacted all institutions listed in the 1996 Directory to verify and/or update their listings. In addition, we called upon colleagues in the regulatory community and in the World Bank to help us identify new institutions in the energy, telecommunications, transport, and water and sewerage sectors that have been established over the past year. Reflecting the continuing trend towards private participation in the provision of infrastructure, utility regulatory agencies are being established in a growing number of both OECD (Organization for Economic Cooperation and Development) and non-OECD countries. Throughout, we sought to identify and list information for those institutions with responsibility for economic regulation, irrespective of their status as autonomous or semi-autonomous institutions or (part of) government ministries. As a general rule, we have not listed information for direct service providers. Also, please keep in mind that some of the institutions listed may have responsibilities extending beyond infrastructure.

We are well aware that some of the information listed in the Directory will change or may already be out-of-date. The process of compiling systematically this information on utility regulatory institutions is an ongoing process. For the Directory to continue to serve its purpose, we encourage you to update the information contained herein by sending us the completed forms which can be found at the end of the Directory. We would also appreciate hearing from the staff of utility regulatory institutions which are not currently listed here by asking them also to complete these forms for inclusion in the next edition of the Directory. Finally, we would appreciate receiving your comments and suggestions for improving the usefulness of this Directory.
The International Forum for Utility Regulation (IFUR) was established in 1995 to provide opportunities in the burgeoning field of utility regulation for information exchange, policy debate and training across sectoral, regional, and institutional boundaries. Forum activities are open to regulators, infrastructure policymakers, and public and private operators from OECD as well as non-OECD countries. Recent activities include:

I. **Directories**: the *International Directory of Utility Regulatory Institutions* which contains descriptions of nearly 800 regulatory agencies in over 180 countries; and the *International Directory of Regulatory Strategy Departments of Private Infrastructure Companies* with responses from approximately 100 major companies worldwide.

Copies of these directories can be obtained from IFUR at (202) 473-6566 (tel); (202) 522-2029 (fax); or IFUR@Worldbank.org (Email). In addition to the print format, both directories are now available on the World Bank's website at: <http://www.worldbank.org/html/fpd/psd/ifur/>.

II. **Training**: three offerings of the International Training Course on Utility Regulation and Strategy, co-sponsored with the Public Utility Research Center at the University of Florida. This two-week course, which draws upon the expertise of academics, regulators, World Bank staff and private sector executives for its faculty, is the first of its kind to offer training in competition, market structure, incentive regulation, and the regulatory process for mid- to senior-level staff from regulatory agencies and regulatory strategists from private infrastructure companies. The courses, which are offered twice a year in January and June, have drawn 250 public and private sector participants from 55 countries in the electricity, gas, water and telecommunications sectors.

The fundamental principles of regulatory design, economic decision-making, and financial analysis are presented to establish a framework for the development of regulatory policies appropriate for different countries and situations. Participants learn how to translate principles into practice through sector-specific cases and exercises, cross-country comparisons, and sharing expertise and experience with other participants. Typical issues addressed during the two weeks include:

- What are the basic principles for competition polices? What are the regulatory and pricing issues in the transition to competitive markets?
- How can financial data, the fundamental building blocks of regulation, be obtained and used? How can regulators make decisions of economic trade-offs under conditions of imperfect information?
• How do regulators decide which tools to use in incentive regulation -- rate of return, price caps, yardsticks or hybrid combinations? What are the trade-offs and how does the choice affect the system's overall credibility, efficiency, and legitimacy?

• What are the rationale and methods for introducing performance standards and incentives, particularly related to quality of service, health, safety, and environmental factors? What are the social considerations in regulation such as connection / disconnection policies and alternative payment methods?

• What are the principles of measuring costs and setting prices in network industries? What are the issues in determining rate structure, such as interconnection pricing, pricing of bottleneck functions, predatory pricing, and stranded investments?

• What are the key principles for the establishment and functioning of regulatory agencies, including independence, legitimacy, accountability and the exercise of regulatory discretion? What strategies are at the disposal of regulators to effectively manage complex and often politically sensitive negotiations involving government, investors, consumers, and other interest groups?

• How can regulatory agencies assess their own performance? What are the key aspects of internal agency management, including information management, case management, staff development, human resource strategies, budget management, and evaluation of agency performance? What has been the experience using different incentive mechanisms for training, motivating and retaining staff to stay at the cutting edge of industry developments?

For more information or to receive an application packet, please contact the Public Utility Research Center, University of Florida at:

tel: 352-392-6148 email: purcecon@dale.cba.ufl.edu
fax: 352-392-7796 website: http://www.cba.ufl.edu/eco/purc

III. Dissemination of policy briefs on private participation in infrastructure. Drawing on a wide range of infrastructure reform in different countries and sectors, these briefs seek to broaden understanding on scope for competition in infrastructure provision, choice of regulatory rules, institutional arrangements and risk allocation.

IV. Partnership with regional initiatives by providing speakers, World Bank representation and/or printed materials for conferences such as the Hemispheric Energy Steering Committee for the Americas, APEC’s Regulatory Working Groups on electricity and telecommunication, the World Electricity Conference, and the 1996 Colloquium on Utility Regulation in Spain.
# CHAPTER I

## ALPHABETICAL LISTING BY COUNTRY

This is an alphabetical list of the countries represented in this Directory. The entries following this list are arranged in alphabetical order according to country and name of the institution.

Director: Mr. Winston Ragbir

*Sector(s):* telecommunications
Jurisdiction: national  
Type of organization: autonomous institution  

Basis for appointing Head of Institution: Executive Director is appointed by the Commission; Commission is appointed by the President of the Republic on the advice of the Cabinet.

Length of term: not more than 5 years at any one time  
Grounds for early removal: In addition to normal constraints (e.g., bad behavior, unsound mind, failure to carry out duties), Commissioners have tended to offer their resignations upon a change in Government although not legally required to do so.

Principal funding source(s): general budget (It is proposed that the R.I.C. will be partly financed through levies on regulated entities.)

The following responses relate to the proposed R.I.C.:

Specific responsibilities of the institution:  
- Determination of market structure issues R  
- Design/administration of infrastructure arrangement with private sector providers R  
- Determination of regulated prices D  
- Determination of quality/performance standards D  
- Administration of anti-trust rules in regulated sectors R  

With respect to: the institution: monitors compliance  
Social considerations monitors compliance

## International Directory of Utility Regulatory Institutions

1. **Country:**

2. **Name of Institution:**

3. **What is the institution’s level of jurisdiction?**  
   - [ ] National  
   - [ ] State/Regional  
   - [ ] Municipal

4. **Which sector(s) does the institution oversee?**
   - [ ] Electricity
   - [ ] Rail
   - [ ] Telecommunications
   - [ ] Gas
   - [ ] Ports
   - [ ] Water
   - [ ] Aviation
   - [ ] Roads

5. **Number of staff dedicated to regulatory tasks:**

6. **Institution address:**

   ____________________________
   City, State, Postal Code

7. **Telephone:** ____________________________  **Direct line:** ____________________________  
   **Fax:** ____________________________  **Email:** ____________________________  
   **Internet:** ____________________________

8. **Name of head of institution:**

9. **Title of head of institution:**

   If institution is headed by a Commission or Board, please list names and titles of members:

   ____________________________
   ____________________________
   ____________________________
   ____________________________

10. **How should the institution be characterized?**  
    - [ ] Autonomous  
    - [ ] Semi-autonomous  
    - [ ] Government Ministry
11. If the institution is an autonomous or semi-autonomous body, what is the basis for appointing the head of the institution / Commission / Board? ____________________________________________

____________________________________________________________________________________

a. Length of term: _________________________________________________________________

____________________________________________________________________________________

b. What are restraints on removal before term expires, if any: ______________________________

____________________________________________________________________________________

c. Principal funding sources: □ Levies on regulated firms □ General budget
□ Levies on consumers □ Other ______________

____________________________________________________________________________________

12. Specific regulatory responsibilities of the institution (Please check the appropriate column - D (Decide), R (Recommend), A (Advise), or NA (Not Applicable):

<table>
<thead>
<tr>
<th>D</th>
<th>R</th>
<th>A</th>
<th>NA</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Determination of market structure issues</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. Design and administration of infrastructure arrangements</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>with private sector providers (e.g., divestiture, concession, license, lease)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>c. Determination of regulated prices</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>d. Determination of quality/performance standards</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>e. Administration of anti-trust rules in regulated sectors</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>f. Administration of subsidies and transfers to low-income groups</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>g. Consumer protection (e.g., complaints, disputes, appeals)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

13. With respect to the following regulatory activities, does the institution:

<table>
<thead>
<tr>
<th>Monitor Compliance</th>
<th>Impose Sanctions</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Anti-trust rules</td>
<td></td>
</tr>
<tr>
<td>b. Economic regulations</td>
<td></td>
</tr>
<tr>
<td>c. Environmental regulations</td>
<td></td>
</tr>
<tr>
<td>d. Safety regulations</td>
<td></td>
</tr>
<tr>
<td>e. Social considerations of providing services</td>
<td></td>
</tr>
<tr>
<td>f. Consumer complaints, disputes, appeals</td>
<td></td>
</tr>
</tbody>
</table>

14. Could you please list the nature and frequency of current contacts with utility regulators from other countries (e.g. twinning arrangements, conferences)? ____________________________________________

____________________________________________________________________________________

15. What type of information on utility regulation would you be interested in receiving?

□ International Directory of Utility Regulatory Institutions
