Executive Summary

1. Introduction:
This Resettlement Policy Framework (RPF) provides policy, strategy, process and procedures to understand the resettlement principles, organizational arrangements and design criteria to be applied to meet the needs of the people who may be affected by the project activities of the Strategic Road Connectivity and Trade Improvement Project (SRCTIP)-Trade Facilitation Component. The Trade Facilitation Component of SRCTIP will be implemented by the Ministry of the Industry Commerce and Supply (MoICS) and Ministry of the Agriculture and Livestock Development (MoALD), and funded by the World Bank. This RPF has prepared the relevant strategies in full compliance with Government of Nepal (GON) Acts and policies, and Environmental and Social Standard (ESS) 5 Land Acquisition, Restrictions on Land Use, and Involuntary Resettlement of the World Bank’s Environmental and Social Framework (ESF).

2. Project Description and: SRCTIP-Trade Facilitation Component
The SRCTIP-Trade Component’s Sub-Project broadly covers the construction and improvement of the boarder infrastructure and laboratories at various locations of the Inland Container Depot viz; Biratnagar, Birjung and Bhairawaha. Selected access road improvements and parking yard developments will be carried out in corresponding locations. Land acquisition is not expected under the Trade component as sub project activities will take place within land already acquired by the GoN, however, physical and/or economic displacement may be required.

The RPF has been developed at this stage of the project given that the scale and exact locations of project activities to be implemented under this component have not yet been determined. A Resettlement Action Plan (RAP) will be developed when the relevant feasibility studies as well as environmental and social studies are conducted during the detail design phase and resettlement impacts are known.

3. Objectives
Whilst the SRCTIP-Trade Facilitation Component is not expected to require land acquisition, and other displacement impacts have not yet been determined, the RPF has been prepared to control or minimize any adverse impacts in the case that any physical or economic displacement arises. The RPF makes comprehensive reference to the policies and guidelines which guide these processes under the subproject.

4. Potential Issues and Impacts
The component will support the augmentation of physical infrastructure, equipment, inspection and related border transit management systems that are required to absorb increasing traffic and trade volumes at key border crossing points at Birgunj, Bhairahawa and Biratnagar. It will also support the construction and/or renovation of lab buildings at key border locations. Birgunj is a metropolitan city in Parsa District in Province 2 of southern Nepal, which is known as the “Gateway of Nepal”. According to 2011 census data, the city has the population of 205,000. Bhairahawa is a
municipality of Rupandehi District on the outer Terai plains of Nepal. According to 2011 census data, the city has the population of 63,500. Biratnagar is the fifth largest city in Nepal, and according to 2011 census data, it has a population of 242,600. As the exact locations of project intervention are yet to be finalized, the detailed project impacts on land taking if any cannot be determined. However, based on the current primary screening of the SRCTIP-Trade Facilitation component, sub project activities are not expected to require:

- Land acquisition
- Relocation of any IP communities or groups
- Impacts to any cultural heritage or practices

However, based on the preliminary screening the possible potential involuntary resettlement impacts could be summarized as followed:

- Squatters, encroachers and street markets may exist within the project influence area. The displacement of these people will be necessary for the purpose of project construction.
- Whilst land acquisition of land is not anticipated, it is likely that some land may be temporarily required, such as for the establishment of labor camps, and for stockpiling of construction materials.
- Construction-induced impacts (causing loss of or damage to structures and crops) may occur during the construction phase, which will be mitigated as per procedures specified in the environmental and social impact assessment (ESIA) and RAP for the sub project.

5. Impact Mitigation Approach

The eligibility for entitlements has been defined and based on that, evaluation criteria have been proposed for valuation of the losses. A detailed entitlement Matrix has been developed during preparation of the RPF outlining the compensation for affected property. Whilst preparing the entitlement matrix, due care has been given the livelihoods of the affected families will be enhance of at least will be the same of pre-project stage.

6. Legal Framework

The Constitution of Nepal 2015 guarantees property rights to every citizen of Nepal. The Land Acquisition, Rehabilitation and Resettlement Policy 2015 and Land Acquisition Act 1977 are also taken into considered during the preparation of this RPF. ESS5 has been reviewed and key gaps between GoN law and World Bank standards have been identified and recommendations to fulfill identified gaps proposed.

7. Public Participation, Consultation and Grievance Mechanism

A stakeholder’s consultation and disclosure workshop was conducted on March 2, 2020. The main objectives of the workshop were to create awareness about the project.
and benefits through disclosing the information about potential impact of the project and corresponding mitigation measures. The feedbacks and suggestion received during the consultation was incorporated in the main report.

This RPF recommends continue meaningful public consultation activities and information dissemination to affected people (APs) throughout project cycle, as also outlined under the sub project’s Stakeholder Engagement Plan (SEP). APs will be regularly provided with information on the project and the resettlement process.

Discussions will be held with the directly affected families, institutions and the representatives of the directly affected rural municipalities (RM) / municipalities (M) prior to and during the preparation of the RAP and the concerns and feedbacks of the APs will be considered while finalizing the RAP.

The draft RPF has already been disclosed in MoICS website (https://moics.gov.np/sources/10/) on 24 March, 2020. The final RPF will be disclosed on the website of MoICS and made available to the likely affected PAPs and other communities. Information dissemination and consultation will continue throughout project execution. Project related information dissemination will be undertaken through electronic and print media, during public consultation/local consultative forum (LCF) meetings, and through direct discussion with the affected families and institutions.

Executive Summaries (ES) of RPF will be translated into the Nepali language and paper copies and will be made available to the PAPs of the project area through the concerned offices of local governments and offices of government line agencies. As per Clauses 3, 7 and 8 of Right to Information Act, 2064 (2007), copies of these documents will be provided to any requester, who pay the cost of the photocopy. Besides key highlight of final RPF will also be disseminated through appropriate means of communication like Social Media, FM radio broadcasts through local radio stations, community meetings, focus group discussions, participatory appraisal techniques, household interviews and social mobilization techniques. A project-level grievance redress mechanism will be established which will allow affected persons and other related stakeholders to appeal any disagreeable decisions, practices and activities arising from compensation for land, assets settlements, and technical and general project-related disputes. The APs will be made fully aware of their rights and the procedures for doing so verbally and in writing during consultation, DPR survey, and time of compensation.

8. Monitoring and Evaluation

Any displacement and involuntary resettlement will be monitored both internally and externally with the objective of providing feedback to management on implementation and to identify problems and successes as early as possible to facilitate timely adjustment of implementation arrangements.

9. Institutional Responsibilities and Implementation Arrangements for RAP

At the central level, MoICS and MoALD will be the Executing Agency (EA) and for all sub-projects under SRCTIP-Trade Facilitation Component, and a Project Coordination Unit (PCU) will be established. The PCU will be responsible for the
overall planning, budgeting, approval and implementation of the RPF and RAP of the sub-project. All aspects relating to displacement and resettlement will be addressed in close consultation and collaboration of the PCU environmental and social team.

Whilst the SRCTIP-Trade Facilitation Component is not expected to require land acquisition and resettlement, any associated costs of land acquisition and resettlement will be itemized and included in the overall project costs under the budget for ‘Environmental and Social Management Costs’.

1. Introduction

This Resettlement Policy Framework (RPF) provides policy, strategy, process and procedures to understand the resettlement principles, organizational arrangements and design criteria to be applied to meet the needs of the people who may be affected by the project activities resulting due to land acquisition, loss of shelter, assets or livelihoods, business and/or loss of access to economic resources. This RPF has prepared relevant strategies in full compliance with Government of Nepal (GON) and World Bank’s Environmental and Social Framework, specific objectives of Environmental and Socials Standard 5.

This RPF will be applicable for Strategic Road Connectivity and Trade Improvement Project (SRCTIP) – Trade Facilitation Component implemented by the Ministry of the Industry Commerce and Supply (MoICS) and Ministry of the Agriculture and Livestock Development (MoALD) and funded by the World Bank.

The Resettlement Policy Framework (RPF) is developed at this stage of the project given that the scale and exact locations of project activities to be implemented under this component are not yet determined. Details of the investments will be determined when the relevant feasibility studies as well as Environmental and Social Studies are conducted during the detail design phase. Adhering to this framework the project/sub project should develop Resettlement Action Plan (RAP).

2. Project Description: SRCTIP-Trade Facilitation Component

The objective of proposed SRCTIP is to improve the efficiency and safety of select transport infrastructure, improve the efficiency of cross-border trade, and strengthen capacity of strategic road network management in Nepal.

The objective of the SRCTIP-Trade Facilitation component is three-fold: (i) reduce the time taken for goods transit at selected border crossing points; (ii) improve capacity and efficiency for sanitary and phyto-sanitary (SPS) management at selected locations and for targeted products; and (iii) enhance capacity for managing trade. The support will consist of three sub-components:

(a) Augmentation of physical infrastructure, equipment, inspection and related border transit management systems that are required to absorb increasing traffic and trade volumes at key border crossing points at Birgunj, Bhairahawa and Biratnagar;
(b) Augmentation of equipment and training, and construction and/or renovation of lab buildings at key border locations; and
(c) Knowledge and capacity building for: continuous improvement of the trade policy environment; monitoring of trade performance; and development and implementation, and monitoring and evaluation, of targeted trade promotion measures.
3. **Objective of RPF**
The purpose of the RPF is to provide resettlement principles, organizational arrangement, and design criteria to be applied to the subprojects or project components to be prepared during project implementation of SRCTIP - Trade Facilitation Component. Whilst the Trade Facilitation component is not expected to require land acquisition, and other displacement impacts have not yet been determined, the RPF has been prepared to control or minimize any adverse impacts in the case that any physical or economic displacement arises. Once the exact activities and locations of the Trade Facilitation component are defined and the necessary information is available, in the case where displacement impacts are identified a resettlement action plan will be developed in line with this RPF, with the plan proportionate to potential risks and impacts. Project activities that cause physical and/or economic displacement will not commence until such specific plan have been finalized by MoICS and approved by the World Bank.

4. **Potential Issues and Impacts**
The potential involuntary resettlement risk and impacts of the Sub-Project of SRCTIP-Trade Facilitation Component have been primarily assessed based on available information. However, since the feasibility study and detailed design of the project did not start, the detailed involuntary resettlement impact has to be assessed during ESIA exercise. The SRCTIP-Trade Component Sub Project will support the augmentation of physical infrastructure, equipment, inspection and related border transit management systems that are required to absorb increasing traffic and trade volumes at key border crossing points at Birgunj, Bhairahawa and Biratnagar. It will also support the construction and/or renovation of lab buildings at key border locations.

Likewise, the selected access road improvement and parking yard development will be carried out in corresponding location where land has been already acquired by the GoN for those structures. Birgunj is a metropolitan city in Parsa District in Province 2 of southern Nepal, which is known as the “Gateway of Nepal”. According to 2011 census data, the city has the population of 205,000. Bhairahawa is a municipality of Rupandehi District on the Outer Terai plains of Nepal. According to 2011 census data, the city has the population of 63,500. Biratnagar is the fifth largest city in Nepal. According to 2011 census data, it has a population of 242,600. As the exact locations of project intervention are yet to be finalized, the detailed project impacts on land taking if any cannot be determined. However, based on current primary screening SRCTIP-Trade Facilitation component is not expected to require:

- land acquisition
- Relocate any communities or groups
- Impact on the cultural heritage and practice

However, as based on a brief summary of the available information, the possible potential involuntary resettlement impact could be summarized as followed:
➢ The squatters, encroachers and street markets might exist within the project influence area. The displacement of these people with be necessary for the purpose of project construction.

➢ As land acquisition of land will not be anticipated, it is likely that some land may be required temporarily for establishment of labor camps, stockpiling of construction materials etc.

➢ Construction Induce Impact (loss of structures and crops) may occur during construction phase which will be mitigated as per procedures specified as per ESMF/ESIA/RAP

5. Legal Framework

This section provides a brief understanding of the requirements influencing the process of land acquisition so that a policy guideline for preparation of Resettlement Action Plan (RAP) can be developed in terms of the national rules and regulations as well as the applicable requirements of the World Bank’s Environment and Social Standards (ESS).

i. Laws and Regulations of the Government of Nepal

The present Constitution of Nepal came into effect on 20th September 2015. Key reference of this Constitution in the context of this RAP document are summarized below;

- Article 25(1) establishes the right to property for every citizen of Nepal, whereby every citizen is entitled to earn, use, sell and exercise their right to property under existing laws;
- Article 25(2) states that except for public interest, the state will not requisition, acquire or otherwise create any encumbrances on property of a person;
- Article 25(3) states that when the state acquires or establishes its right over private property, the state will compensate for loss of property and the basis and procedure for such compensation will be specified under relevant laws.

Land Acquisition Act, 2034BS (1977)

Land Acquisition Act, 2034 (1,977) is a key law which has provisions related to land acquisition and resettlement in Nepal. The Act empowers Government to acquire land for development purpose by paying compensation to the landowners. Some of the key features of the Act are as follows:

- The Act empowers the government to acquire any land required for public purpose or for operation of any government institution-initiated development project by giving compensation pursuant to the Act (Section 3 and 4).
- As per the prevailing government rules, the compensation to be provided for land acquisition should generally be in cash as per current market value.
However, there is also a provision under Clause 14 of the Land Acquisition Act 2034 (1977) to compensate land for land provided government land is available in the area;

- The process of acquisition and compensation includes:
  - Initial procedures,
  - Preliminary investigation process,
  - Acquisition notification,
  - Compensation notification, and
  - Appeal procedures.

- The public notification process is undertaken by the Executing Agency (EA). The notification includes information dissemination pertaining to land and structures that will be affected by the project;

- For the purpose of determining the compensation amount, a Compensation Determination Committee (CDC) is formed under the chairmanship of the Chief District Officer (CDO) of the District. The CDC is formed to undertake the actual verification of land to be acquired, review and fix compensation rate, identify actual owners, disburse compensation, provide necessary administrative support for addressing associated issues. However, formally the implementation process of CDC begins once Government of Nepal (GON) grants approval for the land acquisition;

- In determining the compensation, the Committee must consider the loss incurred by persons due to land acquisition process, shifting of residence or place of business to another place etc. If the land has to be acquired for institutions other than the municipality and institutions fully owned by the government, the Committee has to consider the following while fixing the compensation amount:
  - Price of land prevailing at the time of notification of land acquisition;
  - Price of standing crops and structures, and
  - Damage incurred by being compelled to shift the APs residence or place of business in consequence of the acquisition of land.

- Compensation to be paid for (a) damages caused as a result of land investigations during the preliminary process, (b) land and property permanently acquired (including standing crops, trees and houses); and

- Compensation to be paid in-cash (lump sum), although landowners who have lost their entire landholdings may require in-kind land replacement rather than in-cash compensation, depending upon joint decision of PAP and project proponent as well as availability of replacement land in nearby areas.

- However, under Section 14 of the Act it is stated that, the Government may allot replacement land to those people whose land has been acquired, from land it possesses such as ailani, or other Government-owned land if they prefer in-kind land for land compensation. Further project proponent will do provision for improvement of replaced land in order to improve the productivity to at least the same level as the land that was acquired by the project.
Land Acquisition, Resettlement and Rehabilitation Policy for Infrastructure Development Projects, 2071 BS (2015 AD):

In September 2015, the Government of Nepal formulated the Land Acquisition, Resettlement and Rehabilitation Policy for Infrastructure Development Projects, 2071 BS. The main objective of the policy is to make the process of land acquisition for development projects smooth. Key provisions of the policy (relevant to the RAP) are as follows:

- Social mobilization income restoration and life skill program: Project affected persons should be given necessary training for development of life skills, income-generating schemes, savings and credit schemes so that PAFs can take up self-employment projects at the resettlement zone. Preference should be given to women;
- Vulnerable groups such as Janajati/ Adivasi, Dalits, landless, women, especially women-headed households, differently-abled, poverty groups and senior citizens are entitled to special benefit and assistance packages in addition to compensation and resettlement;

Land Reform Act (1964)

The Land Reform Act 1964 is also relevant as it establishes the rights of tillers and tenants over the land. As per the Act, a landowner may not be compensated for more land than he is entitled to under the law. The Act additionally specifies the compensation entitlements of registered tenants on land sold by the owner or acquired for the development purposes. The Act amendment in 2001 has established a rule that when state acquires land under tenancy, the tenant and the landlord will each be entitled to 50% of the total compensation amount.

Land Revenue (land administration and revenue) Act 2034

This Act is the main Act to carry out land administration including maintenance and updating records, collection of land revenue and settlement of the disputes after completion of survey and handing over the records to LRO by the Survey Parties. It authorizes the LRO to undertake registration, ownership transfer and deed transfer of land. This Act also authorizes the LRO to transfer ownership and deeds of individual land, if any person applied for the ownership and deeds of individual land, if any person applied for the ownership transfer of his/her land with mutual understanding for public use with recommendation of relevant committee.

Land Use Policy 2015

The Land Use Policy 2015 is a policy document of the GoN relating to limits and protection of land and land resources (LLRs), optimum use and effective management thereto. This policy shall bring about benefits of using lands and land resources by creating a situation of distributing land in a just manner.

ii. Applicable World Bank’s Environment and Social Standards (ESS)
Apart from the national regulations, following international standards requirements will apply in preparation and implementation of this RAP document.

**ESS 5: Land Acquisition, Restrictions on Land Use and Involuntary Resettlement**

This ESS 5 puts in place various processes and systems to avoid/minimise the social and economic impacts related to land acquisition and resettlement. In cases where avoidance of such impacts is not possible, the ESS 5 requires the mitigation of the impact through compensation at replacement cost (which is defined as current market price plus transaction cost) for the losses suffered and improvement of the living conditions of the affected communities in the form of comprehensive compensation packages.

**iii. Comparison of National and WB ESS-5 Requirement**

This section presents gap assessment of Land Acquisition Act 1977 of Nepal vis-à-vis requirements of WBG ESS 5 and gap fulfilment strategies to be taken the Project in relation to key aspects of RAP preparation and implementation.

iv. Eligibility, Entitlement and Valuation

Eligibility

The World Bank Policy on Involuntary Resettlement requires compensation for the lost assets at replacement costs to both titled and non-title holders (i.e. squatters, encroachers and tenants) and resettlement assistance for lost income and livelihoods. In the proposed project, the absence of formal titles will not be a bar to resettlement assistance and rehabilitation. Further, the principles adopted herein contain special measures and assistance for any vulnerable affected person (AP). Persons affected by land acquisition, and relocation and/or rehabilitation of structures/assets (businesses, houses, etc.) are entitled to a combination of compensation measures and resettlement assistance, depending on the nature of ownership rights of lost assets and scope of the impact, including social and economic vulnerability of the affected persons. Thus, the affected persons in the project will be entitled to various types of compensation and resettlement assistance that will help in the restoration of their livelihoods, at least, to the pre-project standards.
The cut-off date of eligibility for entitlement is when the census survey is completed and when publicly announced. Persons who has encroached the area after the given cut-off-date are not entitled to compensation or any other form of resettlement assistance.

During planning and design phase of road construction, efforts will made to minimize impacts on land, people and property and access to resources due to expansion, rehabilitation or construction of road facilities. However, in case where land acquisition will cause adverse impact on people and property or people’s access to land or property, the resettlement and cash compensation payment shall be made in accordance to the World Bank ESS-5 and GoN’s Land Acquisition Act, 2034 (1977) and Road Act 2031 (1975).

**Entitlement Framework**

The project will affect property owners and occupants, their dependents and community groups through acquisition of private and community assets. The Entitlement Policy accordingly specifies compensation and/or rehabilitation measures for two units of entitlement; individuals (i.e. affected individuals and their households) and groups. Entitlements for each type of APs are based on the types and levels of losses. Details on the entitlement framework by type of loss and entitlement unit are shown in Table 5.2

Those who have formal legal rights to land (including tenancy, customary and traditional rights recognized under the Land Related Act, 2021 (1964) will receive:

- In case of tenancy land, 50 percent of the evaluated amount (value of the affected land) will go to the owner and 50 percent is paid to the tenant.
- Those who do not have formal legal rights to land at the time of the census begins but have a recognizable legal right or claim to such land or assets. They are the persons waiting for the Land Certificate (“Lal Purja”) to be approved by the District authority but who have documents to prove as such. They are all entitled to full compensation at replacement cost.
- Those who occupy land temporarily or on a leased-basis allocated to them by the individual, community and any private or public organization with the written permission or signed contract. Entitlement will be provided according to the lease arrangement.
- Those who have no recognizable legal rights or claim to the land they are occupying i.e. squatters, ownerships under dispute etc. GoN laws and regulations do not provide any compensation to this category. However, with an assumption that people of this category are poor and vulnerable, the Project will compensate for the loss of crops at market prices and structures at full
replacement cost. For poor and vulnerable affected persons who have no other land, the Project will suggest to allocate land and provide temporary or lease land rights to them as well as relocation allowances and rehabilitation measures. Landless PAP will not be displaced until the project provides land or alternatives for the poor and vulnerable.

➢ Guthi, Public or Community Land Area can also be subject to loss of land due to the Project. If the recovered land belongs to the Guthi it will be treated according to the Guthi Corporation Act, 2033 (see Ch.3). On public and community land, the Project will relocate the land or pay cash compensation on consensus basis.

### 2. Crops and Trees

#### 2.1 Loss of Trees & Perennial Crops
- Titleholder
- Lessee/cultivators having agreement with the owner
- Landless squatter/encroachers on public land
- Advance notice to harvest crops
- Net value of existing crops where harvesting is not possible.
- The crops, which live, in short time will be paid in accordance with one-year output value. The crops which have lived for several years will be compensated at market value on the basis of loss of future production, based on 5 years annual net production for fruit & fodder trees & 3 years annual net production for timber/ fuel wood trees & other perennial crops.

#### 2.2 Loss of Non-perennial crops
- Inventory of the tree and plant species list
- List of owner, non-perennial crops and the area (if applicable) of cultivation should be prepared
- The APs will get notice 3-6 months in advance regarding crop harvesting. Crops grown after the issue of the notice will not be compensated.

8. Government Property

8.1 Loss of infrastructure and facilities
- Relevant agency
- Facilities will be repaired or replaced.
- To be undertaken in consultation with the relevant department or ministry

8.2 Loss of forest areas
- Department of Forest
- Mitigation by means of afforestation.
- An assessment for maintaining that kind of vegetation
- To be undertaken in consultation with Department of Forestry
Carrying Out the Valuation of Affected Assets

All assets that will be affected, as identified by the survey teams, will be properly recorded and verified in the presence of the concerned persons. The detailed survey asset information will be computerized to monitor the reestablishment of PAPs. The valuation of affected assets will be undertaken by the District-level Compensation Fixation Committees (CFCs). It is also recommendable to geo-reference the said assets (land, structures) with the help of a Global Positioning System (GPS) to facilitate monitoring and to be used in case of later claims.

Each asset will be enumerated and inscribed on a register. Values for each types of asset will be pre-printed, shown to the affected person, and set against the type and number of such losses that the individual will sustain. The total compensation for that category of loss will be explained to the AP, and the total of all losses shown as well. The valuators must ensure that the AP will fully understand the compensation calculation, and that the entire process is explained in local dialect, as applicable. The inventory and evaluation sheet will then be signed, and a copy given on the spot to the affected person. The form will also state, and the affected person will be notified, that the inventory will not be official until a second signed copy, verified by project supervisory staff, is returned to the affected person. At that time, a copy of the grievance procedure described below (explaining the rights of the AP to forward claims) will also be given to the affected person.

When valuing affected assets, the CFCs will take account of rates in the open local market and information gathered during RAP preparation to ensure that compensation is at replacement value. Compensation rate for all types of losses will be prepared. The established price list for land and other assets will be used for compensation of property acquisition. During the course of project implementation, the rate will be continuously reviewed and updated on an annual basis by the CFC.

The methods of valuation for verifying the replacement for each type of losses, which will be carried out by the CFC and resettlement committee, are, but not limited to, the following:

**Land:**

- Recent land use rights transfer on land
- Determine whether the established rates are sufficient or not to purchase the same quality and quantity of land in the similar location.

**Structures:**

- Evaluate whether the compensation for the structures will enable APs to rebuild their affected structures by consulting landowners, based in an inventory of:
  - types of structures, size, stories, rooms, land area similar location and nature of structure, materials used and the cost of various materials
  - Who built the structures (AP or Contractor) and whether will be used or not...
➢ Obtain cost estimates by consulting at least three local/regional contractors and suppliers in order to:
   i. Identify local/typical cost of materials and labor transportation cost
   ii. Identify cost of different types of houses according to Categories,
   iii. Compare prices with those prevailing in the District.

Crops and Production Trees:

➢ Information will be collected to establish the average market price for these items. Current market prices will be determined in the same and adjoining districts for different types of crops and plants in consultation with District Agriculture Office and the Division Forests Office.

The final valuation shall be based on the principle that the project-affected families shall be compensated in a way to guarantee that their living standard is at least the same as before, if not better. Accordingly, the assessment of compensation for affected assets will be based on the principle of current market price at replacement value. The prices per square meter for different category of structures will be based on the total affected area of a structure, and not the usable area. As matter of principle, all compensation should be equivalent or higher than the prevailing market price.

6. Public Participation, Consultation and Grievance Mechanism

Public participation as part of citizen engagement i.e. directly and indirectly affected groups including other interested party and meaningful consultation are the basic the principles in arranging for proper resettlement and compensation mechanisms in all forthcoming sub-projects in line with ESS 10. Public consultation includes comprehensive and timely dissemination to the project-affected people, while involving at the same time all agencies who will implement and monitor the process. Care will be taken to maintain transparency of the Project, reduce potential conflicts, minimize the risk of project delays, and enable the Project to design the resettlement and the rehabilitation program as a comprehensive development program to suit the needs and priorities of the APs.

6.1 Mechanisms of Consultation and Participation of PAPs

This framework recommends meaningful public consultation activities and information dissemination to affected people through Stakeholder Engagement Plan (SEP). Public consultation will include both local governments, local communities, project affected families, vulnerable and disadvantage group, women groups, differently able groups, medias, politicians, transport groups and civil society, where the APs would be regularly provided with information on the project and
the resettlement process prior to and during the preparation for resettlement actions. Mechanisms of consultation and participation will include:

1. Public meetings in the project area
2. Information/ awareness campaigns through engaged NGOs
3. Interviews/surveys in project affected households
4. Assess the restriction of accesses of common and community resources
5. Focus group discussions (separate focus group discussion if required),
6. Formation of committees and/or groups including stakeholders during project preparation and implementation.
7. Development of grievance redresses mechanism in line with SEP of the Project.

At early stage of initiating the resettlement process a Local Consultative Forum (LCF) will be formed at RM/M level to ensure PAP’s participation in the decision-making process of the RAP implementation. The LCF will play a key role in GRM facilitation.

During the process of preparing RAP, discussions will be held with the directly affected families, institutions and the representatives of the directly affected RM/M. PAP as well as other stakeholders will be requested to participate in meetings of the RAP processes and express their concerns about various aspects of the project.

The information dissemination will be effective through electronic and print media, during public consultation/LCF’s meetings, and direct discussion with the affected families and institutions.

PAPs’ participation should also be ensured during final assessment of compensation, resettlement and monitoring.

Details of these consultations including dates, names of participants, issues raised and how these have been addressed will be documented in the subproject RAPs.

6.2 Consultation during the Preparation of RPF

The Ministry of Industry Commerce and Supplies (MoICS) and Ministry of Agriculture and Livestock Development (MoALD) has jointly organized a consultation and disclosure workshop on 2nd March, 2020 at Nepal India Regional Trade and Transport Project’s Project Coordination Office meeting hall, Bhadrapal, Kathmandu. The main objectives of the Workshop were:

- Create awareness about the project, location, and benefits
- Disclose information about potential impacts of the project;
- Solicit feedback from stakeholders
- Meet regulatory requirements: GoN and World Bank
- Draw suggestions to enhance project design and impact mitigation

The invited stakeholders from respective ministries and departments have actively participated and shared their views and feedback. The main feedbacks received regarding IPPF are
• Provision for the encroaches, squatters and economically displaced people due to the implementation of the project needs to be address clearly
• During the construction and Operation of the project there will be impact on the agriculture nearby the construction site due to project activities how this issue will be managed?

The detail proceedings of the stakeholders consultation is included in Annex 1

6.3 Disclosure and Dissemination Strategies

The draft RPF has already been disclosed in MoICS website (https://moics.gov.np/sources/10/) on 24 March, 2020. The final RPF will be disclosed on the website of MoICS and made available to the likely affected PAPs and other communities. information dissemination and consultation will continue throughout project execution. Project related information dissemination will be undertaken through electronic and print media, during public consultation/local consultative forum (LCF) meetings, and through direct discussion with the affected families and institutions. Executive Summaries (ES) of RPF will be translated into the Nepali language and paper copies and will be made available to the PAPs of the project area through the concerned offices of local governments and offices of government line agencies. As per Clauses 3, 7 and 8 of Right to Information Act, 2064 (2007), copies of these documents will be provided to any requester, who pay the cost of the photocopy. Besides key highlight of final RPF will also be disseminated through appropriate means of communication like Social Media, FM radio broadcasts through local radio stations, community meetings, focus group discussions, participatory appraisal techniques, household interviews and social mobilization techniques.

All the plans prepared under this framework will be disclosure and disseminated following above mentioned strategies.

6. 4 Establishment of Grievance Redress Mechanisms

For SRCTIP-Trade Facilitation Component a grievance redress mechanism will be established to allow affected persons and other related stakeholders to appeal any disagreeable decisions, practices and Activities arising from compensation for land, assets settlements, and technical and general project-related disputes. The APs will be made fully aware of their rights and the procedures for doing so verbally and in writing during consultation, survey, and time of compensation.

The APs will have access to both locally constructed grievances redress committees specified under existing government mechanism i.e. LCF and formal courts of appeal system. Under the latter system every AP can appeal to the court if they feel that they are not compensated appropriately. They may appeal to appellate court within 35 days of the public notice given to them.
Special project grievance mechanisms such as on-site provision of complain hearings allows project affected persons to get fair treatment on time. The LCF will be established in each road affected M/RM to handle initial grievances of the project-affected people. The Project will handle issues regarding the compensation damages done during construction. The APs will have unhindered access to the Grievance Office to forward and file their complains without being intimidated or being deterred by excessive bureaucratic hurdles. The provisions of Social Mobilizer (SM) in the project implementation are good practices in this regard. SM can be mobilised in order to help APs to file the complaints and concerns to the concerned agency. APs will be exempt from all administrative fees incurred, pursuant to the grievance redressed procedures except for cases filed in court. A three-stage procedure for redress of grievances is proposed for the forthcoming sub-projects (see Box 1)
7. Livelihood Support Plan
Livelihood support schemes will be designed in consultation with PAPs in commensurate with level of impact on income sources and livelihood strategy. Besides payment cash compensations for the acquired land, assets and structures including shifting and dismantling assistances, all the physically and economically displaced households as well as vulnerable households will get alternative livelihood restoration support in the form of preferential employment opportunities (project construction works) to all members of the family who would like to work.

Similarly, as a part of income restoration program for rehabilitation of the physically/economically displaced and vulnerable households, livelihood support training will be conducted on the basis of need assessment during project implementation. The basic objective of income restoration activities is to ensure that each PAP will at least have the same or improved income and livelihood after the sub-project. Towards this, it is proposed that one member for each of the affected households losing their livelihood, and who has the capacity and willingness to acquire a new set of skills would be eligible for this plan. Different types of livelihood support skill trainings could be some options for livelihood restoration schemes. The livelihood support trainings may include vegetable cultivation, livestock farming, bee keeping, poultry farming, goat farming, beauty parlor, sewing and cutting, driving, mobile repairing, and basic computer course etc.
Before the implementation of livelihood support training program, training need assessment will be carried out and finalization the training along with training modules, time frame and place. The training program will be conducted close coordination with district level training providing institutions by the project at the 1st year of project implementation.

Training allowances will be provided to all trainees from vulnerable category to ensure that the training provided is useful to generate their daily income that could have been lost while attending the training.

8. Monitoring and Evaluation

The land acquisition and resettlement and vulnerable communities’ components will be monitored both internally and externally with the objective of providing feedback to management on implementation and identifying problems and successes as early as possible to facilitate timely adjustment of implementation arrangements.

Monitoring Social Aspects Pertaining to RAP

The objectives of the monitoring program are:

- to ensure that the standard of living of APs are restored or improved;
- to monitor whether the time lines for resettlement and compensation are met;
- to assess if compensation, rehabilitation measures and social development support program are sufficient;
- to identify problems or potential social, ethnic or other conflicts; and
- to identify methods of responding immediately to mitigate problems.

The monitoring and evaluation of project-related activities with regard to the social implications will be carried out at two stages: First during the mid-term and a second yet to be determined by the PCU, most likely just before the project completion. The mid-term evaluation will focus more on the process part and will examine if the project is in the right track in implementation in terms of its project design/planning and right processes are being followed. It will also assess the type of adjustments/adaptations being made during the course of implementation as a result of the monitoring.

Types of Monitoring Applied

For sub-projects where resettlement and land acquisition will be required, specific monitoring and evaluation program will be implemented to (i) record and assess project inputs and the number of persons affected and compensated, and (ii) confirm that former subsistence levels and living standards are being re-established. The range of activities and issues that would therefore have to be recorded and checked, include:
➢ land acquisition and transfer procedures;
➢ compensation payments;
➢ construction of replacement houses by displaced households;
➢ re-establishment of displaced households and business enterprise;
➢ reaction of severely affected households, in particular, to resettlement and compensation packages; and
➢ re-establishment of income levels.

Two main monitoring mechanisms will be applied:

**Internal Monitoring**

This type of monitoring studies the ongoing process and the respective outputs, compared against established social indicators. The projects will be responsible for internal monitoring of RAP implementation. The PCU will supervise the land acquisition components of the RAP. The Social Division of PCU gives guidance on the monitoring and prepare quarterly reports on the findings of the monitoring reports received from the sub-projects. The funding agency (World Bank) will receive copies of these monitoring reports.

**External Monitoring**

Thus, type of monitoring, carried out by an independent monitoring agency, will assess the extent to which resettlement and rehabilitation objectives have been met. The Project Coordination Units (with approval from World Bank as to ToR and qualifications and experience of monitoring agency) will recruit, for the entire project, an independent external monitoring agency/consultant for independent bi-annual review of RAP implementation to determine whether intended goals are being achieved, and if not, what corrective actions are needed. The independent monitoring agency shall carry out a replacement cost survey to verify and update the district compensation rates in each and ensure that the current market rates are applied and are acceptable as replacement values to both APs and PCU. The independent agency will carry out field visits and consultation with the vulnerable and endogenous communities. The findings of the external monitoring reports will be subject to public disclosure through a public consultation a meeting. External monitoring reports will be submitted to PCU with copies to the funding agency (World Bank).

**Social Indicators to Monitor the Effectiveness of the Proposed RAPs**

The following table presents the basic indicators that are recommended under this framework for monitoring the success/failure of the resettlement activities and the development programs for vulnerable groups.

**Table 7.1: Framework for Monitoring Social Issues Related to Resettlement and Vulnerable Groups**
<table>
<thead>

9. Institutional Responsibilities and Implementation Arrangements for RAP

**Key Agencies at Different Level**

At central level, the Ministry of Industry Commerce and Supplies (MoICS) and Ministry of Agriculture and Livestock Development (MoALD) will be the Executing Agency (EA) and For all sub-projects forthcoming under SRCTIP-Trade Facilitation Component a Project Coordination Unit (PCU) will be established by the Project Director (PD). This PCU will be responsible for the overall planning, budgeting, approval and implementation of RAP of the sub-projects. All aspects relating to resettlement and land acquisition activities will be addressed in close consultation and collaboration of the PCU E &S team.
At Municipality and wards level, offices of various line ministries such as Home, Finance, Agriculture and Co-operatives, Forest, Health, Education and Sports and others will be consulted during RAP implementation. Similarly, CBOs, NGOs and Civil Society of the concerned project area will equally be considered during the preparation and the implementation of the RAP.

**Project Coordination Unit (PCU) E&S Team**

The SRCTIP-Trade facilitation components PCU plays a key role in management and implementation of the RAP and other safeguard issues of the project. The PCU will have a Social Development Specialist (SDS). The SDS will monitor of land acquisition and resettlement operations and vulnerable/indigenous people’s issues. S/he will report to the Project Director at PCU. S/he will work in close coordination with field-based consultants’ offices and Project NGO/s on the day-to-day activities of the resettlement plan implementation. A Social Development/Resettlement Specialist from the Construction Supervision Consultants will support the SDS updating the subproject RAPs based on detailed design. S/he will also be responsible in supervision and coordination of all activities related to resettlement implementation for the sub-projects.

In this context, the responsibilities of the SDS:

- Provide guidance and assistance to the project-engaged NGOs/CBOs in the implementation of public information dissemination, consultation and participation process among various stakeholders;
- Guide and assist all support units operating in the district, including the Consultants and the NGOs in the implementation of RAPs;
- Review and suggestions on the RAPs prepared by the consultant during the sub-project’s detailed design phases
- Review and propose necessary RAP budget;
- Monitor RAP implementation and progress;
- Supervise the compensation payment process;
- Assist in redressing grievances concerning RAP activities;
- Coordinate with concerned government agencies and other ministries; and
- Consolidate all RAPs submitted by consultant and submit them to the funding donor(s) for review.

**Implementing NGOs**

NGOs experienced in resettlement, rehabilitation and livelihood restoration will be engaged as partner organization with PSC to provide facilitation services for implementation of resettlement plan and Activities.
The IA may establish at village Local Consultative Forums (LCFs). These LCFs will assist the Project, the Consultants’ survey teams and the Compensation Fixation Committees (CFC) in informing people about the likely resettlement impact and solicit views of the affected people regarding compensation and relocation options.

The Resettlement Expert from the Consultants, with support from the LCFs and CFCs of the respective districts and partner NGO will execute and monitor the progress of the work. S/He will ensure coordination between the relevant departments, NGO, the Grievance Redress Committee and the affected persons. Close coordination will be ensured between District authorities and sub–projects on a day to day basis. If delays are experienced in land acquisition and compensation, SRCTIP-Trade Components PCU will engage special revenue officials for this purpose. Delays at District level will be minimized through close coordination and with the assistance of Chief District Officers.

The concerned NGO staff will undergo a week-long orientation and training in resettlement policy and management prior to the implementation of resettlement Activities. Refresher training will also provide to them after 1-2 months of program implementation for verifying and updating their knowledge on concerned issues.

A summary of Resettlement Action Plans in Nepali language will be made available to the local level NGOs and public offices in the sub-project sites.

**Implementation Schedule for the Resettlement Action Plan**

The Project Proponent will ensure that funds are delivered on time to the CFC and the implementing Consultants and partner NGOs for timely preparation and implementation of the RAP, as applicable. Civil works contracts will not be awarded unless required compensation payment has been completed. However, construction induced impact procedure will be followed by same resettlement policy framework. The procedure is as follows: inventory, assessment, measurement, CDC meeting with notification and asset valuation. Similarly, social preparation initiatives including income rehabilitation measures may continue and be completed even after civil works has begun.

At present, the program foresees only one sub-project where a full RAP needs to be prepared, while the other sub-projects will make provisions for (minor) resettlement actions as provided in the respective management plans in the ESIA.

Civil works contracts for each sub-project road will only be awarded after completion of all compensation payments and title transfer activities of both voluntary and involuntary contribution of land and,

For SRCTIP-Trade Facilitation Component an indicative schedule for implementing the RAP is shown in the following table, assuming a sequential order of proposed activities. Some of these steps will overlap in their timing and some will be repeated throughout the project cycle.

**Cost Estimate and Financing for the RAP**

SRCTIP-Trade Facilitation Component generally not expected to have resettlement but associated costs of land acquisition and resettlement, if any, will be itemized and included in the overall project costs under the budget for ‘Environmental and Social Management Costs’. The detailed cost estimates for the will be finalized after the completion of Feasibility study Report and ESIA study which will be finalized in near future.

The cost estimates will include measures for (i) planning and budgeting for land acquisition and resettlement costs, annual budget, and sources of funding; (II) arrangements for approval of resettlement plan cost estimates; and (III) the flow of funds to reach people affected.
Procedures for the Resettlement Action Plan

The main recommendation is to implement, to the extent possible, all mitigation and monitoring measures as outlined in this framework, and as indicated in Chapter 6 of this document. Other suggestions would include:

(i) The project will consider alternative-engineering designs to minimize adverse social impacts resulted from land acquisition. Where the social impact assessment indicates that land acquisition and/or loss of assets is unavoidable, and in cases where a full ESIA is applicable (see Ch. 3), a sub-project RAP needs to be prepared. Generally, GoN requirements specify the undertaking of a RAP if the land acquisition in the project site affects more than 200 people, takes more than 10 percent of any holding, and involves physical relocation of population.

(ii) An abbreviated RAP is generally acceptable if fewer than 200 people are displaced even if more than 200 people are affected, and land acquisition is less than 10 percent and no physical relocation is involved. In case of most sub-projects of the SRCTIP Program, however, the number of affected HHs that need physically to be relocated due to road upgrading works is expected not to exceed 20. The respective provisions are therefore subject to be included in the Environmental and Social Management Plan which are the core of the IEEs to be prepared for such project types.

(iii) In case of road upgrading works (as is the case in the forthcoming SRCTIP sub-project, the preparation of the RAP will require data from house-to-house and plot-to-plot socio-economic baseline survey and income restoration measures. The individual RAP documents will be prepared in close consultation with APs, along with active participation of secondary stakeholders, such as local or national government, policy makers, advocacy groups, elected officials and NGOs and the RM/M Chairperson and will be disclosed to the APs. Further consultation and participation program will be conducted to ensure that information on the project objectives, implementation schedule, resettlement and land acquisition; eligibility and compensation issues are properly understood and accepted by the affected communities.

(iv) During project implementation, resettlement process will be coordinated with the timing of the civil works. The project will provide adequate notification and assistance to affected people so that they will be able to move without undue hardship before the commencement of civil works.

(v) In the case of land acquisition, the procedures will follow the provisions of the Land Acquisition Act, and the RPF. The subproject RAP after its approval by GoN and the World Bank, will be translated into the local language and made available in a public place accessible to affected people and other stakeholders. The project will ensure that civil works are not started on any subproject sites before compensation and assistance
to the affected population have been provided in accordance with the Resettlement Policy Framework.

Background

The Government of Nepal (GoN) has requested the World Bank (WB) for the loan support for the improvements and maintenance of existing roads that are of vital importance to the country’s economy and regional connectivity through the proposed Strategic Road Connectivity and Trade Improvement Project (SRCTIP). The project has three components: (1) Trade facilitation (2) Regional Connectivity Improvement and (3) Institutional Strengthening.

The Trade Facilitation Component covers the improvement of the existing infrastructure facilities and equipment at major border crossing points; improvements in sanitary-phyto-sanitary management (SPS), knowledge and capacity building support for improving capacity for managing trade. Trade Facilitation component will be implemented at existing selected ICD sites: Biratnagar, Birgunj and Bhairahawa. Following activities will be conducted under this component:

1. The level and quality of border infrastructure will be improved in select locations
2. Selected labs will be enhanced with equipment and/or accreditation to enhance market access for agricultural commodities
3. Access roads sections will be improved for better linkage to transport and the trade (Biratnagar ICD/ICP)
4. The parking yards around ICDs will be further expanded and improved to enhance the connectivity and trade, and
5. Capacity will be enhanced through training and facilitation.

Under the Trade Facilitation Component, stakeholder engagement and consultation is essential to engage people of the project vicinity as well as concerned groups and collect and incorporate their feedback and also to ensure their engagement throughout the entire project period.

The Ministry of Industry Commerce and Supplies (MoCIS) and Ministry of Agriculture and Livestock Department (MoALD) are the primary implementing agency for the project and is responsible for ensuring constructive and meaningful dialogue with the project’s stakeholders as per the prevailing law of Nepal as well as Environmental and Social Standard (ESS) 10 on Stakeholder Engagement and Information Disclosure, of the World Bank’s Environmental and Social Framework (ESF).

The objective of the Consultation Workshop was:

- Create awareness about the project, location, and benefits
- Disclose information about potential impacts of the project;
- Solicit feedback from stakeholders
- Meet regulatory requirements: GoN and World Bank
- Draw suggestions to enhance project design and impact mitigation

The Consultation Program was jointly organized by Ministry of Industry Commerce and Supplies (MoICCS) and Ministry of Agriculture and Livestock Development (MoALD) on 2nd March, 2020 at Nepal India Regional Trade and Transport Project’s Project Coordination Office meeting hall, Bhadrakali, Kathmandu. The program was chaired by Mr. Mahesh Acharya; Joint Secretary;
Ministry of Industry Commerce and Supplies. The major participants were focal persons from ministries and respective departments and 30 participants have actively participated in the consultation workshop.

Mr. Yubak Dongol, Director of NITDB welcomed all the guests and participant and thanked them for attending the program. He briefly gave an introduction about the program before leaving the floor to Mr. Prakash Poudel, Social Safeguard Specialist.

Mr. Prakash Poudel has talked about the objectives of the consultation and briefly presented the provision on Environmental and Social Management Framework (ESMF), Resettlement Policy Framework (RPF), Indigenous People Planning Framework (IPPF) and Stakeholders Engagement Plan (SEP) prepared for the Trade Facilitation Component of SRCTIP. Thenafter, the floor was opened for the participant for their queries, feedbacks and suggestion.

**Issue Raised and Response**

The invited stakeholders from respective ministries and departments have actively participated and shared their views and feedback. The summary of the issue raised/feedback and corresponding responses are as tabulated below in Table-1.

<table>
<thead>
<tr>
<th>SN</th>
<th>Issue Raised</th>
<th>Name/Organization</th>
<th>Response</th>
<th>Responsibility</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>What are the provisions/mechanisms incorporated for Establishment of fumigation center at ICD to fumigate goods being export from Nepal such as carpet, wooden carved items etc.  Proper management of solid waste and effluent, it should not be like in Birgung ICD  What about provision of the Plantation hence to maintain the sufficient greenery at project site</td>
<td>Mr. Rajan Sharma, Chairman Nepal Freight Forwarders Association (NEFFA)</td>
<td>• The general provision has been included in the ESMF of the Trade Component; the detail will be incorporated during the detailed design stage.  • The guideline will be reviewed and followed and incorporated the measures as appropriate.  • The provision has been included in ESMP and further detailed in ESMP during the Execution of the project</td>
<td>MoICS, MoALD-PCU</td>
</tr>
<tr>
<td>2.</td>
<td>Laboratory waste should be managed properly. Good laboratory practices shall be established</td>
<td>Dr. Modnath Gautam, Senior Veterenary Officer, Department of Livestock, MoALD</td>
<td>• The general provision has been included in the ESMF of the Trade Component.  • The detail will be incorporated in the ESMP</td>
<td>MoICS, MoALD-PCU</td>
</tr>

</tr>
<tr>
<td>Proper management of carcasses and ill livestock and birds especially during export</td>
<td>during the execution of the project.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3. During the construction and Operation of the project there will be impact on the agriculture nearby the construction site due to project activities how this issue will be managed? Dust management during construction works

Dr. Mahadev Prasad Poudel, Sr. Agro-Economist; Department of Agriculture; MoALD

The general provision has been included in the ESMF of the Trade Component. This issue will be brought forward during the detailed design phase and to the level extent suggestion will be incorporated.

MoICS, MoALD-PCU

4. What are the provision for the encroches, squatters and economically displaced people due to the implementation of the project? Conservation of the local indigenous cultural values and norms

Mr. Maahesh Acharya, Senior Plant Protection Officer; Plant Quarantine and Pesticide Management Centre, MoALD

The project does not required acquisition of the land. In addition most of the work will be confined in the closed boundary of existing ICD and ICP however, HHs that are migrated and settled along the roadside for day to day earning from the small tea shops, vegetable/fruit stalls, etc. which will be covered by RPF and IPDP

Generally the project do not expected to harm IPs. However meaningful consultation will be done with IP communities during detailed design and implementation of the project.

MoICS, MoALD-PCU

5. a. The issues related on GBV and equal wages for Male/Female will be ensured?

Mr. Dependra Kafle, Secretary, National Women Commission (NWC)

- The GBV risk mitigation plan will be prepared. The GBV issues will be minimized and mitigated based on the GBV risk mitigation plan.
- The Labor Management Procedure (LMP) ensure the equail wage for man and women.

MoICS, MoALD-PCU

Concluding Remarks
Mr. Mahesh Acharya; Joint-Secretary of Ministry of Industry Commerce and Supplies; explained that the trade component activities will be confined in existing sites of ICD/ICP hence there is no any major impact on land and structures as well as indigenous culture and values, national and international best practices will be adopted during the detailed design and implementation phase of the project. Moreover he request for any additional feedbacks and suggestion from the stakeholders that will be incorporated in the site-specific ESMP and will be part of BoQ item during the execution of the works.
Resettlement Policy Framework: SRCTIP-Trade Facilitation Component

Annex 1.2 PP Slides

Presentation Outline
- Workshop Objectives
- Project Description
- Key Highlights of Social and Environmental Impacts
- Regulatory Requirements and other Considerations
- Specific Impact Mitigation Plans
  - Environment and Social Management Framework (ESMF)
  - Resettlement Policy Framework (RPP)
  - Indigenous People Planning Framework (IPPF)
- Stakeholder Engagement Plan (SEP)
- Questions and Answer session
- Key take-aways/Next Steps

Workshop Objectives
- Create awareness about the project, location, and benefits
- Disclose information about potential impacts of the project;
- Solicit feedback from stakeholders
- Meet regulatory requirements: GoN and World Bank
- Draw suggestions to enhance project design and impact mitigation

SRCTIP-Components

Component 1: Trade Facilitation
- Infrastructure facilities and equipment at major border crossing points;
- Improvements in sanitary-phytosanitary management (SPS);
- Knowledge and capacity building support for improving capacity for managing trade.

Component 2: Regional Connectivity Improvement
- Improvement of Nagdhunga-Naulise-Mugling road to a 2-lane standard
- Upgrading of the Kamala-Dhakebar-Palhiaiya road from 2-lane to 4-lane,
- Implementation of a safety corridor demonstration program

Component 3: Institutional Strengthening
- Periodic maintenance program covering 5,000 lane-km of roads with high traffic within the Strategic Road Network.
Trade Facilitation Component

Contd.....

Trade Facilitation component will be developed at existing selected ICD sites: Biratnagar, Birgunj and Bhairahawa.

1. The level and quality of border infrastructure will be improved in select locations
2. Selected labs will be enhanced with equipment and/or accreditation to enhance market access for agricultural commodities
3. Access roads sections will be improved for better linkage to transport and the trade (Biratnagar ICD/ICP)
4. The parking yards around ICDs will be further expanded and improved to enhance the connectivity and trade, and
5. Capacity will be enhanced through training and facilitation.

Environmental Impacts

Sub-component
- Improvement of the level and quality of border at select locations
- Enhancement and improvement of selected labs with equipment and/or accreditation to enhance market access for agricultural commodities
- Improvement of the access roads for better linkage to transport and the trade (Biratnagar ICD/ICP)
- Expansion and improvement of parking yards around ICDs

Potential Environmental Impacts
- TemporaryKate used for the construction of the work
- Change in land use due to the construction of roads and infrastructure
- Potential risk of pollution during operations
- Accidental pollution of soil and nearby water bodies imported soil and imported goods that are contaminated
- Improper disposal of chemical wastes generated at laboratory analysis and other solid wastes from the labor story affecting surrounding environment
- Potential increase in local flooding and water logging from the built infrastructure reduced production of livelihood
- Geographical Health and Safety issues during construction and operation of trade facilitating infrastructure
- Improper disposal of construction wastes affecting local and/or water resources
- Change in land use from initial uses as agricultural or other subsistence activities.

Key highlights of Environmental and Social Impacts

Social Impacts ....

Sub-component
- Improvement of the level and quality of border at select locations
- Enhancement and improvement of selected labs with equipment and/or accreditation to enhance market access for agricultural commodities
- Improvement of the access roads for better linkage to transport and the trade (Biratnagar ICD/ICP)
- Expansion and improvement of parking yards around ICDs

Potential Social Impacts
- Economic Displacement of households
- Loss of private immovable assets
- Loss of source of livelihood
- Loss of common property resources
- Potential increase in labor influx
- Pressure in Clinic services
- Community health and safety impacts
- Potential increase in gender-based violence (GBV)
- Trafficking
- Child Labor/Fierce Labor
Regulatory Requirements and other Considerations

Specific Impact Management Plans

- Environment and Social management Framework (ESMF)
- Resettlement Policy Framework (RPF)
- Indigenous People Planning Framework (IPPF)
- Stakeholder Engagement Plan (SEP)

ESMF Contd....

- The ESMF has included a gap analysis between the GoN requirements vs. vs. ESF. The analysis indicated that each World Bank ESS has counterpart country legislations except that some of these legislations are not formally covered in the ESMF scope and process.
- These gaps are addressed in the ESMF to meet the requirements of the ESS including the preparation, adoption and implementation by MoC and MoALU of the RPF, PPF, Stakeholder Engagement Plan, Labor Management Procedures and the Environmental and Social Commitment Plan.
- A Project Coordination Unit (PCU) will be established within MoC/MoALU.
- The PCU will be responsible for the day-to-day implementation of the component and for coordinating with the Department of Roads and other the relevant implementing ministries/agencies.
- The PCU will have a Project Director, a full-time Project Coordinator and a Finance Specialist. The PCU will also recruit Specialists/Consultants for procurement, environmental and social safeguards, OHS and engineers.
- The PCU will also hire a Construction Supervision Consultant to oversee and supervise civil works.

---

Regulatory Contd...

- GoN Existing Environmental Acts, Policies and Regulations

- GoN Applicable National Social Laws and Regulations

Key International Conventions where GoN is Signatory

The World Bank's Environmental and Social Framework (ESF)

- 9 out of 10 (except 9th Financial Intermediaries) Environmental and Social Standards (ESS) of the World Bank are relevant in context of this Project

Environment and Social management Framework (ESMF)

- The ESMF serves as a guideline and sets out principles, rules and procedures to screen, assess, manage and monitor the mitigation measures of environmental and social impacts.
  - The environmental and social impacts refer to:
    - any change, potential or actual, to the physical, natural or cultural environment;
    - impact on people (including social aspects of labor, health, safety, IDPs, disadvantaged and vulnerable groups, equity and security) resulting from the project implementation.
  - This ESMF forms part of the comprehensive environmental and social management approach that is adopted for addressing potential environmental and social impacts. In line with ES Requirements of GoN and applicable 9 out of 10 Environmental and Social Standards (ESS) of WB the ESMF defines:
    - The approach for identifying the environmental and social issues associated with the SRCTIP trade component activities,
    - The requirements for conducting environmental and social screening and environmental and social assessment studies, and
    - Measures to avoid, minimize, mitigate and manage adverse impacts and enhance positive ones.

ESMF Contd....

The Environment and Social Management Framework is structured along the lines:

- Chapter 1: Introduction
- Chapter 2: Overview of the Project Area
- Chapter 3: Regulatory and Legal Framework
- Chapter 4: Potential Environmental and Social Impacts
- Chapter 5: Environmental and Social Management Process for the SRCTIP
- Chapter 6: Generic Environment Management Measures / Codes of Practice
- Chapter 7: Stakeholder Engagement Framework
- Chapter 8: Institutional Arrangements (including monitoring and reporting).
- Annexure
Resettlement Policy Framework (RPF)

- This RPF has prepared relevant strategies in full compliance with Government of Nepal (GoN) policies and with Environmental and Social Standards (ESS) 5: Land Acquisition, Restrictions on Land Use, and Involuntary Resettlement.
- Land acquisition is not expected under the Trade component as land already acquired by the GoN, however, physical and/or economic displacement may be required.
- The RPF has been developed at this stage of the project provides policy, strategy, process and procedures to be applied to meet the needs of the people who may be affected by the project.
- Resettlement Action Plan (RAP) will be developed when relevant feasibility studies as well as environmental and social studies are conducted during the detail design phase and resettlement impacts are known.

Indigenous People Planning Framework (IPPF)

- This IPPF has prepared relevant strategies in full compliance with Government of Nepal (GoN) policies and with Environmental and Social Standard (ESS) 7: Indigenous People.
- This IPPF provides policy, strategy, process and procedures to understand project impacts on Indigenous Peoples (IPs) under the SRICTP Trade Facilitation Component.
- Adhering to this framework the project/sub project should develop Indigenous People Development Plan (IPDP). This will be identified during the project screening and ESA if any.
- The SRICTP Trade Facilitation Component is not expected to:
  - Require the acquisition of any land of IP communities
  - Indicate IP communities from their location
  - Have any impact on the cultural practices of IP communities.
- No IP impacted however, this IPPF recommends meaningful public consultation activities and information dissemination to Indigenous People.
- Specific sites and sub projects have not been selected yet some of the construction-related impacts might expected on Indigenous Peoples (IPs) and IP communities although the scale is expected to be manageable.

Stakeholder Engagement Plan (SEP)

- SEP has been developed to ensure the process of continuous interaction with the project stakeholders in the course of preparation and implementation of the SRICTP Trade Facilitation Component.
- This process is essential for the Project’s successful planning, implementation, the effectiveness of the Project.
- Through this SEP MoICS and MoAHD demonstrates its openness, responsiveness and willingness to embark on the continuing dialogue with its stakeholders according to the prevailing law of Nepal as well as the World Bank Environmental and Social Standards (ESS) 11: Stakeholder Engagement and Information Disclosure.
- SRICTP Trade Facilitation Component emphasizes the significance of close involvement of the communities and their representatives in the Project Area of Influence by the process of informed consultation, participation and good faith negotiation throughout the Project lifecycle.
- To achieve this, the SEP is intended as a public document that can be open for discussion with the stakeholders and will be subject to regular revision to remain up-to-date and to reflect outcomes of the continued engagement.

RPF Contd....

- The SRICTP Trade Facilitation component, sub project activities are not expected to require land acquisition, relocation of any communities or groups. Impacts to any cultural heritage or practices.
- However, Squatters, encroachers and street markets may exist within the project influence area, some land may be temporarily required, such as for labor camps, and for stockpiling of construction materials.
- Construction-induced impacts may occur during the construction phase, which will be mitigated.
- The RPF recommends meaningful public consultation activities and information dissemination to affected people (APs).
- A project-level grievance redress mechanism will be established which will allow affected persons and other related stakeholders to appeal any disagreeable decisions.
- A PCU will be established within MoICS/MoAHD. The PCU will be responsible for the overall planning, budgeting, approval and implementation of the RAP of the sub-project.

IPPF Contd.....

- Also, based on experience in Nepal, occupational and community health and safety, labor influx, gender-based violence, child and forced labor and poor labor and working conditions of workers are some of the anticipated impacts that equally impact on the IP communities if any.
- The PCU will prepare an Indigenous People Development Plan (IPDP) if it is determined that the sub project will have significant impacts on IPs.
- Specific implementation measures for indigenous peoples cover the development and implementation of various strategies such as inclusion, program planning and capacity development etc.
- Regular monitoring of IPDP implementation will be conducted by the PCU E&S team.
- A project-level grievance redress mechanism will be established which will allow affected persons and other related stakeholders to appeal any disagreeable decisions.
- A PCU will be established within MoICS/MoAHD. The PCU will be responsible for the overall planning, budgeting, approval and implementation of the RAP of the sub-project.

SEP Contd....

- The SEP consists of the following elements:
  - Outline of the potential environmental and social issues associated with the Project and stakeholder need
  - Identification of the SRICTP Trade Component Stakeholders and their analysis
  - Stakeholders mapping and stakeholder engagement as summary proposed stakeholder engagement activities and methods for future engagement
  - Strategies for information disclosure communication and consultations methods vulnerable groups, indigenous people and resettlement planning process
  - Stakeholders engagement management system
  - Grievance Mechanism enabling the lodging and addressing of complaints from the stakeholders
  - Indicators for monitoring and reporting
  - Roles responsibilities and resources to ensure effective implementation of the SEP at various phases
- PCU established within MoICS/MoAHD invites its stakeholders to take part in ensuring that this SEP functions as a live interactive document and welcomes feedback on the proposed process of employment.
