GUIDE TO THE WORLD BANK MONTHLY OPERATIONAL SUMMARY

The *World Bank Monthly Operational Summary* (MOS) reports on the status of projects in the World Bank’s pipeline from the time the operation is identified to the signing of the Loan, Credit, or Grant Agreement. It is a detailed accounting of the projects included in the country lending programs that are actively being prepared for implementation. The lending programs reflect the Bank’s strategy for each member country as set out in the Country Partnership Framework (CPF) presented to the Board of Executive Directors of the World Bank. On average, it takes about 13 months for the Bank to process a project from concept to approval. After a financing agreement is signed or a project is dropped from the program, the project entry is deleted from this summary. Each issue of the summary contains a list of projects reported for the first time and the list of projects deleted from the current issue. Familiarity with the Bank’s project cycle, summarized in the following paragraphs, can help potential bidders identify business opportunities with Bank borrowers. Each entry in the MOS indicates at what point the operation is in the project cycle.

**Project Cycle**

During **IDENTIFICATION**, the client government and the Bank identify a specific operation as being likely to support the country’s development strategy and the Bank’s CPF.

During **PREPARATION**, the client government identifies and discusses the technical and institutional alternatives for achieving the objectives of a project. Preparation usually requires feasibility studies followed by more detailed studies of the alternatives that promise to yield the most satisfactory results. An environmental assessment is usually carried out during this phase. (See below for more information on environmental assessment.) In the preparation stage of the project cycle, clients often supplement their own efforts by hiring consultants to carry out a major part of the work. Contractors and suppliers of equipment and goods need to start making contacts with country officials during this stage.

During **APPRaisalAL**, the Bank conducts a comprehensive review of all aspects of the project (technical, institutional, economic, and financial), laying the foundation for implementing the project and evaluating it when completed. Project appraisal is conducted by Bank staff and may be supplemented by individual experts. The preparation of the Project Appraisal Document concludes this stage.

During **NEGOTIATIONS**, discussions are held with the client government, and the agreements reached are written into the loan documents. Upon completion of negotiations, the project is presented to the Bank’s Board of Executive Directors for approval. After approval, the financing agreement is signed.

Project **IMPLEMENTATION** normally starts within a few months after the project financing agreement is signed. Countries, through their implementing agencies, have full responsibility for executing World Bank-financed projects, including procuring goods and works and hiring consultants. Contractors and suppliers, therefore, should contact appropriate officials of the implementing agency to express their interest in specific projects and obtain information on what goods and services will be needed and when and how to submit bids and proposals.

Consultants are often used during project implementation to provide technical assistance and other project implementation support. Consultants in particular should contact the responsible implementing agency early in the project preparation period to express their interest. Contracts for consulting services, as well as some for goods and works, may also be procured prior to loan/credit/grant approval. This is known as advance contracting.

The information contained in the MOS is intended to enable companies to assess their interest in supplying Bank-financed projects. Further information should be requested from the country’s project implementing agency. The likelihood of a timely response is greater if the queries are brief and to the point. When possible, travel to the country; direct contact with relevant agency officials is recommended.

Firms should contact the World Bank only if they are unable to obtain a response to their queries from the implementing agency. General information about business opportunities under Bank loans, credits, and grants may be obtained from the World Bank’s Procurement Policy and Services Group’s website at [http://www.worldbank.org/en/projects-opera-tions/products-and-services/procurement-projects-programs](http://www.worldbank.org/en/projects-operations/products-and-services/procurement-projects-programs) and (click on “Browse Contract Awards and Notices by Country” in the Related Links at the bottom of the webpage).

Business opportunities under World Bank-financed appear twice a month in *UN Development Business* and are available via the internet at
https://www.devbusiness.com/. The website also includes invitations to bid and submit proposals, notices of contract awards, and General Procurement Notices.

Environmental Categories

The type, timing, and scope of environmental analysis to be performed by Bank clients are confirmed when a given project is identified. Projects are assigned one of the following categories, depending on the nature, magnitude, and sensitivity of environmental issues:

**Category A:** The project may have adverse and significant environmental impacts. Full environmental assessment is normally required.

**Category B:** The project may have specific environmental issues. Partial environmental assessment is normally required.

**Category C:** Likely to have minimal or no adverse environmental impacts. Beyond screening, no further EA action is required.

**Category FI:** Involves investment of Bank funds through a financial intermediary, in subprojects that have adverse environmental impacts. An environmental framework may be required.

**Category U:** No category given.

The World Bank has three basic lending instruments: (ii) Investment Project Finance which provides financial support for goods, works and services for a pre-defined specific project; (ii) Development Policy Finance (DPF) which supports countries’ policy and institutional reforms in a sector or the economy as a whole and provides quick-disbursing budget support; and (iii) Program-for-Results (PforR) which finances parts of a larger government program, with disbursements linked to results or performance indicators. DPF and PforR operations are not included in the MOS because these instruments are not designed to provide procurement opportunities since the funds are disbursed directly to government accounts.

A typical summary entry looks like this:

**MOS: A Typical Record**

- **Morocco**
- **Energy and mining**
- **(R) MA-Clean and Efficient Energy:** The project development objective is to support the Borrower to increase supply of clean energy and to meet demand more efficiently among targeted customers. Concept completed on 12 November 2012 Environmental Assessment Category B. Project: P145689.
- **US$125,000,000 (IBRD/CCT):** Consultants will be required. Office: National des Electriques et du FEau Potable (ONEE). Tel: 212 220 68 800; E-mail: faoe@onee.ma. Contact: Mohamed Faite, Director.

The Global Environment Facility (GEF)

In addition to projects financed by the World Bank, the *World Bank Monthly Operational Summary* reports on projects financed by the Global Environment Facility (GEF).

The GEF was established in 1991 by a Resolution of the World Bank Executive Directors as a pilot program to assist in the protection of the global environment and to promote environmentally sound and sustainable economic development. The GEF operates as a mechanism for providing new and additional grant and concessional funding to meet the agreed incremental costs of measures to achieve agreed global environmental benefits in the focal areas of climate change, biodiversity, international waters, land degradation chemicals, sustainable forest management (SFM)/REDD+, and under the Least Developed Countries Fund (LDCF) and the Special Climate Change Fund—adaptation to climate change. The GEF consists of an Assembly of 183 participating countries, a Council, a Secretariat a Scientific and Technical Advisory Panel, and 18 Implementing Agencies – ADB, AfDB, BOAD, CAF, CI, DBSA, EBRD, FAO, FECO, FUNBIO, IADB, IFAD, IUCN, UNDP, UNEP, UNIDO, WBG, and WWF.
As one of the Implementing Agencies of the GEF, the World Bank assists its member countries conserve and sustainably use their biological diversity, reduce their emissions of greenhouse gases and adapt to climate change, manage shared water bodies and reduce their emissions of ozone-depleting substances by accessing GEF resources to cover the incremental costs of additional actions on these global issues.

To be eligible for GEF co-financing, projects must be consistent with at least one of the GEF's 'Operational Programs' and meet the GEF project eligibility criteria.

Finance, Competitiveness and Innovation

(R) Integrated Development and Competitiveness Project: Improving the enabling environment for private sector growth and enhancing the competitiveness of selected value chains in agriculture, tourism, and transport services sectors.

Economic Governance Technical Assistance - AF: 1. Comoros' three islands form one of the smallest African countries. With an estimated 760,000 inhabitants, spread among three islands, the country remains mired in poverty. Gross Domestic Product (GDP) per capita is estimated at US$785 and, based on 2004 estimates, about 45 percent of the population lived below the poverty line, an incidence that has probably increased since then. Poverty incidence varies considerably across regions and is typically higher in rural areas and on the island of Anjouan. The primary sector of the economy (mainly subsistence agriculture, a few cash crops, and fisheries) and retail services dominate the economy, representing about one-half and one-fifth of the country's GDP, respectively. Cash crops comprise mainly three high-value export crops - vanilla, cloves and ylang-ylang - and constitute most of the export earnings in goods, equivalent to a mere 4 percent of GDP. The third largest sector is government services, representing about 10 percent of GDP. Despite the potential in tourism, the country has failed so far to tap into the growing role of this sector in the region. With longstanding outmigration, the country benefits from large and growing remittances at close to 20 percent of GDP from the Comorian diaspora, mainly in France. The diaspora also represents the main source of visitors from abroad. 2. Confirming a new commitment to reform, the Union of the Comoros adopted a Poverty Reduction Strategy Paper (PRSP) for the period 2010-2014, which was endorsed by partners, including the World Bank.5 The strategy has the following core objectives: (i) stabilize the economy and lay the groundwork for strong and equitable growth; (ii) strengthen key sectors by focusing on institution-building and ensuring a broader role for the private sector; (iii) strengthen governance and social cohesion; (iv) improve the health status of the general public; (iv) promote education and vocational training with the aim of developing human capital; and (v) promote environmental sustainability and civilian security. 3. In support of its PRSP, the government has finalized a comprehensive Public Financial Management strategy for the coming decade (2010-19) and adopted a detailed Action Plan for 2010-12. The proposed strategy is organized around four pillars: (i) modernizing the legislative and regulatory framework and strengthening institutional capacity; (ii) rationalizing budget preparation; (iii) strengthening budget execution; and (iv) increasing transparency through improved internal and external controls. The action plan (the first in a series of rolling triennial plans) provides a detailed, sequenced and budgeted list of actions mapped to specific lead institutions within the administration. Its implementation relies on two committees that include Union and island representatives: The CREF (which acts as a secretariat of the Comité Budgétaire) that is responsible for the implementation as well as monitoring and evaluation of the national PFM reform strategy, and the HASC that is in charge of leading the civil service reform, including management of personnel rosters, new recruitments into the civil service and implementation of the organic frameworks. 4. Notwithstanding this new dynamism for PFM reforms, important challenges remain. The 2007 Public Expenditure and Financial Assessment (PEFA) review rated Comoros at the lowest possible score, on 22 out of 28 key indicators. This evaluation emphasized weaknesses at all levels of public financial management (from formal institutions and procedures to actual implementation and processes), and puts Comoros squarely in the 'lower performance league' of African countries. 5. Major weaknesses contribute to reduce the Government's efficiency in terms of budget preparation, execution, and reporting. Despite recent improvements and efforts to enhance cooperation via the Comité Budgétaire, budget preparation remains non-participatory with consultations between Union and Islands fragmentary and unstructured. As a result, the budget is established mainly on the basis of economic and financial constraints, and is largely disconnected from policy priorities. With revenues barely covering wages and recurrent expenditures, there is limited scope for using the budget as a tool for resource allocations. In addition, the budgetary nomenclature is still based on administrative classifications and does not permit establishing a direct link between the budget (preparation and monitoring) and the government's policy priorities or tracking priority expenditures through the budget cycle. With respect to execution, the legal and
procedural framework is outdated and moreover poorly understood even by those in charge of the administrative phase of execution (credit managers). As a result normal procedures are often circumvented through a proliferation of exceptional procedures and significant gaps appear between budgeted and actual amounts. Thus the informational and authorization functions of the budget are severely undermined. At the Treasury level, serious structural weaknesses were again compounded during the reconciliation period, which saw a breakdown in communication and systems across levels of Government. As a result key public accounts documents are simply never produced. 6. PFM information systems and financial control mechanisms are generally rudimentary and obsolete, and lack an integrated financial management information system. Except for the recently implemented ASYCUDA++ for customs operations, the only systems in place are software applications for wage bill calculation and external debt management. 7. Comoros' civil service absorbs an inordinate share of the Government's resources, while delivering poor quality services to the population. During the period of decentralization, most central administrative structures were simply duplicated in each autonomous island (without regard for administrative efficiency or financial sustainability). Correspondingly the civil service roster increased from less than 6,000 in 1999 to some 12,000 in 2008, with a concomitant rise of wage and salaries expenditures from 6.2 to 9 percent of Gross Domestic Product (GDP), a loss of institutional memory and a dilution of already scare human resources. Moreover, the often discretionary nature of these appointments has weakened the significance of positions and job descriptions within each public institution. 8. The government has taken steps to improve the effectiveness of public administration and gradually reduce the wage bill, but much remains to be done. The HASC has supervised the establishment of a unified computerized civil service roster (for the Union and Islands) and contracted the development of an integrated civil service and wage management software. It has also carried out a vast review of the existing organizational structures of each administration (cadres organiques) an updated version of which has been adopted by Parliament in 2010 and will be gradually implemented. Nevertheless, there are numerous remaining challenges. For example, the civil service roster will only become a useful management tool once a physical census of all civil servants has been completed to clean up and validate the data. Also, much work is needed to develop feasible strategies for implementing the new organizational structures over time and with due consideration for social consequences. 9. In January 31 2011, the Bank approved a grant in the amount of SDR 1.2 million (USD 1.8 million equivalent) to support the country's PFM and civil service reform programs. The original project development objectives are (i) to increase the efficiency, accountability and transparency of public financial management and (ii) to improve the management of civil service human resources and wages. The disbursement percentage as of December 18, 2012 is about 67%. 10. A midterm performance review was conducted in March 2012 and followed by a supervision mission in October 2012. Overall, progress towards achieving the PDOs and implementation progress of the activities were found satisfactory. However, the team noted a financing gap of about $1.5 million to implement the remaining activities of the project, including the PFM information system and the implementation of the recommendations of the HR assessments and reviews (physical census of the civil servants, wages paid by checks, organic frameworks). In addition, the policy dialogue with the Ministry of Finance highlighted the weak macroeconomic management capacities which undermine the country's ability to formulate expenditure policy decisions based on sound assumptions and data. To address this challenge, the authorities have requested the Bank's support to conduct economic management studies to inform budget preparation processes and sectoral analysis. 12. The purpose of the additional financing is to support the implementation of those activities. More specifically, the additional activities are following: (i) Acquire and roll out a system covering budget preparation, budget execution, and accounting and reporting; (ii) design and build the required network (LAN and WAN) so that the module could be used by the Treasury services throughout the territory (iii) support the implementation of the HR assessments and reviews (physical census of the civil servants, wages paid by checks, organic frameworks) (iv) economic management studies to inform budget preparation processes and sectoral analysis. 13. Moreover, the original date closing date is set for December 31, 2013. According to the IT master plan, the acquisition and roll out of the budget and accounting system would take up to 18 months. Therefore an extension of the closing date of the parent project is proposed until December 31, 2015. 14. No other changes are proposed to the project's development objectives as the additional activities fit within the originally conceived objectives. Approval completed on 12 November 2013. Transport & Digital Development

Nigeria Green Belt Corridors Development Program: The proposed Program Development Objective (PDO) of the Nigeria green belt corridors development program is to improve transport and trade connectivity and facilitate market integration along Nigeria’s key economic corridors.

This is a multi-sectoral complex and long-term undertaking that requires adopting a multiphase programmatic instrument/approach (MPA). The Government of Nigeria (GON) has requested financing for the improvement of critical road infrastructure and logistics services along the economic corridors spread in the gateway states, south eastern region, north western region and River Nile corridor. The request includes 23 road projects with a total length of about 2,400km. The investment requirement for the urban renewal is anticipated to be high. Private investment is required to operationalize the SEZs and establish commodity exchange centers. Therefore, the proposed program will be implemented in phases.

This MPA will support an integrated approach to economic corridor development with a focus on: i) upgrading priority transport corridors at the national and sub-national levels; ii) improving logistics infrastructure and services; and iii) creating an enabling environment for private investment.

Phase 1 will focus on improving priority transport corridors at the national and sub-national levels, whilst developing the interventions that will support the economic transformation by addressing key regulatory gaps along the economic corridors.

Phases 2 and 3 will expand the support for spatial transformation and regional economic integration through the development of economic development corridors and other complementary interventions with multi-sectoral interventions at national and sub-national levels.

**Groundnut Competitiveness and Agriculture Diversification Project:** Objective to be Determined. The Project development objectives are to address critical impediments to commercial agriculture competitiveness and accelerate agricultural modernization in lagging regions.

The project will consist of combination of reforms measures and targeted investments that would (i) increase productivity, reduce volatility to production and market risks and increase export of high quality groundnuts and expand (ii) enhance diversification of groundnut based agricultural production systems and expand horticultural production and exports from such areas.

Th Project will support key reforms and investments under the government development plan (Plan Senegal Emergent) and its agricultural chapter which is the Agricultural growth acceleration program (PRACAS). Through the program disbursement linked indicators (DLIs) the project will focus on the following areas:

1. Accelerating the groundnut value reforms, including, the establishment of a more targeted and cost-efficient inputs and mechanization support programs, strengthening the quality groundnut seeds and export quality controls, and creating a leveled playing field to farmers and private sector investment along the value chain to drive productivity through a commercially viable seeds production system, contract farming, competition in groundnut collection, marketing and processing and exports. Completion of the privatization of the government re-owned company SONACOS would be critical to achieving these goals;
2. Improve management of risks associated to groundnut production and induced volatility to farmers revenues through support access to climate smart technologies for increasing and stabilizing groundnut productivity growth, accelerate diversification of groundnut cropping systems through expansion of small scale irrigation and other production enhancing rural infrastructure (e.g. for soil and water, pasture management/paddocks and grazing areas) and support to short cycle livestock value chains (poultry, small ruminant, beekeeping, etc.); 

3. Support agricultural marketing and value chain consolidation with improved rural urban linkages through feeder and connecting roads, aggregation/storage and processing parks in and/or around selected cities/economic poles in the groundnut producing regions.

4. Facilitate of business alliances with off-takers, including through market tests, easing access to business advisory services, financial services including credit, warehouse receipts and agricultural insurance.

The project will build on and coordinate with WAAPP and its subsequent phase, and extends achievement under +15 years Bank support on horticultural exports through various operations (PPEA, PDIDAS, PDIDAS).

The project will be a multi-sectoral effort led by AgGP and involving Transport, GSUR, T&C and IF, and will partner with the private sector -in particular agribusiness firms willing to invest in project intervention areas) in a quest of implementing the CASCADA approach. The WBG team will also coordinator with key development partners involved in the sector, such as USAID which is partnering with the Bank on analytical work on groundnut and agricultural competitiveness in general, as well as EU, Canadian Cooperation and AFD, which are long standing partners to GoS in the groundnut producing areas. Governance

Health, Nutrition & Population

South Sudan Health Services Support Project: South Sudan is experiencing major escalating humanitarian, development, economic and security crises of unprecedented proportions, affecting all parts of the country, as well as neighboring countries. The drop in oil prices and the large expenditures related to the conflict has led to hyper inflation (exceeding 800 percent in Nov 2016), where the country’s economy is on the verge of a collapse. Social indicators are among the worst in the world and have worsened during the civil war. The peace dividend in this area is to restore normalcy and for the Government to restart the process of public service delivery.

In this context, the Bank has supported the delivery of primary health care and procurement of pharmaceuticals in the country’s two most conflict-affected and densely populated states—Upper Nile and Jonglei—through the Health Rapid Results project (HRRP) (approved April, 2012). In anticipation of the project’s closure (end-March 2018), the Government formally requested on July 21, 2017 financial support to ensure sustainability of the health programs and their development impact. Without the proposed Bank support to the Upper Nile and Jonglei states, there would no financing for these states. The overarching objective of the new operation would be to increase coverage of essential health services in the Upper Nile and Jonglei states, while building the capacity for implementation, coordination, monitoring and evaluation. The other states are covered by the Health Pooled Fund (HPF) donor partners, led by DFID. The Bank is working in close coordination with the DFID and other partners.

Identification completed on 19 September 2017. US$ 40.0 (IDA Credit). Consulting services to be determined. Implementing agency(ies) to be determined.

South Sudan Health Rapid Results AF: The additional financing to Rapid Results Health Project will ensure continuity of high impact primary health care services in Upper Nile and Jonglei States of South Sudan. The project development objectives (PDGs) are: (i) to improve the delivery of high impact primary health care services in Recipient’s states of Jonglei and Upper Nile; and (ii) to strengthen coordination and monitoring and evaluation capacities of the Ministry of Health. The additional financing will provide support to the two original components: i) Component 1 will support Delivery of high impact Primary Health Care services; ii) Component 2 will strengthen capacity of MOH at the national level. The project will also support performance based contracting, exact details of the amounts to be financed from the HRTF (possibly for amounts up to US$15 million) are still being discussed. Approval completed on 13 March 2014. Environmental Assessment Category B. Project: P146413. US$ 10.0/25.0 (IDA Credit/IDA Grant). No consultants are required.

**Second Scaling Solar Guarantee:** Objective to be Determined. The project development objective is to increase solar electricity generation capacity and diversify electricity generation resources in Zambia. The project development objective is to increase solar electricity generation capacity and diversify electricity generation resources in Zambia. The project development objective is to increase solar electricity generation capacity and diversify electricity generation resources in Zambia. Approval completed on 20 December 2017. Environmental Assessment Category B. Consulting services to be determined. Implementing agency(ies) to be determined.

**Environment & Natural Resources**

**Transforming landscapes for resilience and development in Zambia:** The project development objective is to increase the ecosystem resilience and productivity within vulnerable landscapes and enhance the disaster related preparedness of Zambia Identification completed on 16 August 2017. Environmental Assessment Category B. US$ 75.0/75.0 (IDA Credit/GCF). Consulting services to be determined. Implementing agency(ies) to be determined.

**Additional Financing for Zambia Strengthening Climate Resilience (PPCR Phase II):** The development objective of the project is to strengthen Zambia's institutional framework for climate resilience and improve the adaptive capacity of vulnerable communities in the Barotse sub-basin. The project involves three components:

1. Strategic National Program Support, aiming to strengthen the national institutional and financial framework for climate resilience, by (a) providing institutional support to the national climate change program; and (b) strengthening climate information.

2. Support to Participatory Adaptation, through strengthening of the adaptive capacity of vulnerable rural communities in the Barotse sub-basin.

3. Pilot Participatory Adaptation, through the funding of actual participatory adaptation investments in the Barotse sub-basin, including (a) community adaptation sub-grants; (b) establishment and operation of an adaptation contingency fund; and (c) rehabilitation and strengthened management of traditional canals. Identification completed on 9 November 2017. Environmental Assessment Category B. US$ 14.6 (CIF). Consulting services to be determined. Implementing agency(ies) to be determined.

Regional

Agriculture

(R) West Africa Agricultural Transformation Project: The Project Development Objective (PDO) is to accelerate the adoption of improved agricultural technologies and innovations by small scale producers and to contribute to the improvement of the enabling environment for regional market integration in the ECOWAS region, and to enable the participating Governments to respond promptly and effectively to emerging challenges. Concept completed on 16 February 2018. Environmental Assessment Category B. Project: P164810. US$ 296.0/80.0/24.0 (IDA Credit/IDA Grant/GAFS). Consulting services to be determined. CORAF/WECARD.

AFCC2/RI-Regional Pastoral Livelihoods Resilience: The Project Development Objective (PDO) is to enhance livelihood resilience of pastoral and agro-pastoral communities in cross-border drought prone areas of selected countries and to improve the capacity of the selected countries’ governments to respond promptly and effectively to an eligible crisis or emergency. This second phase prepared through an Additional Financing aims at including Ethiopia in the project, as it has participated in most of the preparation process, together with Kenya, Uganda and IGAD. The RPLRP offers an innovative, comprehensive, and flexible response to pastoralists’ vulnerability to drought by delivering key regional public goods to enhance their livelihoods. Building on a high-level agreement, the RPLRP embodies the first attempt in the HoA to deliver country-specific outputs directly linked to region-driven goals. RPLRP innovation also applies to the use of the Information and Communication Technology (ICT). Whenever possible, the RPLRP will be implemented through a sustainable landscape approach along cross-border livestock routes and corridors. These routes and corridors will be central in targeting geographical cross-border clusters of sub-counties in Kenya and woredas in Ethiopia to deliver investments and services using this cross-border cluster approach. Selected clusters will receive a comprehensive package of investments and services. Approval completed on 21 October 2014. Environmental Assessment Category B. Project: P150006. US$ 75.0 (IDA Credit). Consultants will be required. Forum for Agricultural Research in Africa MDTF - Additional Financing: This is a request for an extension of and additional financing for the ongoing Forum for Agricultural Research in Africa (FARA) Multi-Donor Trust Fund (MDTF) (P1126840/TF071192). It is currently financed by the Canadian International Development Agency (CIDA), UK’s Department for International Development (DFID); the European Commission (EC); and The Netherlands, and managed by the Agriculture, Rural Development and Irrigation unit (AFTA2). FARA has been operating on a 10-year Strategic Plan (2007-2016) developed to add value to the support provided by the sub-regional organizations (SROs) to strengthen African National Agricultural Research Systems (NARS). The strategy was designed to be implemented in 2 five year phases with corresponding Medium Term Operational Plans (MTOPs) which detail implementation of the strategy. Due to delays in obtaining donor funding under the original MDTF, the Strategic Plan period was adjusted to cover the period 2009-2018. The FARA MDTF was established at the World Bank in 2009 to support the first phase of the strategic plan, MTOP I (2009-2013). It has been under implementation for the past three and a half years and implementation has been satisfactory. It is scheduled to close on December 31, 2013. Several of the MDTF participating donors are in favor of and have recommended a 5-year extension of the MDTF (in line with the Bank’s revised guidelines on extension of closing dates, April 2013) to support a smooth transition to FARA’s second MTOP (2014-2018). The associated proposed Additional Financing would support implementation of MTOP II. Initial confirmed funding to launch implementation has already been secured from one donor. Approval completed on 13 December 2013. Environmental Assessment Category B. US$ 20.0 (CDP4). Consulting services to be determined. Forum for Agricultural Research in Africa (FARA) Tel: (233-302) 772-823, E-mail: yakinbamijo@fara-africa.org, Contact: Dr. Yemi Akinbamijo, Executive Director.

Strengthening Agricultural Higher Education in Africa: Develop relevant high-level agricultural skills while strengthening integration between higher agricultural education, research, entrepreneurship, and extension services at selected African universities in regional Key Gaps Areas Concept completed on 23 January 2018. Environmental Assessment Category B. Project: P164702. US$ 170.0/30.0 (IDA Credit/IDA Grant). Consulting services to be determined. Ministry of Education (Malawi); Ministry of Education (Ghana); RUFORUM; Ministry of Education (Cote d’Ivoire); Ministry of Education (Cameroon).
Additional Financing for West Africa Agricultural Productivity Program (WAAPP- 1C): To generate and accelerate the adoption of improved technologies in the participating countries’ top agricultural commodity priority areas that are aligned with the sub-region’s top agricultural commodity priorities, as outlined in the ECOWAP. Approval completed on 3 February 2017. Environmental Assessment Category B. Project: P158983. US$ 53.0 (IDA Credit). No consultants are required. Ministere de l’Economie et de Finances/ Caisse Autonome d’Amortissement; Ministere de l’Economie et des Finances, Contact: Sani Yaya, Ministre; Ministre de l’Economie et des Finances; Ministere du Plan du Niger.

WAAPP -2A - Support to Groundnut Value Chain in Senegal: The development objective of WAAPP-2A is to scale-up the generation, dissemination and adoption of improved technologies in the participating countries’ priority agricultural commodity areas. Approval completed on 17 May 2016. Environmental Assessment Category B. Project: P158265. US$ 20.0 (IDA Credit). No consultants are required. Implementing agency(ies) to be determined.

Association for Strengthening Agricultural Research in East and Central Africa Multi-Donor Trust Fund: This is a request for Additional Financing to support the existing ASARECA MDTF (P112600, TF071104). A Multi-Donor Trust Fund (MDTF) was established at the World Bank in 2008 to support a program of integrated agricultural research for development, as described in ASARECA’s 5-year OP (2008/09-2013/14). The MDTF is intended to facilitate donor interaction, coordination and harmonization (including harmonization of procedures and formats to be applied by ASARECA), which is essential to effectively and efficiently assist the further institutional development of ASARECA. The project has been under implementation for the past 3.5 years and implementation progress has been satisfactory. Original donor pledges were expected to reach $55 million and this target has been met. New contributions totaling $4 million will be used to scale up the results of existing sub-projects within the remaining timeframe of the grant (19 months). No new activities are planned. Identification completed on 21 May 2012. Environmental Assessment Category B. US$ 5.6 (CDP4). Consulting services to be determined. Association for Strengthening Agricultural Research in Eastern and Central Africa (ASARECA), Contact: Seyfu Ketema, Executive Director.

Great Lakes Regional Integrated Agriculture Development Project: The Project Development Objectives are: (i) to increase agricultural productivity and commercialization in Targeted Areas in the territory of the Recipient and improve agricultural regional integration; and (ii) to provide immediate and effective response in the event of an eligible crisis or emergency. Approval completed on 5 May 2017. Environmental Assessment Category B. US$ 25.0 (IDA Grant). Consulting services to be determined. Ministry of Agriculture and Livestock.

Association for Strengthening Agricultural Research in East and Central Africa Multi Donor Trust Fund: This is a request for an extension of and additional financing for the ongoing Association for Strengthening Agricultural Research in Eastern and Central Africa (ASARECA) Multi-Donor Trust Fund (MDTF) (P112600/TF071104). It is currently financed by the Canadian International Development Agency (CIDA), UK’s Department for International Development (DFID); the European Commission (EC); and United States Agency for International Development (USAID), and managed by the Agriculture, Rural Development and Irrigation unit (AFTAI). ASARECA, a sub-regional not-for-profit association has been operating based on a 10 year Strategic Plan (2008-2018) developed to support the sustainable competitiveness of Eastern and Central Africa agricultural research systems through support to prioritized areas of research for development. The strategy was designed to be implemented in 2 five year phases with corresponding Medium Term Operational Plans (MTOPs) which detail implementation of the strategy. The ASARECA MDTF was established at the World Bank in 2008 to support the first phase of the strategic plan, OPI (2008-2013). It has been under implementation for the past 4 and a half years and implementation has been satisfactory. It is scheduled to close on December 31, 2013. Donor support has been very strong for the OPI. Original donor pledges totaled $55 million. This target was not only met, but exceeded following an additional contribution of $5.6 million in the second half of 2012. Total contributions to date have passed $60 million. A number of the MDTF participating donors are in favor of and have recommended a 5 year extension of the MDTF to support a smooth transition to ASARECA’s second MTOP (OPII) (2014-2018). The associated proposed Additional Financing would support implementation of OPII. Initial confirmed funding to launch implementation has already been secured from two donors. Identification completed on 23 July 2013. Environmental Assessment Category B. US$ 30.0 (CDP4). Consulting services to be determined. Implementing agency(ies) to be determined.

Eastern and Central Africa Agricultural Transformation Project: The development objective is to enhance regional collaboration to improve productivity, climate resilience, and competitiveness of selected agricultural commodity value chains and increase smallholder farmer access to the regional market for food commodities and products Identification completed on 8 November 2016. Environmental Assessment Category B. US$ 312.0 (IDA Credit). Consulting services to be determined. Implementing agency(ies) to be determined.

Education

Africa Higher Education Centers of Excellence for Development Impact: To increase quality, quantity and development relevance of post-graduate education in selected universities through regional specialization. WAPP-APL4 (Phase 1): Côte d'Ivoire Liberia Sierra Leone and Guinea Regional Interconnector- Additional Financing: The revised PDOs for the WAPP CLSG Power Interconnection are to: (a) reduce the cost of electricity supply at the utility level for Liberia and Sierra Leone and (b) increase the amount of electricity traded among all the participating countries. The Development Objective of the WAPP TA is to increase the technical integration of the WAPP network. Approval completed on 17 November 2017. Environmental Assessment Category A. Project: P163033. US$ 82.2/40.2/4.6 (IDA Credit/IDA Grant/KFW). Consultants will be required. Implementing agency(ies) to be determined.

Regional Off Grid Electrification Project: To enhance shared capacity, knowledge and to jointly increase electricity access to households, businesses and communities using modern off-grid electrification technologies in project countries. The project will focus on a selected set of country-specific initiatives that are crucial to meeting the regional strategic goals. Concept completed on 11 April 2017. Environmental Assessment Category F. Project: P160708. US$ 56.0 (IDA Credit). Consultants will be required. Ecowas Centre for Renewable Energy and Energy Efficiency (ECREEE).

Solar Development in Sub-Saharan Africa - Phase 1 (Sahel): The Series of Projects' objective is to accelerate grid-connected solar electricity generation expansion in West African countries. SOP furthers this objective with project specific PDO to (i) strengthen the technical regional capacity for solar generation and integration and (ii) support the preparation of large-scale solar projects in the region. Identification completed on 6 December 2016. Environmental Assessment Category B. US$ 25.0 (IDA Grant). Consulting services to be determined. Implementing agency(ies) to be determined.

The PDO for the Series of Project -1 is to increase the availability of grid based power supply to Southern regions of Tanzania and to enable regional interconnection with Zambia

Concept completed on 23 January 2018. Environmental Assessment Category A. Project: P163752. US$ 455.0/15.0/30.0/100.0 (IDA Credit/IDA Grant/ECEU/FRDE). Consultants will be required. Tanzania Electric Supply Company Ltd.

Participatory Forest and Energy Management Regional Program involving The Gambia, Guinea-Bissau, and Senegal: The proposed PDO is to increase incomes and enhance livelihoods of rural communities in the border areas of Gambia, Guinea-Bissau and Senegal, through sustainable management, production and use of forests, wood fuel and forest products.

The program will support forest policy coordination, cooperation and enforcement across the sub-region; reduction of forest pressures by promoting more efficient and cleaner stoves, kilns and fuels; and enhancement of local control of forests and forest products through creation of a shared forest information network, clarification of forest ownership and use patterns and community planning engaging women, youth, and other vulnerable groups.

Identification completed on 19 June 2017. Environmental Assessment Category B. US$ 154.0 (IDA Credit). Consulting services to be determined. Implementing agency(ies) to be determined.

(R) Mozambique - Malawi Regional Interconnector Project: The project development objective is (i) to increase access to diversified, reliable, and affordable supplies of energy; and (ii) to expand Malawi and Mozambique's opportunities to benefit from bilateral and regional power trading on the Southern African Power Pool. Concept completed on 13 February 2018. Environmental Assessment Category A. Project: P164354. US$ 17.0/42.0/40.0/33.0 (IDA Credit/IDA Grant/GGER/NORW). Consultants will be required. Electricidade de Mozambique; Electricity Supply Corporation of Malawi, Ltd.

ECOWAS-Regional Electricity Access Project (Phase 1): The Programmatic Development Objective is to increase access to reliable energy services in targeted areas and to enable cross-border electrification between the recipient countries.

The Project Development Objective for the proposed Phase 1 operation is to increase access to reliable energy services in The Gambia, Guinea-Bissau, and Mali and to enable cross-border electrification between those countries.
Concept completed on 24 January 2018. Environmental Assessment Category B. Project: P164044. US$ 312.0/0.5/28.7 (IDA Credit/KWBP/WADB). Consultants will be required. Energie du Mali (EDM SA); National Water and Electricity Company (NAWEC); Electricidade e Água da Guiné - Bissau (EAGB).

**Guinea – Mali Interconnection Project:** The Project Development Objective is to: (i) enable electricity trade between Cote d’Ivoire, Guinea and Mali; and (ii) increase access to electricity in the Eastern part of Guinea as well as in the rural areas of Guinea and Mali. Concept completed on **12 February 2018**. Environmental Assessment Category A. Project: P166042. US$ 105.1/68.6/40.1/33.5/43.0/78.5/30.2 (IDA Credit/AFDB/EBID/ECEU/EUIB/ISDB/WADB). Consulting services to be determined. EDG; EDM.

**Zambia-Tanzania Interconnector:** The PDO for the overall Series of Project Program is to establish cross-border transmission capacity between the Southern African Power Pool (SAPP) and the Eastern Africa Power Pool (EAPP) to enable regional power trade.

The PDO for the Series of Project-2 is to increase the availability of grid based power supply to Northern regions of Zambia and to enable regional interconnection with Tanzania.

Identification completed on 1 December 2017. Environmental Assessment Category A. US$ 140.0/40.0/30.0 (IDA Credit/ECEU/EUIB). Consulting services to be determined. Implementing agency(ies) to be determined.

**Environment & Natural Resources**

**AFFC2/Lake Victoria Environmental Management Project APL-1 AF:** The objectives of the Project are to contribute to: (i) the improvement of the collaborative management of the trans-boundary natural resources of the LVB among the Partner States; and (ii) the improvement of environmental management of targeted pollution hotspots and selected degraded sub-catchments for the benefit of communities who depend on the natural resources of LVB. Approval completed on **26 May 2015**. Environmental Assessment Category A. Project: P153466. US$ 20.0/2.0 (IDA Credit/IDA Grant). Consulting services to be determined. Implementing agency(ies) to be determined.

**West Africa Regional Fisheries Program Phase 2 in Liberia and Sierra Leone:** To improve the management of selected fisheries, increase the post-harvest value of catch in targeted landing sites and improve the enabling environment for aquaculture development. Identification completed on 31 October 2016. Environmental Assessment Category B. US$ 75.0 (IDA Credit). Consulting services to be determined. Implementing agency(ies) to be determined.

**West Africa Coastal Areas Resilience Investment Project:** To strengthen the resilience of targeted communities and areas in coastal Western Africa. **Negotiations authorized on 16 February 2018.** Environmental Assessment Category A. Project: P162337. US$ 120.0/70.0 (IDA Credit/IDA Grant). Consultants will be required. Sao Tome and Principe - Ministry of Infrastructures, Natural Resources and Environment; Mauritania - Ministry of Environment and Sustainable Development; Benin - Ministry of Environment and Sustainable Development; Togo - Ministry of Environment and Forest Resources (MEFR) (Directorate of Environment); International Union for Conservation of Nature; Cote d’Ivoire - Ministry of Salubrity, Environment and Sustainable Development; Senegal - Ministry of Environment and Sustainable Development (Directorate of Environment (DECC)); Cote d’Ivoire - Ministry of Economy and Finances; West Africa Economic and Monetary Union.

**SWIOFish3 (Seychelles):** Objective to be Determined. Approval completed on 29 September 2017. Environmental Assessment Category B. Project: P163800. US$ 5.0 (GUAR). Consulting services to be determined. Implementing agency(ies) to be determined.

**Lake Victoria Environmental Management Project Phase Three:** The Project Development Objective (PDO) is to improve environmental and natural resource management and participation in livelihood-enhancing practices in targeted sub-catchments areas and pollution hotspots in the Lake Victoria Basin.

As LVEMP3 will also aim to get GEF support, its objective is consistent with the GEF’s strategic long-term priorities for International Waters (IW), which include fostering international, multi-country cooperation on priority transboundary water concerns. The PDO makes advancements in the IW focal area by supporting and promoting collective management and governance of the Lake Victoria water system through the implementation of policy, legal, and institutional reforms and investments that contribute to sustainable use and maintenance of LVB’s ecosystem services.
Identification completed on 2 October 2017. Environmental Assessment Category A. US$ 195.0/38.0/8.0 (IDA Credit/IDA Grant/GEFU). Consulting services to be determined. Implementing agency(ies) to be determined.

Lake Tanganyika Environmental Management Project: The proposed project development objective is to manage sedimentation and fisheries in the Lake Tanganyika Basin. Identification completed on 4 January 2018. US$ 135.0/40.0/10.0 (IDA Credit/IDA Grant/GFIA). Consulting services to be determined. Implementing agency(ies) to be determined.

Investments towards Resilient Management of GCLME: To reduce the vulnerability of coastal areas and coastal communities in selected West African countries through inclusive integrated coastal management at the regional and national levels. Identification completed on 23 May 2017. US$ 20.3 (GEFU). Consulting services to be determined. Implementing agency(ies) to be determined.

West Africa Regional Fisheries Program Phase 2 in Cabo Verde, The Gambia, Guinea Bissau and Senegal: Improve the management of selected fisheries and increase the net value of catch in targeted landing sites. Identification completed on 3 October 2016. Environmental Assessment Category B. US$ 50.0 (IDA Credit). Consulting services to be determined. Implementing agency(ies) to be determined.

Finance, Competitiveness and Innovation

(R) Strengthening the Capacity of Regional Financial Institutions in the CEMAC Region: The Project Development Objective (PDO) is to strengthen the capacity of selected CEMAC regional financial institutions to implement their mandates in the areas of financial stability, inclusion and integrity. Appraisal completed on 1 March 2018. Environmental Assessment Category C. Project: P161368. US$ 25.0/10.0 (IDA Credit/IDA Grant). Consultants will be required. Commission Bancaire de l’Afrique Centrale - COBAC; Groupe d’ Action contre le Blanchiment d’ Argent en Afrique Centrale (GABAC).

EAC Financial Sector Development and Regionalization Project I: AF: To establish the foundation for financial sector integration among EAC Partner States. For the purposes of this additional financing the “foundation of financial sector integration refers to formulating a regional approach to financial inclusion, furthering legal and regulatory harmonization and building institutional capacity to manage the increasingly integrated financial sector in the EAC. Approval completed on 30 September 2016. Environmental Assessment Category C. Project: P160770. US$ 10.5 (IDA Grant). Consulting services to be determined. Implementing agency(ies) to be determined.

Improved Investment Climate within the Organization for the Harmonization of Business Law in Africa (OHADA) AF: The project development objective is to strengthen OHADA’s institutional capacity to support, in its member countries, selected aspects of investment climate reforms, including improved corporate financial reporting. Identification completed on 28 July 2017. Environmental Assessment Category C. US$ 20.0 (IDA Grant). Consultants will be required. Implementing agency(ies) to be determined.

Governance

Regional Public Sector Capacity Building: The project development objective (PDO) is to strengthen, through regional cooperative networks and public goods, the capacity of select schools and institutes of public administration (SIPAs) to build public sector leadership and management capacity. Concept completed on 1 October 2017. Environmental Assessment Category C. Project: P160923. US$ 30.0 (IDA Grant). Consultants will be required. New Partnership for Africa’s Development Planning and Coordinating Agency.

Health, Nutrition & Population

AFCC2/RI-3A EA PH Laboratory Networking Project Additional Financing: To establish a network of efficient,
high quality, accessible public health laboratories for the diagnosis and surveillance of tuberculosis and other communicable
diseases. Approval completed on 7 July 2015. Environmental Assessment Category B. US$ 50.0 (IDA Credit). Consulting
services to be determined. Implementing agency(ies) to be determined.

Regional Disease Surveillance Systems Enhancement (REDISSE) Phase III: The PDOs are: (i) to strengthen na-
tional and regional cross-sectoral capacity for collaborative disease surveillance and epidemic preparedness in West Africa,
thereby addressing systemic weaknesses within the animal and human health systems that hinder effective disease surveil-
ランス and response; and (ii) in the event of an Eligible Emergency, to provide immediate and effective response to said Eligible
Credit). Consultants will be required. Mauritania - Ministry of Livestock; Benin - CNLS-TP, Présidence de la République du

tions of the CEMAC on issues related to competitiveness, namely investment climate and trade facilitation. Identification com-
pleted on 14 February 2017. US$10.0/10.0 (IBRD/IDA Grant). Consulting services to be determined. Implementing
agency(ies) to be determined.

AFCC2/RI-EAC Accelerated Regional Integration: A. Proposed Development Objectives

38. The development objective of the proposed project is to accelerate regional trade integration by reducing costs and barriers for farmers and small scale traders in the EAC. The objective will be achieved through reforming trade policies and procedures, improving facilities and systems, leveraging digital platforms, and enhancing the capacity of select trade regulation agencies.

39. Project beneficiaries will primarily be Farmers; Cross-border traders, especially women; Services providers in selected sec-
tors (ICT, transport, professional) as well as consumers and users of such services; and National and regional policy institu-
tions tasked to implement and monitor policy reforms to deepen regional integration in the EAC. Concept completed on 29

mined. East African Community.

AFCC2/RI-Great Lakes Trade Facilitation - SOP2: The development objective is to enhance the capacity for commerce
and improve processes and conditions for cross-border trade at targeted border locations in the GLR.

The "Capacity for commerce in the context of this project is defined as the capacity of core trade infrastructure, such as border
markets, border facilities, and ports, to handle an increased flow of goods, services, and people, and the capacity of government
agencies at the border to provide high quality and efficient services. Service providers include those individuals who directly
support the immediate cross-border trade value chains, including, among others, market vendors in border markets, trans-
porters, and government agents. The assumption is that improving the adequacy of trade infrastructure, simplifying and im-
proving border processing procedures (including standards for treatment), and enhancing the knowledge and capacity of trad-
ers and border officials would lead to reduced trade costs (be they material and immaterial, the latter related to harassment
and waste of time) that the target-groups have to bear each time they cross the border. Taken together, and in the absence of
any other factors of influence that are not under the control of the project (such as conflict, disaster, major political and/or
economic crisis), these project outcomes would help increase the volume of goods traded through the respective border
posts/crossing points and improve the livelihoods of those involved in the cross-border value chains in the sub-region. Concept
completed on 30 September 2016. Environmental Assessment Category B. Project: P155329. US$ 47.0/28.0 (IDA Credit/IDA

**Indonesia: Matenggeng Pumped Storage Hydro-Electrical Project:** The development objective is to increase the peaking capacity of the power generation system in Java-Bali in an environmentally and socially sustainable way and strengthen the institutional capacity of the project implementing entity (PLN) in hydropower planning, development and operation.

The proposed project will provide support for PLN's development of a pumped storage power development project in Matenggeng, central Java, aiming to improve the long term overall efficiency of the power industry in the country. The total project cost (excluding price contingency) is estimated at US$ 600 million and it is proposed by PLN that around US$ 500 million will be financed by the Bank.

The basic design of the Matenggeng project as well as related environmental and social studies are being financed under the ongoing Upper Cisokan Pumped Storage Project.

Component 1: Matenggeng Pumped Storage Power Project

The development consists of (i) a lower reservoir with around 10 million cubic meters of volume and impounded by a dam with a maximum height of 90 meter, (ii) an upper reservoir with around 10 million cubic meters of volume and impounded by a dam with a maximum height of 100 meters; (iii) two inclined shafts connecting the lower and upper reservoirs; (iv) an underground powerhouse with an installed capacity of 880 MW; (v) associated 500 kV transmission lines to connect the power station to the Java-Bali power system.

Component 2: Community Development Component

A livelihood restoration or community development component, incorporating, at a minimum, the execution of the resettlement and livelihood restoration programs for all project affected persons, will be financed under the project. The component would also finance a broader community development program. Identification completed on 26 November 2012. Environmental Assessment Category A. US$500.0 (IBRD). **GEF Metro Manila Flood Management - Phase 1:** The project would initiate comprehensive institutional, technical and community approaches to restoring the water quality and enhancing the economic benefits of the large Manila Bay, pasig River and Laguna Lake system. The project is undoubtedly ambitious, and "full" achievement of the goals will take a period of perhaps 20 years of sustained Government and civil society commitment and effort. Accordingly, the project concept proposes a pragmatic approach, with the sequencing of activities in a way that supports the establishment and operationalization of the necessary institutions, a process that may take some time, while also providing for interim mechanisms that will enable planning and investments to proceed for the "clean-up" and enforcement of environmental laws. Project financing would require a blend of loan and grant funds, and the nature of the task suggests an Adjustable Program Loan (APL) would be appropriate, with the first phase being relatively modest, in keeping with the substantive governance issues to be addressed. The project concept has a solid legal base through the Clean Water Act, and a host of other well formulated environmental laws including
the Supreme Court Directives in 2008 and 2011. Incomplete implementation of those laws and regulations is, however, an issue the project would need to address. The project would have five main components: 1) Establishment of the Institutional Framework and Mechanisms for integrated and comprehensive management of the Manila Bay, Pasig River and Laguna Lake system; 2) Implementation of priority environmental infrastructure and LGU-implemented subprojects for water quality and sedimentation mitigation; 3) Monitoring of key pollution and sedimentation parameters; 4) Regulatory strengthening and Third-Party Monitoring and Reporting on Compliance with Environmental Laws and Regulations; and 5) Community and Civil Society Volunteer Support and Education. Identification completed on 17 November 2011. Environmental Assessment Category A. US$ 7.4 (GEFU). Consultants will be required. Social, Urban, Rural and Resilience Global Practice

Second Rural Investment Project Additional Financing: The AzRIP projects, under implementation since 2005, have garnered widespread recognition for delivery of solid, tangible and dynamic results on the ground in improving people's lives though the upgrading of rural communities’ access to infrastructure services, improved mobility, and increased farmers’ incomes. A keen emphasis on sustainable infrastructure, maintenance contracts, and accountability has helped ensure that over 90 percent of infrastructure rehabilitated under the purview of AzRIP is operational. The income of over 600,000 farmers has increased, and 150,000 rural poor now have access to safe water. AzRIP-2 is a multisector investment loan targeting 600 communities in 56 rayons for community-driven rural infrastructure investments and livelihood support. The proposed Additional Financing would continue to prioritize provision of improved access to and use of community-driven rural infrastructure and expand economic activities for rural households through financing of priority rural infrastructure investments, strengthening the capacity of communities in partnership with municipalities and local support institutions to effectively identify, plan, and implement their development priorities; and building opportunities for rural employment and livelihood support services. The AF would comprise three components - one to extend delivery of community rural infrastructure (additional rounds of grants to participating communities and service to new coverage areas), the second to scale up the livelihood pilots, expanding the productive investment livelihoods component and the third to pilot a lifeline roads concept (with clusters of
communities and a focus on local connecting roads). Approval completed on 9 July 2014. Environmental Assessment Category B. Project: P147861. US$50.0 (IBRD). Consultants will be required. RUSSIA ENERGY EFFICIENCY (GEF): The Project Development Objective is to improve the efficiency of energy use in Russia by scaling-up commercial lending by banks for EE investments in the industrial and public sectors. The global environmental objective is to reduce greenhouse gas emissions (GHGs) by scaling-up EE investments. The PDO will be achieved through combined financial and technical assistance (TA), supported by a US$500 million IBRD loan and a US$9.71 million GEF grant to GPB, and a US$13.02 million GEF grant to REA.

The Project will provide assistance to three key groups of stakeholders. International experience shows that the success in enabling investments in EE depends on participation of and interactions among three groups; banks, project owners, and service and equipment providers. The Project will directly target selected representatives from all three groups. Several Russian banks will receive training and some technical assistance to develop their EE lending business, so that they could enter the market to finance EE projects. The GPB, the third largest bank in Russia, will receive an IBRD loan that will co-finance its EE credit line. A visible presence of GPB in the market of EE financing, demonstration of a viable EE lending business, and dissemination of experiences will encourage EE lending uptake by other banks.
The Project will help several regions improve their EE plans and develop bankable EE subprojects. In five regions; Kaluga, Novosibirsk, Samara, Yaroslavl and Yekaterinburg, GEF will support REA TA efforts to regional and municipal authorities in improving their EE programs and to several project owners in the regions in preparing bankable projects. This should boost the demand for EE services and equipment providers, while demonstrating viable procurement, contracting and financing models. National dissemination of results and lessons learned will spur on other regions, municipalities, and energy consumers to follow the example, which could help address a critical issue facing commercial financing of EE projects: the shortage of EE investment projects that are acceptable to commercial banks. Identification completed on 8 July 2010. Environmental Assessment Category F. Project: P122492. US$300.0 (IBRD). Consulting services to be determined. Education

AF Bangladesh - Primary Education Development Program III: Additional Financing (AF) in the amount of US$400 million to scale up the Bangladesh Third Primary Education Development Program (PEDP3: P150669). In addition, Level 2 Restructuring comprising: (i) modification of the project scope of work; (ii) revision of the results framework to measure the outcomes associated with the revised scope of work; and (iii) extension of the project closing date from December 31, 2015 to December 31, 2017. The Project Development Objective in the proposed AF operation will remain unchanged and will continue to be to: "(i) increase participation and reduce social disparities in primary education, (ii) increase the number of children completing primary and improve the quality of the learning environment and measurement of student learning, and (iii) improve effectiveness of resource use for primary education.” The proposed Additional Financing would help to finance the cost of the scale-up activities and subsequent restructuring of the project to respond effectively to changes in the Bangladesh primary education sector due to ongoing nationalization of the previous "Registered Non-Government Primary Schools" (RNGPS), scale-up and expansion of interventions of the original PEDP3 project in order to implement a further set of reforms by 2017; and join government's efforts towards achieving universal primary education specifically by improving scaled up efforts targeting the remaining, hardest-to-reach population groups to overcome the barriers to education for those still out of school, while also tackling emerging concerns related to the quality of learning (such as low teacher-student contact hours of instruction in schools). The original project is well performing, and the recent Mid-Term Review (MTR) rates the progress towards development objectives and implementation satisfactory. Approval completed on 16 December 2014. Environmental Assessment Category B. Project: P150669. US$ 400.0 (IDA Credit). Consultants will be required. Directorate of Primary Education, Contact: ..

Secondary Education Quality and Access Enhancement Project - AF: The Project Development Objective in the proposed AF operation will remain unchanged and will continue to be "to improve the quality of secondary education, systematically monitor learning outcomes, and to increase access and equity in project upazilas". The four project components will be the same as in the original project. The proposed AF would: (i) support the implementation of the expanded project activities (across more schools and students within SEQAEP upazilas) to deepen the impact of a well-performing project; (ii) allow adequate time for MOE to evaluate and institutionalize successful interventions from the ongoing project under a more harmonized secondary education sector program that GOB is planning to initiate by early 2017; and (iii) initiate replication of successful activities beyond 125 SEQAEP upazilas in a phased manner for a smoother institutionalization of SEQAEP interventions. The AF would also extend the Closing Date of the current SEQAEP project from June 30, 2014 to December 31, 2016 in order to carry out the proposed activities. Approval completed on 3 December 2013. Environmental Assessment Category B. US$ 265.0 (IDA Credit). Consultants will be required. BD Higher Education Quality Enhancement Project - AF: The Higher Education Quality Enhancement Project (HEQEP) was approved in March 2009 and the main objective of the project is to improve the quality and relevance of the teaching and research environment in higher education institution through encouraging both innovation and accountability within universities and by enhancing the technical and institutional capacity of the higher education sector. Additional Financing has been proposed to fill the funding gap to effectively complete the agreed project activities; expansion of project interventions in order to scale up project impact and development effectiveness is warranted based on the likelihood of achieving project objective and strong project performance. The following components/activities have been proposed with additional financing of US$60.0 million: (i) Component 1: Promoting Academic Innovation; (ii) Component 2: Building Institutional Capacity of Tertiary Education Sector; (iii) Component 3: Raising the Connectivity Capacity in the Higher Education Sector (BdREN & Digital Library); (iv) Component 4: Establishment of Quality Assurance Mechanism; and (v) Component 5: Project Management and Monitoring and Evaluation. Component 1: Promoting Academic Innovation Sub-Component 1.1 - Financing to cover the shortage of funds for the 1st and 2nd rounds AIF . The additional financing will provide funds for the first and second rounds AIF sub-projects which are under implementation. The shortage was created when the Project needed to temporarily reallocate the funds to the BdREN activities under Component 3 during the restructuring. Sub-Component1.2 - Third round of AIF The AIF will allocate its resources through three competitive windows: (i) improvement of teaching and learning; (ii) enhancement of research capabilities; and (iii) university-wide innovations which include campus network In order to place additional emphasis on innovation for teaching and learning (Window 1) and research (Window 2), selection criteria will be modified. Established proposal evaluation process will be followed with minor modifications based on the lessons learned from the first and second rounds AIF which will be reflected in a revised AIF Operations Manual. Component 2: Building Institutional Capacity of Tertiary Education Sector This component aims to further strengthen the capacity of UGC, MOE and
Higher Education Institutions for the future development of the sector. To this end, the project will support the policy formation based on the studied carried out under the original project. Component 3: Raising the Connectivity Capacity of the Higher Education Sector Sub-component 3.1: Strengthening BdREN connectivity: Basic connectivity through overhead dark fibre would be established by December 2013. To use the full potential of the connectivity campus network would be established for the remaining 20 public universities. In addition, VC facilities using the BdREN connectivity could be established in the Ministry of Education, ERD, and Planning Commission. Provisions would be made available for add-on software including cloud-computing and equipment for performance enhancement. Sub-component 3.2: Awareness building and knowledge exchange: Awareness raising and knowledge exchanges on best practice for the ownership, governance and exploitation of an NREN for the stakeholders of BdREN. The exchange programs could include: (a) Policy level knowledge exchange among the “South” and “North” countries; (b) academic and technical level knowledge exchange with the neighboring countries in Asia Pacific mainly on grid computing, climate modeling, medical imaging etc. Sub-component 3.3: Capacity building (technical and financial management): Additional staffing and technical training of IT personnel at network and campus level - Local training programs for university IT staff on campus networking in association with international providers to create a national capacity to provide such training. A system of scholarships/fellowship or international placements would be provided for specialist training of IT personnel in campus networking with the aim of building a training team for the country. Sub-component 3.4: Application development to maximize the utilization of BdREN: Additional support would be necessary for ensuring (a) enhancement of digital library access, (b) partnership with regional and continental RENs, and (c) utilization “pump-priming” activities in (i) education, (2) research collaboration, and (c) campus safety. Component 4: Establishment of Quality Assurance Mechanism To build on the momentum generated under the first two rounds of AIF and the recent efforts made in developing a national quality assurance mechanism, the Project would support the following activities with the proposed additional financing: (i) establishment of Quality Assurance and Accreditation Council of Bangladesh (QAAC); and (ii) establishment of Institutional Quality Assurance Cells (IQAC). Sub-component 4.1: Establishment Quality Assurance and Accreditation Council of Bangladesh The objective of this sub-component is to provide funds for the establishment of Quality Assurance and Accreditation Council of Bangladesh and the development of Regulations, Qualification Framework, and Quality Assurance Manual. Additional funds will be also provided for awareness campaigns and necessary capacity building activities. Board Annex: Listing of DPFs & PforRs

As Development Policy Finance (DPF) and Program-for-Results operations do not offer procurement opportunities for firms, they will not be included in the MOS report available externally. In response to questions during the COGAM discussion, Management has clarified that the internal version of the MOS that is sent to EDs will continue to include the data on DPF and PforRs as listed in this Board Annex.
