TECHNICAL APPENDIX

INDICATORS	DATA SOURCE	REMARKS
POVERTY		
Poor Poverty rate	Poverty lines based on 'Tendulkar' poverty lines published by the former Planning Commission of India. Consumption expenditure survey conducted by the National Sample Survey Office (NSSO) in 2011-12.	<ul style="list-style-type: none"> Households whose monthly per capita consumption expenditure is below the poverty line are classified as 'poor'. Poverty rate is the proportion of population that is counted as poor.
DEMOGRAPHICS		
Number of poor and distribution of poor: all India, low income states, rural and urban areas	Population Census, Registrar General & Census Commissioner, India. World Bank (2013). India - Country partnership strategy for the period FY13-FY17. Washington, DC: World Bank.	<ul style="list-style-type: none"> Poverty rates, estimated using NSS data, are applied to Census population estimates to arrive at the number of poor in 2011-12. Population has been estimated by extrapolating 2011 Census data to January 1st 2012, using Compounded Annual Growth Rate (CAGR). Following World Bank (2013), low income states refer to a group consisting of the following seven states: Bihar, Chhattisgarh, Jharkhand, Madhya Pradesh, Uttar Pradesh, Odisha and Rajasthan.
Small villages (0-4999, Rural) Big villages (5000+, Rural) Small towns (0-1 million, Urban) Big cities (1 million+, Urban)	Population Census, Registrar General & Census Commissioner, India 2001. Consumption expenditure survey conducted by the National Sample Survey Office (NSSO) in 2011-12.	<ul style="list-style-type: none"> Rural areas: They are reclassified below the district level into small and big villages by linking the Census 2001 (sampling frame of the NSS 2011-12 round) to the NSS on basis of the average village size of the NSS substratum. Urban areas: Using the NSS, towns with a population of less than a million in a district are treated as "small" and those with a population of million or more are treated as "big".
MAIN SOURCES OF INCOME		
Households by sector-wage	Employment and unemployment survey conducted by the National Sample Survey Office (NSSO) in 2011-12.	Households are classified into wage-sector type based on the main source of household's income during the 365 days preceding the date of the survey.
HOUSEHOLD CONSUMPTION EXPENDITURE		
Share of monthly budget	Consumption expenditure survey conducted by the National Sample Survey Office (NSSO) in 2011-12.	<p>Some budget items explained:</p> <ul style="list-style-type: none"> 'Education and Health'-includes monthly expenditures on education and both medical (institutional) and medical (non-institutional). 'Others'-includes monthly expenditures on pan, tobacco, intoxicants, entertainment, minor durable-type goods, toilet articles, other household consumables, consumer services, conveyance, rent, consumer taxes and cess, clothing, footwear, bedding and durable goods.
