Establishment of a Nitrates Mitigation Investment Fund within the MAFRD to finance Sub-Grants in the counties of Osijecko-Baranjska, Vukovarsko-Srijemska, and Varadinska, and provision of two (2) technical staff to support the management of the Fund.

B. Water and Soil Monitoring and Impact Analysis

Development and implementation of a water and soil monitoring program aimed at assessing the reduction of nutrient loads to surface and ground waters from Sub-projects, including impact analysis, through: (i) the installation of up to twenty-seven (27) piezometers sets in selected representative sites to monitor the quality of water flowing out of livestock farms implementing Sub-projects; (ii) systematic sampling and testing of well water in rural areas, both as a goodwill measure for participating Farms as well as to demonstrate the risk to rural communities from inappropriate nitrates management; (iii) the preparation and adoption of a Quality Control and Quality Assurance Operational Manual to bring coherence and uniformity in the work of all measuring stations and monitoring programs; (iv) the provision of data logging equipment for piezometer monitoring and sampling; and (v) the installation of three (3) sets of three (3) lysimeters in Varadinska county in the vicinity of selected livestock farm with a view to measure nitrite and other parameters leaching into the soil.
Part 2: Development and Promotion Agri-Environment Measures

Strengthening of CAEI’s capacity to advice and train the farmers working in the counties of Osijek-Baranjska, Vukovarsko-Srijemska, and Varazdinska on the most cost-effective on-farm technologies for complying with the Nitrates Directive, including the financing of the salaries of the three (3) nitrates management staff in CAEI, the carrying out of field demonstration trips, the provision of training, international technical assistance, equipment and installation costs of soft-ware, and encompassing the following:

Implementation, and support to the CAEI in the implementation, of a broad-based program to promote the adoption and implementation of environmentally friendly agricultural practices to reduce non-point source nutrient pollution from agriculture through reducing nutrient discharge into water bodies, through the provision of: (i) technical assistance to Farms receiving Sub-Grants; (ii) nutrient management planning in the project counties to promote optimum use of organic and mineral fertilizers in order to reduce the loss of nitrogen and phosphorus to the water bodies; and (iii) demonstration of cover crop technology that reduces nutrient loss, protects soil from compaction and erosion, maintains soil organic matter, enhances biodiversity and provides additional fodder and/or green manure.

Part 3: Public Awareness and Replication Strategy

Carrying out of a Project county and nationwide public information campaign to disseminate the benefits of the proposed Project activities for their replication with IPARD support, with particular emphasis on the implementation of good agricultural
practices and the promotion of improved rural sanitation in the Project counties, and including:
