SCHEDULE 1

Project Description

The objective of the Project is to increase access to infrastructure and urban services in Lomé.

The Project consists of the following parts:

Part A: Infrastructure Rehabilitation

Carrying out of Annual Work Programs of works, and provision of goods required for the purpose of:

1. Drainage rehabilitation in selected poor neighborhoods of Lomé, through: (a) cleaning of approximately forty two kilometers (42 km) of existing canals throughout the city of Lomé; (b) rehabilitation and extension of approximately eight kilometers (8 km) of unsound drainage networks, resurfacing of drains and construction of new culverts along major roads, using mostly labor-intensive works methods; (c) rehabilitation of shoulders and side ditches of the secondary drainage network that drains into the lagoons of Lomé; and (d) construction of four (4) storm water retention ponds, including their fencing and the equipment of one of them with a pumping station.

2. Rehabilitation of approximately five kilometers (5 km) of primary and secondary roads in Lomé to increase access to isolated areas of the city, including Adakpame, Adidogome, Totsi, Adidoade, and Zorro Bar neighborhoods through: (a) reshaping and reinforcing of base structures, re-gravelling and paving of roads, and rehabilitating drainage and crossing structures along those roads; and (b) construction of a bridge to widen the existing road and ease traffic flow.

3. Increasing access to and improve the quality of water services for residents in poor peri-urban neighborhoods of Lomé, not serviced by TdE, through: (a) drilling and equipping fifteen (15) solar-powered production boreholes, (b) connecting selected neighborhoods of Lomé to boreholes distribution in the form of mini-water supply systems, and (c) installing sixty (60) water kiosks (“kiosques à eau”) and standpipes.
4. (a) Rehabilitation of the electric distribution network of Lomé through:
(i) rehabilitation of twenty (20) medium voltage (MV) or low voltage (LV) transformers, including the replacement of selected small transformers by higher capacity transformers;
(ii) rehabilitation of the network distribution, including the execution of new MV substations and the reconstruction of selected LV substations to support acceptable capacity levels; and (iii) installation of fault passage indicators on the electric distribution network.

(b) Improving the energy efficiency of the electric distribution system through:
(i) installation of at least 400,000 Compact Fluorescent Lamps (CFLs) replacing incandescent light bulbs in use; (ii) carrying out of public information and awareness campaigns to promote a culture of energy efficiency; and (iii) implementation of a normative framework and quality control system in the national market of CFL distribution.

Part B: Institutional Strengthening

1. Carrying out of the following capacity building and institutional strengthening programs, including the provision of goods required for the purpose:

(a) a program to build capacity in terms of equipment and logistics for the entities involved in the implementation of the Project;

(b) a program to strengthen the supervision, monitoring, evaluation and communication skills and functions of the Technical Secretariat with regard to the implementation of the Project; and

(c) a program to provide capacity building activities to the staff of the entities involved in the implementation of the Project in financial management, procurement, monitoring and evaluation, environmental and social safeguards.
SCHEDULE 2

Project Execution

Section I. Implementation Arrangements; Procurement
